## Acknowledgments

The authors express their sincere appreciation to the Commonwealth Department of Social Services for sponsoring this national research project, and to the Victorian Department of Human Services which had administrative carriage of the project. In particular, we thank Beth Allen (Assistant Director, Child Protection, Statutory and Forensic Services), and Graham Brewster (Statutory and Forensic Services - Child Protection), both from the Victorian Department of Human Services. Their ongoing project monitoring for quality assurance through correspondence, teleconferences and in personal meetings has been invaluable.

The authors also express deep gratitude to child welfare agency staff from every State and Territory for extracting and providing the data used in Stage 2 of this project. The authors also thank agency staff from State and Territory child welfare departments for their time and expertise in providing feedback in a three stage process on drafts of sections of this report. Without this support and helpful commentary from government agency partners nationwide, this research project would not have been possible.

The authors thank support staff for their administrative assistance on this research project. In particular, we express our gratitude to Dr Sandra Coe (Senior Research Assistant) for extensive assistance. We also thank Stephanie Jowett, Anne Overell and Ivan Ingram for their assistance in the closing stages of the project. The authors thank their University research centres for intellectual and administrative support, and two international expert academic reviewers for their technical evaluation of the project methodology.

## Disclaimer

The views and findings expressed in this report are those of the authors and do not necessarily reflect those of the Commonwealth Government or of State and Territory child welfare departments.

The law as stated is current to 31 December 2012.

**Important note:** In 2014, the *Child Protection Reform Amendment Act 2014* (Qld) was passed, which will make substantial changes to Queensland's mandatory reporting legislation. These changes will shift Queensland's position towards the current position in Victoria. The changes will broaden some mandatory reporting duties, but will narrow others. The changes also will introduce a more formal statutory footing for differential response pathways. These pending changes in Queensland are the most significant legislative amendments made in any jurisdiction to mandatory reporting legislation in the period after the 2003-12 time period which defined the scope of this research project.

# Executive Summary

# EXECUTIVE SUMMARY: TASMANIA

## Introduction

This **Executive Summary** presents key findings from this research project entitled *Child Abuse and Neglect: A Socio-legal Study of Mandatory Reporting in Australia*. A comprehensive treatment of our analysis is presented in the full Report.

A key component of this research project was to access official government data to analyse the reporting of different types of child abuse and neglect, by different reporter groups (both mandated reporters such as police, and non-mandated reporters), over the nine year period 2004-12 in Tasmania.

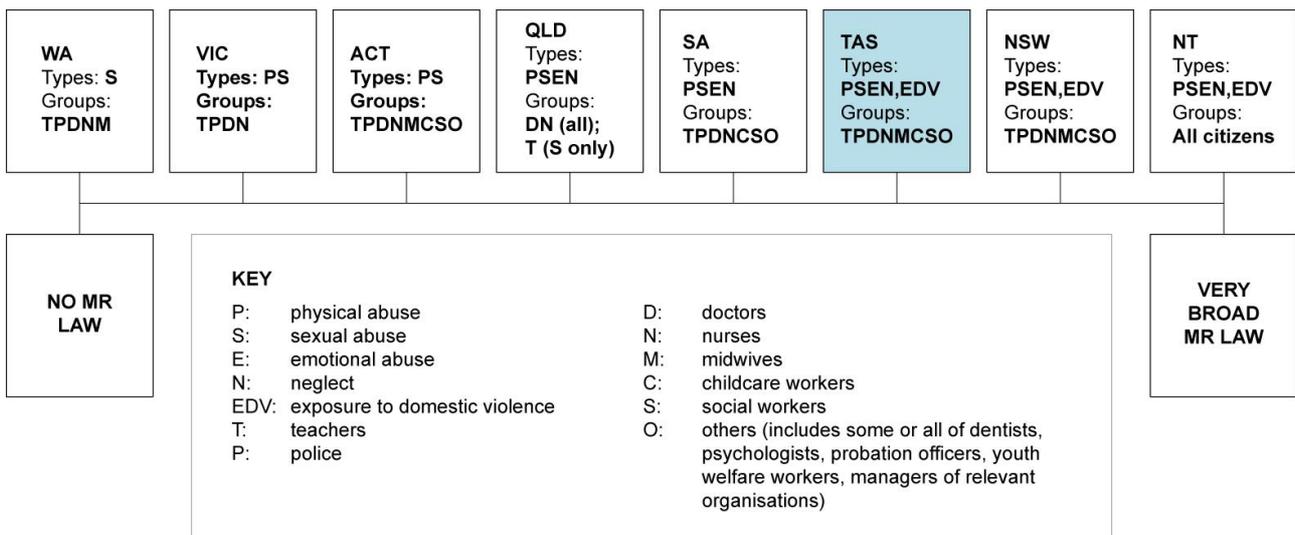

This summary captures some of the most important trends identified by our analysis, which can inform future advances to policy and practice.

## Tasmania’s mandatory reporting law

Tasmania has a broad mandatory reporting law, compared with other States and Territories (Fig 1).

A wide range of occupational groups are designated as ‘mandated reporters’, including teachers, police, doctors and nurses. Reports (notifications) must be made of a number of situations, most relevantly where a reporter reasonably believes or suspects, or knows, a child has been or is being abused or neglected (to the extent of suffering or being likely to suffer harm detrimental to wellbeing, or is an ‘affected child’ under the *Family Violence Act 2004* (exposure to family violence where the child’s safety, psychological wellbeing or interests are affected or likely to be affected). The duty to report family violence commenced on 30 March 2005.

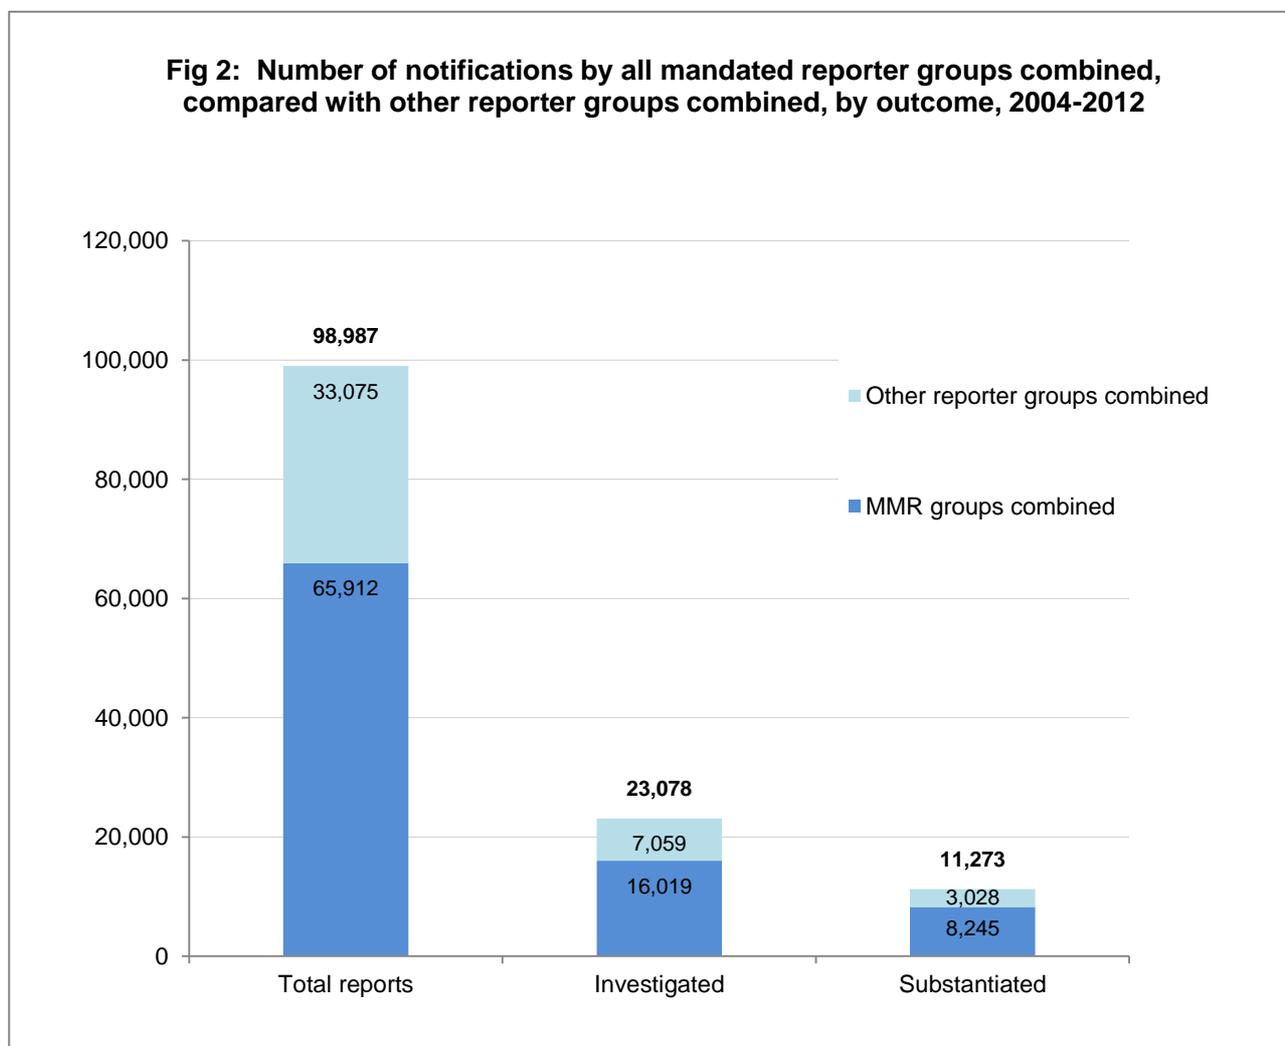

**Fig 1: Mandatory reporting law spectrum\***

\* Reflects general position at 31 December 2012: full reports provide complete details. Victoria limits the reporting duty to situations where the child’s parents have not protected the child from harm. Queensland has uncommenced amendments which will place it close to Victoria’s position. Emotional abuse is sometimes named psychological abuse. NSW, Tas also require reports of prenatal risk of harm in some circumstances. In NT, EDV refers to exposure to physical violence, and is more limited than in NSW, Tas.

## Major findings from analysis of data on notifications and outcomes 2004-12

Some major trends emerge from our analysis of the data on notifications of child abuse and neglect in Tasmania.

### 1. Non-mandated reporters make a significant proportion of all notifications.

There were 98,987 notifications of suspected child abuse and neglect made by all persons (Fig 2). Non-mandated reporters made 33,075 notifications (33% of the total). This suggests that while mandated reporters make the majority of all notifications, the practices of non-mandated reporters also merit attention to enhance reporting.

### 2. Mandated reporters make a substantial proportion of all notifications.

Mandated reporter groups made 65,912 notifications (67% of the total: Fig 2). Due to the breadth of Tasmania's reporting law, these notifications were nearly all mandated by law; that is, notifications by mandated reporter groups, of abuse and neglect required to be reported. Only those made regarding family violence before the duty to report it commenced were not technically 'mandated reports'.

### 3. A substantial proportion of all notifications are not investigated.

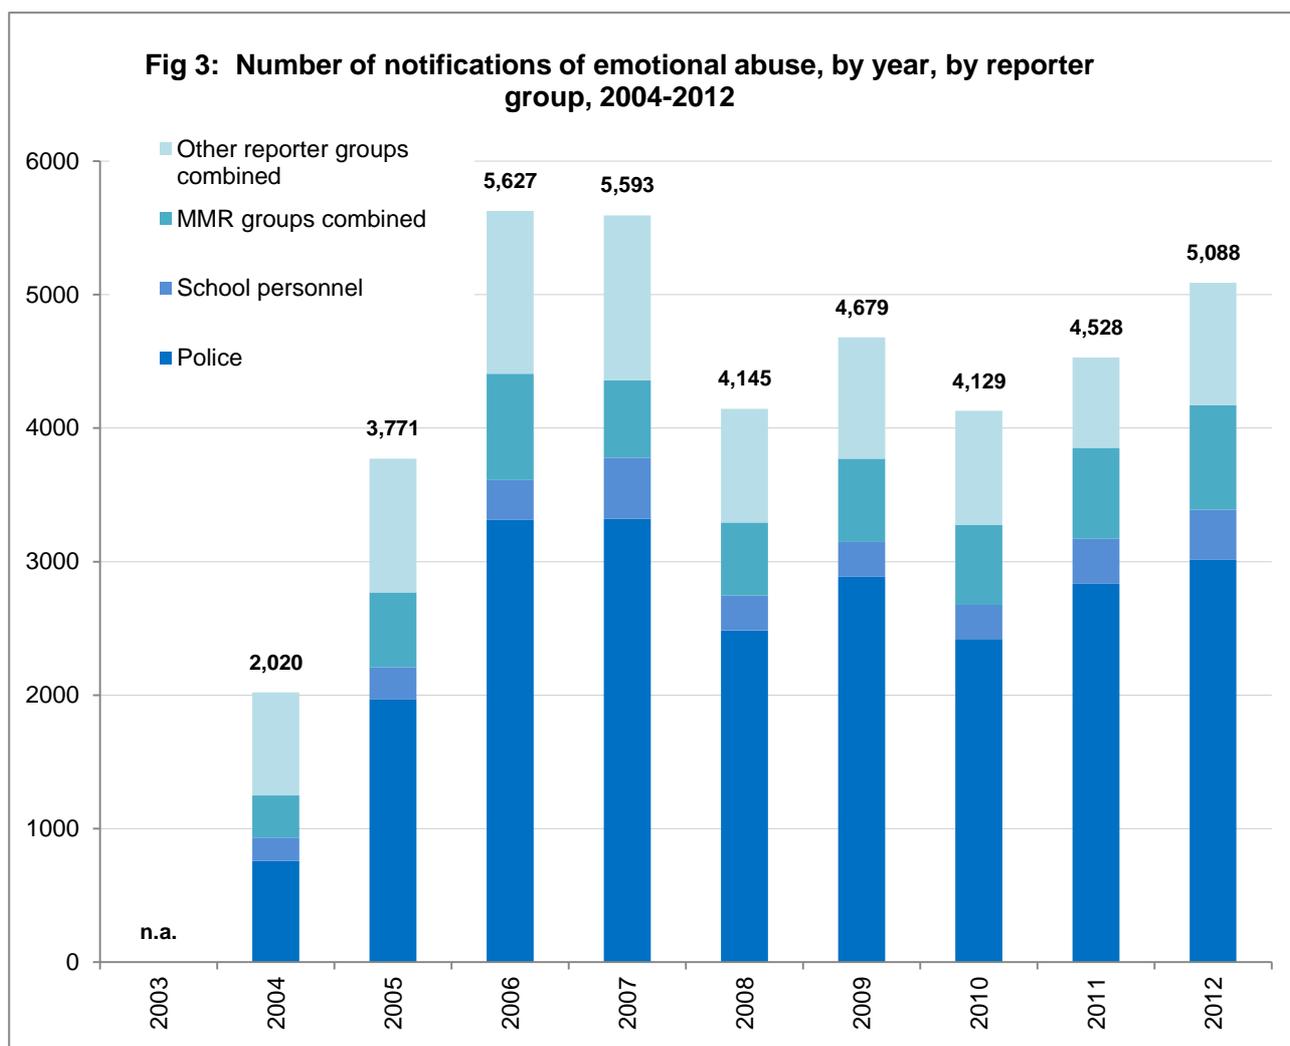

In Tasmania, 23,078 notifications were investigated and 75,909 were not investigated (Fig 2). This rate is likely influenced by many factors including Tasmania’s caller-defined protocol. It is similar to the rate in other jurisdictions with this protocol.

### 4. Mandated reporters’ notifications identify a large majority of substantiated cases.

There were 11,273 substantiations out of 23,078 investigations (Fig 2). Of all substantiations, 8245 (73%) resulted from mandated notifications.

### 5. The number and proportion of notifications differs by type of child abuse/neglect, and by reporter group. Emotional abuse is most frequently reported, even after legislative changes in 2009.

Overall, notifications of emotional abuse surged from 2004-07, declined for a brief period, and then increased again from 2010 (Fig 3).

From 2004-07, notifications of emotional abuse almost tripled (2020 to 5593). This trend is similar for both non-mandated and mandated reporters, but is even more pronounced for mandated reporters, with notifications by police largely responsible.

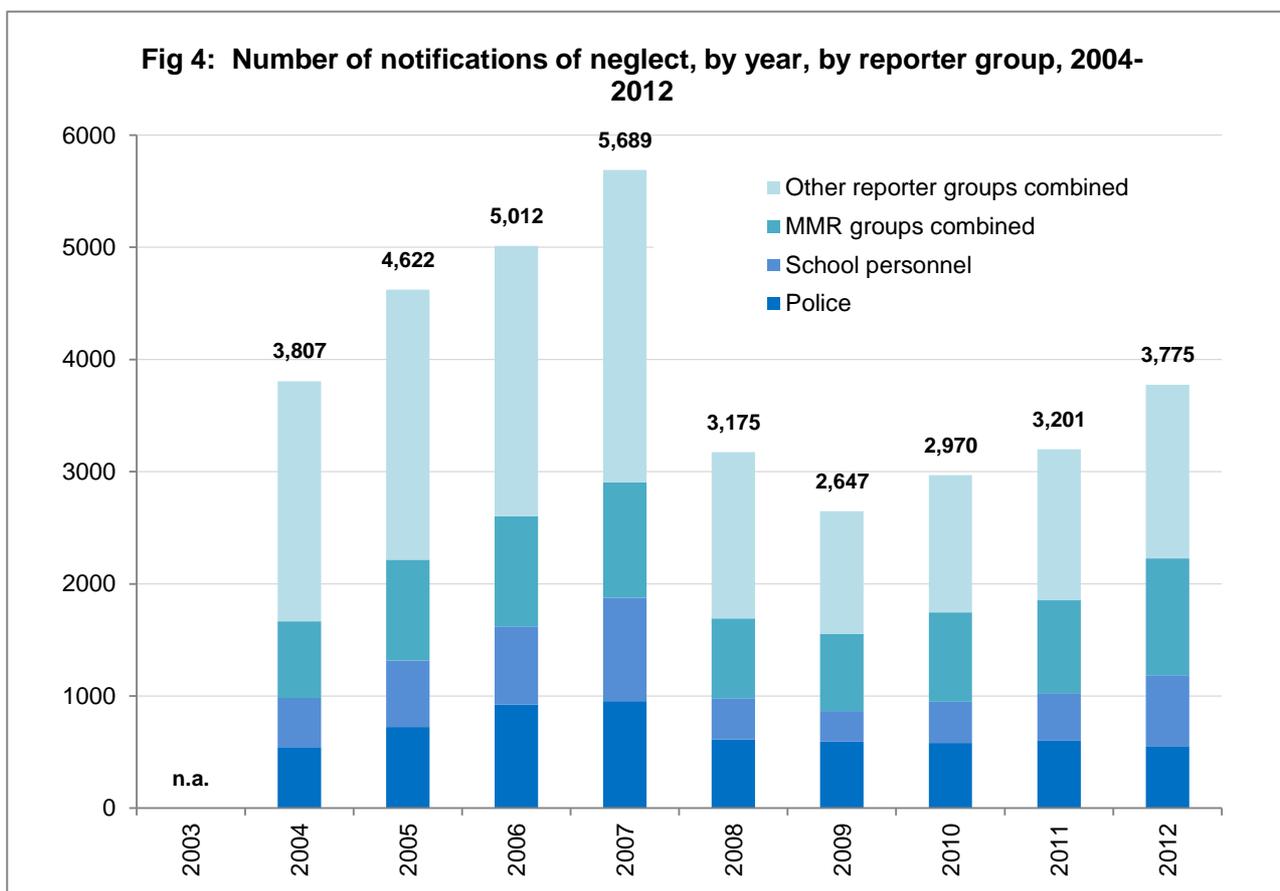

Notifications of emotional abuse by non-mandated reporters increased from 2004-07 (770 to 1237). However, they then declined, suggesting that while the 2008 change in recording practice was likely influential, a proportion of these cases were referred to new community-based intake services, or were perhaps not referred at all..

Notifications of emotional abuse by mandated reporters surged in this period 2004-07, increasing by more than 3 times (1250 to 4356). Police notifications were a particularly prominent source of this increase. It is plausible that many of these situations arose in the context of domestic violence, especially given that the increase coincides with the introduction of the new duty to report family violence from 30 March 2005.

A decline occurred after 2007, likely influenced by the change in recording practice in 2008 and the ability from 2009 to make referrals to the new community-based intake services. It may also be partly explained by an increase in reports coded as 'not stated' or 'other'. However, a rise in 2011-12 indicates emotional abuse remains frequently reported by mandated reporters despite these developments.

## 6. Notifications of *neglect* appear to have decreased markedly since 2007.

Overall, trends in notifications of neglect show very similar patterns to those for emotional abuse (Fig 4).

From 2004-07, notifications of neglect increased markedly (3807 to 5689). This trend is similar for both non-mandated and mandated reporters, but is even more pronounced for mandated reporters.

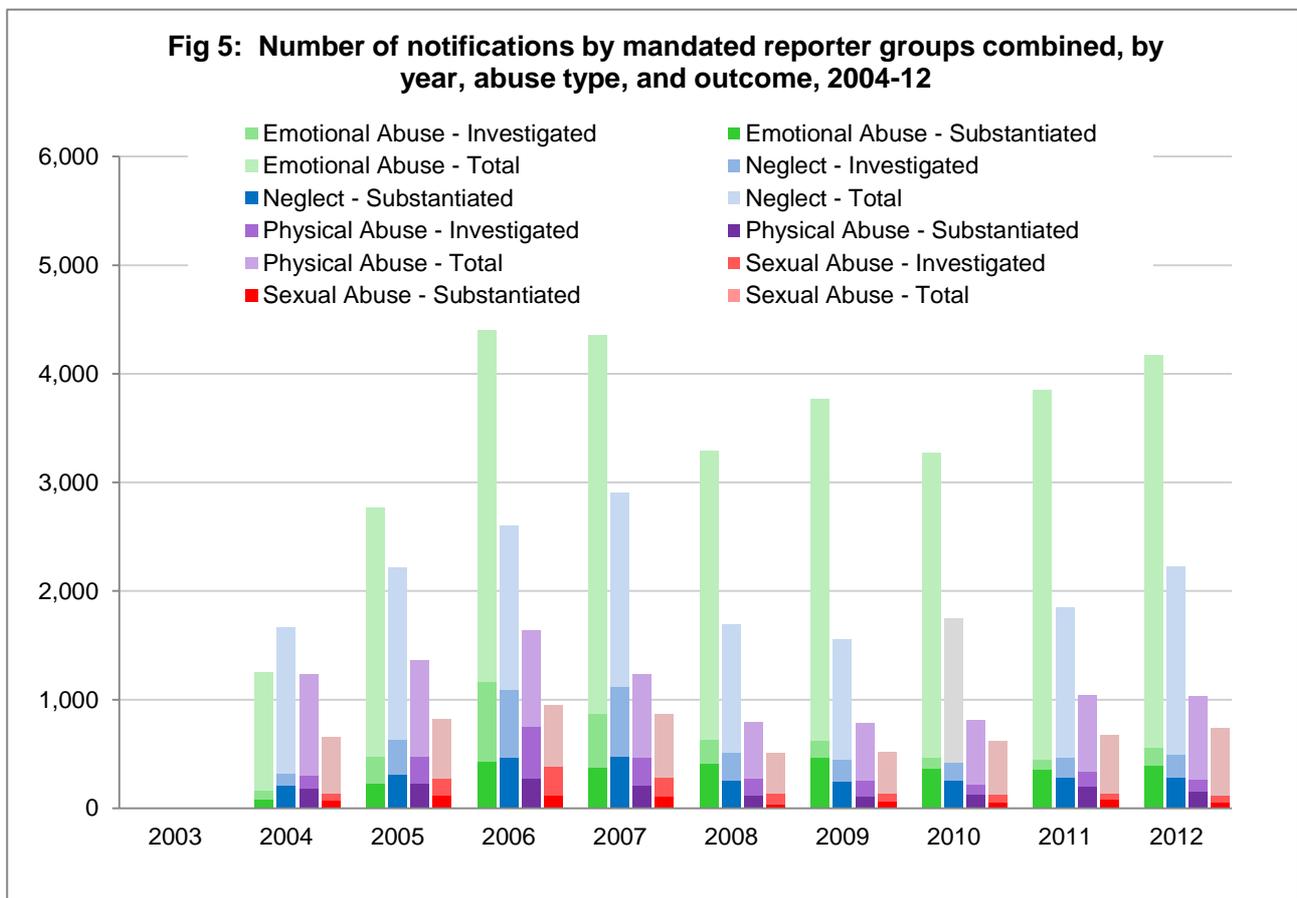

Notifications of neglect by non-mandated reporters increased in this period (2141 to 2784). Notifications of neglect by mandated reporters also increased (1666 to 2905). This increase occurred at and around the time the new duty to report family violence was introduced.

A decline occurred after 2007, likely influenced by the change in recording practice in 2008 and the ability from 2009 to make referrals to the new community-based intake services. However, a rise in 2011-12, with a reduction in investigations compared to the 2004-07 period, suggests neglect is frequently reported by mandated reporters despite these developments. In addition, further reporting of neglect may be explained by an increase in recent years in reports coded as 'other' and 'not stated'; the nature of these reports warrants further exploration.

Therefore, it appears that the current trends in reporting of neglect are producing a considerable demand on the system, at least in the demands produced by the making of notifications, intake of notifications, and treatment at agency level.

## 7. Other clear trends, by type of abuse and neglect

Several other trends emerge from the data on notifications by mandated reporters over time, by type of abuse and neglect, and by outcome (Fig 5).

Notifications surge in 2004-07, followed by decline in 2008-09, and a second rise in 2011-12.

A substantial increase in notifications of every maltreatment type occurred from 2004-07 (**Fig 5**). This increase, especially for emotional abuse, was likely associated with the March 2005 change in reporting legislation which introduced the duty to report exposure to family violence.

### **Emotional abuse**

Notifications of emotional abuse clearly account for the highest proportion of all notifications, likely due to EDV reports. The trend in reports demonstrates the overall pattern of a distinct surge in 2004-07, a decline, and a subsequent increase.

The great majority of notifications of emotional abuse are not investigated. From 2008, substantiation numbers have remained stable. Substantiation rates of investigated cases are high.

### **Physical abuse**

Notifications of physical abuse show a similar pattern to emotional abuse (surge; decline; increase), although in fewer numbers.

Investigation numbers have declined in recent years relative to notification numbers. Substantiation numbers are lower after 2007.

### **Sexual abuse**

In an unusual pattern, notifications of sexual abuse decline markedly from 2006, although an increase occurs from 2010. Both investigations and substantiations of sexual abuse vary over time.

### **Neglect**

Notifications of neglect are the second highest class of reports. Notifications decrease substantially from 2007 to 2009, but increase from 2010. Substantiation numbers are lower after 2007.

## **Notifications involving distinct children**

Summary data on the level of involvement of distinct children in notifications may also prove useful for government agencies. Over the nine year period, there were 98,987 notifications from all persons, involving 32,486 children.

Of all children in notifications, 47% were only reported once, and 18% were reported twice. Combined, 65% of all children who were the subject of a notification were reported once or twice. A group of 35% of children in notifications were reported three or more times.

Of all notifications, 28% related to children who were reported once or twice. 72% of all notifications concerned children who were reported three or more times. This suggests that a small but substantial minority of children may be subject to chronic maltreatment and may not be receiving sufficient service provision.

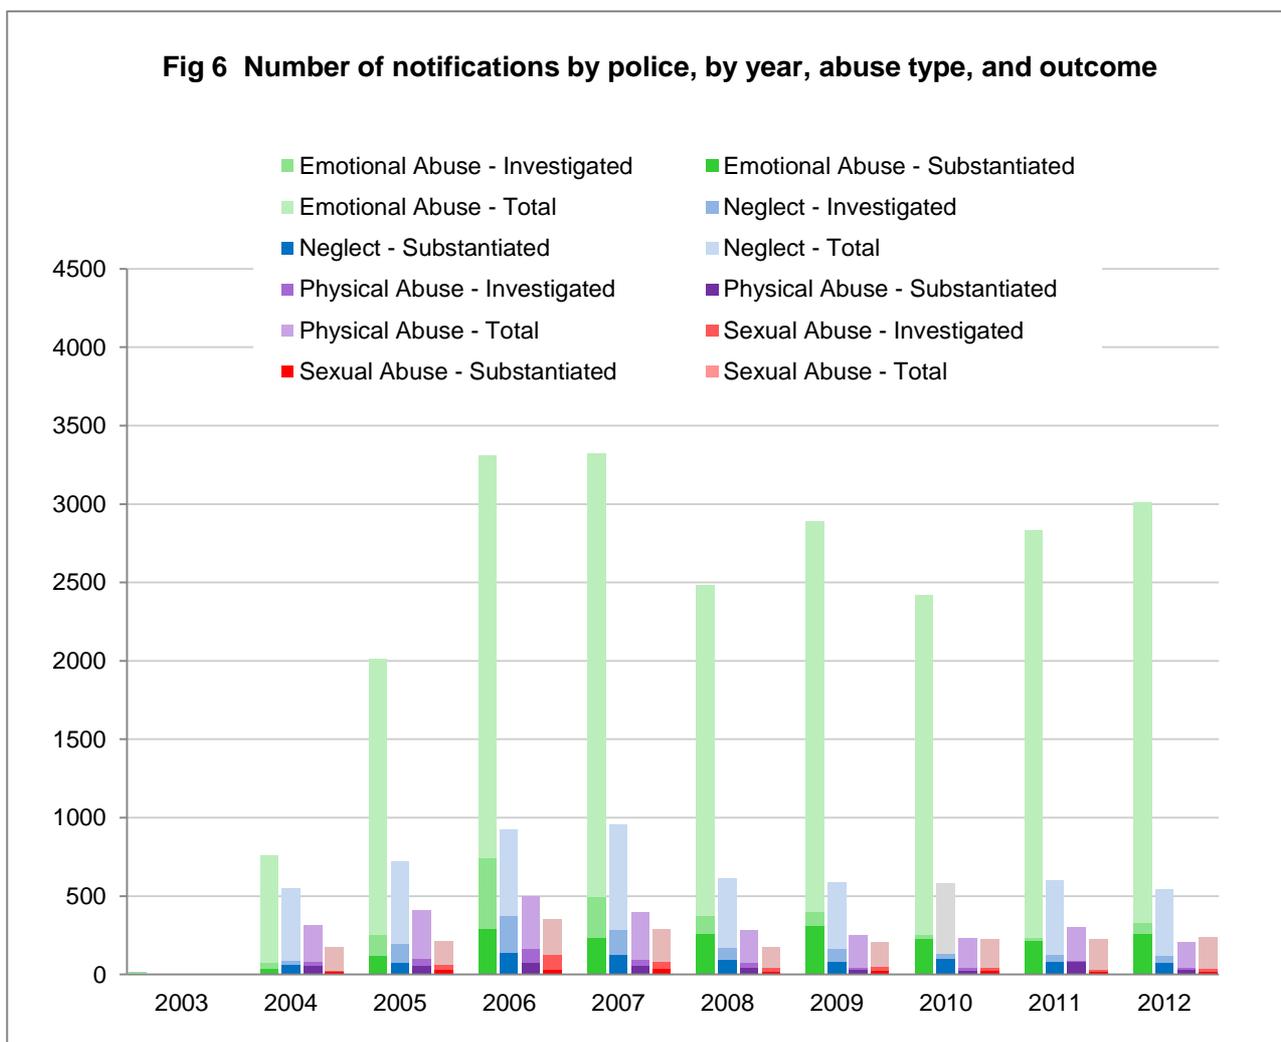

## Analysis of notifications by police reveals a number of key findings.

Police are the mandated reporter group which makes the most notifications. Several key findings emerge from an analysis of their reporting patterns (**Fig 6**).

An exponential increase in notifications of emotional abuse occurred in 2004-06 (758 to 3311). This was likely influenced by the new reporting law for family violence. Investigations and substantiations also increased, but a large majority of notifications were not investigated. Increases also occurred for the other maltreatment types, but not to the same extent.

A decline in notifications generally, but particularly for emotional abuse, occurred from 2008-10, suggesting police were referring more cases to differential response agencies (community-based intake services: CBIS), or adopting some other course of action.

From 2010-12, notifications of emotional abuse have again increased (2420 to 3012), while notifications for other types of abuse and neglect have remained stable. This suggests a shift from referral to CBIS but the explanation for this trend is unclear and merits further exploration.

The rate of investigations arising from notifications by police, even for sexual abuse and physical abuse, is quite low (mirroring the trend for notifications by all mandated reporters of these abuse types). There may be several factors influencing this, but one factor may be a need for more agency resources.

## **Conclusion**

This Executive Summary has identified some key findings from the more detailed analyses conducted in this research study. These findings can assist government agencies and reporter groups in identifying areas where reporting practice for different types of child abuse and neglect may be enhanced.

One finding is that non-mandated notifications account for a substantial minority of all notifications, especially for neglect. This indicates that while mandated reporting merits attention to enhance reporting practice and outcomes, attention may also be productively directed towards reporting by non-mandated reporters.

Reporting patterns clearly vary by abuse type, reporter group, and across periods of time, likely influenced by contextual factors including but not limited to the law.

In Tasmania, notifications of emotional abuse increased in a specific period, including many episodes of exposure of children to domestic violence, influenced by the new duty to report family violence. This produced the most significant change in reporting practice in the nine year period. Investigations increased in 2006-07 before declining substantially. However, substantiations increased in 2006-07 and have remained at this level.

Notifications of physical abuse and sexual abuse by mandated reporters have declined significantly since 2006, as have investigations and substantiations. These are unusual and notable trends warranting further exploration.

Some other findings suggest further areas of concern and potential improvement.

It appears that the introduction of community based intake services as a formal differential response mechanism for referral of situations of welfare need has not yet produced the anticipated outcome. In particular, the reporting of neglect and emotional abuse has recently increased again, with emotional abuse reporting by police being prominent.

Identification of these and other trends indicate dimensions of reporting practice and systemic functioning which are most in need of attention, the level of resourcing needed by the child protection system, and the level of societal need for assistance.

# **Stage 1: Legal Analysis**

## STAGE 1: LEGAL ANALYSIS

---

### 1.1. Introduction

As part of the effort to protect children from significant abuse and neglect, each State and Territory in Australia has enacted legislation commonly known as ‘mandatory reporting laws’. The laws differ in scope and have changed over time. Accordingly, the main aim of this Stage 1 Report is to review and explain the legislative principles across Australia and to chart changes in the decade from 1 January 2003 – 31 December 2012. In doing so, the Report will identify differences between State and Territory law over this time period.

#### 1.1.1. General nature and effect of mandatory reporting laws

Mandatory reporting laws are laws passed by Parliament requiring designated persons to report certain kinds of child abuse and neglect<sup>1</sup> to government authorities. The core principle motivating these laws is that many cases of severe child abuse and neglect occur in private, cause substantial harm to extremely vulnerable children, and are unlikely to be brought to the attention of helping agencies. Governments have chosen, as a social policy and public health measure, to enact these laws to draw on the capacity of professionals who typically deal with children in the course of their work (such as teachers, police, doctors and nurses), and who encounter cases of serious child abuse and neglect, to report these situations to helping agencies. Generally, the primary aim is to protect the child from significant harm. The secondary aim is to assist the child’s parents or caregivers to decrease the likelihood of recurrence.<sup>2</sup>

---

<sup>1</sup> Or the harm caused by them: see further Part 2.1.2 and Table 1.7.

<sup>2</sup> In Stage 3 of this study, we will explore normative arguments about these laws, which either in whole or in part have been both criticized (see for example, Ainsworth, 2002; Ainsworth & Hansen 2005; Melton 2005), and defended (Besharov 2005; Drake & Jonson-Reid, 2007; Finkelhor, 1990, 2005; Mathews & Bross, 2008). Recent Australian State government child protection inquiries in New South Wales and Victoria have concluded that mandatory reporting laws are a necessary component of child protection systems (Wood 2008; Cummins, Scott, & Scales 2012). In 2013, the Carmody Inquiry in Queensland also made recommendations to harmonise and refine reporting laws and to improve reporter education, and to increase a differential response approach, but did not recommend abolishing them (Carmody 2013).

Consequently, there are differences across Australian jurisdictions concerning who has to report, and what types of maltreatment must be reported. Before pointing out these differences in the legislative duties, a common approach to the legislative scheme can be identified. The laws will:

- define which persons must make reports;
- identify what state of mind a reporter must have before the reporting duty is activated;
- define the types of abuse and neglect that must be reported;
- define the extent of abuse or neglect which requires a report;
- state whether the duty applies only to past or present abuse, or also to future abuse which has not occurred yet but which is thought likely to occur;
- state penalties for failure to report (to encourage reporting rather than police it);
- provide a reporter with confidentiality regarding their identity;
- provide a reporter with immunity from liability arising from a report made in good faith;
- state when the report must be made;
- state to whom the report must be made;
- state what details a report should contain;
- enable any other person to make a report in good faith, even if not required to do so, and grant confidentiality and legal immunity to these persons.<sup>3</sup>

## **1.2. Major legislative differences and common approaches across Australia**

This section provides a brief summary of major legislative differences and common approaches in Australian State and Territory laws.

### **1.2.1. Different reporter groups**

---

<sup>3</sup> Legislation in all jurisdictions enables non-mandated reporters to make reports, and confers these protections on such reporters. In several jurisdictions, including Victoria, legislative provisions for voluntary reporting pre-date mandatory reporting schemes (see eg *Children and Young Persons Act 1989* s 64, and provisions prior to this). Stage 3 will further discuss the context for some jurisdictions' movement from an approach based only on voluntary reporting to one having a form of mandatory reporting; one impetus was the perceived lack of reports from a purely voluntary system compared with one having mandatory reporting: see Hansard, Victoria, Queensland, and the studies cited in Victoria.

To begin with, there are differences in who is required to report. Normally, the reporting duty is applied to a minimum of four occupations who regularly work with children: police, teachers, doctors and nurses. However, even this general approach is not present in every Australian State and Territory. There are numerous different approaches. At one end of the spectrum, the Northern Territory makes all citizens mandated reporters. Close to this end of the spectrum is New South Wales, South Australia and Tasmania, which mandate a large range of occupations. Closer to the other end of the spectrum is Queensland, which mandates only two professions completely.<sup>4</sup> A summary is set out in **Table 1.1**.

### **1.2.2. Different types of abuse and neglect must be reported**

Another major difference is in which types of abuse and neglect (or the harm caused by them: see **Table 1.7**)<sup>5</sup> must be reported. For example, most but not all States and Territories clearly require reports of significant neglect. In contrast, Western Australia and the ACT clearly do not require reports of even life-threatening neglect, and it is arguable that Victoria also does not require reports of these situations.<sup>6</sup> Some jurisdictions, such as New South Wales and Tasmania, have relatively recently imposed a requirement to report exposure of a child to domestic violence. This might be expected to produce a high number of additional reports which would not otherwise be made. A summary is set out in **Table 1.2**.

### **1.2.3. Different extent of harm activates the reporting duty**

There are differences in the extent of suspected harm which activates the reporting duty. Especially for physical abuse, psychological abuse, and neglect, the laws are generally not intended to require reports of

---

<sup>4</sup> In this regard, it can be noted that the federal *Family Law Act 1975* (Cth) also imposes a reporting duty on members of Court personnel.

<sup>5</sup> As Table 1.7 illustrates, the primary subject matter of the reporting provisions is ‘abuse’ either explicitly, or as a natural and co-existing consequence of being the cause of the significant or serious ‘injury’ or ‘harm’ specified. The two are inextricably linked, and the co-existing causal relationship and link is often acknowledged directly in the provisions by the use of the term ‘caused by’ (see the underlined words in Table 1.7). There are some instances where a type of abuse must be reported without any mention of harm – most often, for sexual abuse (eg ACT, NT, SA, Tas, WA), and for physical injury by abuse (ACT). In five statutes the first concept used is ‘abuse’, with preceding words or provisions relating to the abuse causing harm, and the extent of this harm required to activate the reporting duty (ACT, Qld, SA, Tas, WA). In four statutes the first concept used is ‘harm’, with preceding words or provisions identifying or recognising that this ‘harm’ is caused by various kinds of abuse and neglect (NSW, NT, Qld, Vic).

<sup>6</sup> For further discussion of neglect and the complex issue of the scope of Victoria’s reporting provisions, see Part 1.5.7.4.

any and all behaviour perceived to be abusive or neglectful. Accidental injuries and trivial incidents of less than ideal parenting practice are not the intended object of the laws. Rather, the laws are concerned with acts and omissions that are significantly harmful to the child's health, safety, wellbeing or development. The legislation differs in how these concepts are expressed, but generally uses indeterminate concepts such as 'significant harm' or 'detriment' which beg the question of what constitutes these injuries. Except for cases that are clearly very serious, this ambiguity may cause confusion and uncertainty for reporters. For psychological abuse and neglect, especially, this indeterminacy may be particularly problematic. These different concepts and standards are set out in **Table 1.3**.

#### **1.2.4. Different states of mind activate the reporting duty**

There are also differences in the state of mind that a reporter must have before the duty is activated. Duties are never so strictly limited that it only applies to cases where the person is certain that the child is being abused or neglected; but nor are they so wide as to apply to cases where a person may have the merest inkling that abuse or neglect may have occurred. While this is a reasonable approach, there are differences between the jurisdictions in how this state of mind is expressed, which may cause confusion for reporters. The legislation variously uses the concept of 'belief on reasonable grounds' (four jurisdictions), and 'suspects on reasonable grounds' (four jurisdictions). Technically, belief requires a higher level of certainty than suspicion. These differences in reporters' states of mind are set out in **Table 1.3**.

While discussed in more detail later in this Report, it can also be noted here that Victoria is the only jurisdiction which has as part of its mandatory reporting provision a clause which further limits the duty to cases in which the reporter not only has a reasonable belief about the child's harm/abuse, but that the reporter must also have a reasonable belief that the child's parent has not protected the child from the abuse (or in the case of a report of a child who is likely to suffer significant harm, the child does not have a parent who is likely to protect the child from that harm).

#### **1.2.5. Different temporal/situational scope of the reporting duty**

As well, there are differences in whether the reporting duty is applied to past or currently occurring abuse only, or also to perceived risk of future abuse to a child who is not suspected to have been abused yet. In all jurisdictions, the reporting duty applies to cases of suspected past abuse and of suspected abuse that is currently occurring. However, four jurisdictions (New South Wales, Queensland, Victoria and the Northern Territory) extend the duty to cases where the reporter has a reasonable suspicion that a child is at risk of being abused in future, no matter who the suspected future perpetrator may be. South Australia and Tasmania require reports of suspicions that a child is likely to be abused in future, but only if the suspected future perpetrator is a person who lives with the child. In contrast, the Australian Capital Territory and Western Australia limit the duty to cases of past or current abuse. Australian jurisdictions generally have a

strong approach to preventing future abuse, as well as responding to abuse thought to have already occurred. These different approaches are set out in **Table 1.4**.

### **1.2.6. Different definition of ‘child’ to whom the reporting duty is owed**

The general approach across States and Territories is to apply the reporting duty to suspected abuse and neglect of children under 18, which is the age of majority for most legal purposes. However, there are three differences which should be noted. Most significantly, New South Wales restricts the duty to abuse and neglect of children aged under 16 years, and Victoria restricts the duty to abuse of children under 17. This makes these two States the only jurisdictions in Australia to exclude children aged 16 and 17 (in NSW) and children aged 17 (in Victoria) from the benefit of the reporting provisions. Of less significance, but still of interest, is that Queensland’s prior duty under the health legislation (applying the duty to doctors) restricted the duty to children under 17; this was amended in 2005 to include 17 year olds under the reporting framework. These different provisions, and their changes over the decade, are set out in **Table 1.5**.

### **1.2.7. Different penalties**

Penalties for noncompliance are present in seven of the eight jurisdictions. New South Wales originally provided a penalty, but this was omitted after the Wood Inquiry recommendations and legislation in 2009. It is significant that the penalties across jurisdictions differ substantially. These differences may be important as without effective reporter training, severe penalties might influence hypersensitive or ‘defensive’ reporting of minor incidents not intended to be covered by the law. This is despite the fact that it is generally perceived that the penalties are meant to encourage reporting rather than to police it. These different penalties are set out in **Table 1.6**.

### **1.2.8. Common approaches**

Other dimensions of the reporting duty are more consistent. Across jurisdictions, the duty is obligatory, rather than discretionary (words such as ‘must’, are used rather than ‘may’). It must be complied with immediately. The report destination is usually the jurisdiction’s department of child protection. Confidentiality and immunity are universal features, both for mandated reporters (those required by the law to report), and for non-mandated reporters (those not required to report, but enabled to do so, such as neighbours, family, and friends).

## **1.3. Mandatory reporting legislation as one element of a systematic approach to child protection and welfare: A note on differential response**

### **1.3.1. Mandatory reporting laws' focus on serious cases more likely to require child protection and services.**

Mandatory reporting laws are part of a system of responses to child protection and family welfare concerns. The different components of this system are necessary owing to the differences between types of maltreatment recognising that within the spectrum of circumstances, different responses are appropriate. A case of severe battering of a six month old infant, or of sexual abuse of a three year old, requires different responses than a case of mild neglect of a 14 year old arising only from conditions of poverty in an otherwise healthy and well-functioning family. Different responses cater to the needs of children, families, communities, and child protection systems. There is nothing to be gained from the inappropriate use of mandatory reporting laws for cases which are not their primary object; an analogy might be the inappropriate use of an ambulance to deal with a minor health complaint. It is important to avoid overburdening child protection systems wherever possible.

### **1.3.2. Differential response systems' focus on less serious cases requiring services and assistance**

Some jurisdictions have formalised these different responses – commonly called 'differential response' – to a greater extent than others. As previously noted, the aim is not to apply mandatory reporting laws to any and all cases of 'abuse' and 'neglect', but to limit those laws to severe cases, and to enable referral to and deployment of supportive community agencies to situations of less severe problems. This applies especially in situations of neglect and domestic violence. Distinguishing between more serious cases of abuse and neglect, and less serious ones can be difficult, but this is what differential response aims to achieve. At one end of the differential response continuum, in cases of serious abuse and neglect statutory responses such as child protection orders can be made. At the other end of the continuum, ideally, are supports such as assistance with housing, finance, employment, substance abuse, alcohol dependency, mental health conditions, domestic violence respite care, and parenting skills. Cases of serious abuse and neglect may require a blend of both statutory intervention and support to the family.

Examples include Victoria's Child and Family Information, Referral and Support Teams (ChildFIRST) system, which enables individuals who have a significant concern about a child's wellbeing to refer their concern to ChildFIRST for help, rather than reporting to the department responsible for child protection.<sup>7</sup> This

---

<sup>7</sup> The *Children, Youth and Families Act 2005* (Vic) s 31 states that 'A person who has a significant concern for the wellbeing of a child may refer the matter to a community-based child and family service'.

provision complements the mandatory reporting provisions, where reports of specified cases of a child being 'in need of protection' must be made to the Secretary of the Department.<sup>8</sup> Children and families who are referred to ChildFIRST are assessed and may be offered home-based family support or referred to other health and welfare services.<sup>9</sup> ChildFIRST must forward reports to child protection services if the community-based child and family service considers that the situation may involve more significant harm or risk of harm; that is, that the child may be 'in need of protection' (Government of Victoria, 2006).<sup>10</sup> Equally, reports made to child protective services may be redirected to ChildFIRST if deemed not to require a child protection response (Government of Victoria, 2006).<sup>11</sup>

The ChildFIRST model was adopted in Tasmania under the name 'Gateways'. Tasmania also amended its mandatory reporting laws to facilitate a preventative approach. Mandatory reporters could report their concerns about the care of a child to a 'Community-Based Intake Service', and this would fulfil their reporting duty (Children, Young Persons and Their Families Act 1997 Part 5B). In New South Wales, to renew an emphasis on limiting mandatory reporting to cases of significant harm, the Keep Them Safe: Annual Report 2010-11 set out the new system requiring mandated reporters to report to the department only cases of suspected significant harm. Section 27A of the Children and Young Persons (Care and Protection) Act 1998 (NSW) then enabled mandated reporters to make reports to 'Child Wellbeing Units' which were established in the four major State government departmental groups (health, education, police, and family and community services). These units provide support and advice to mandated reporters on whether a situation warrants a mandated report and on local services which might be of assistance (NSW Department of Premier and Cabinet, 2011). The units' focus is on ascertaining what the family needs to minimise or overcome their present situation and on facilitating the most appropriate assistance.

These developments will be tracked in the historical research below and effects anticipated on mandated reports.

## 1.4. Comparative tables

---

<sup>8</sup> See Part 3.7. The *Children, Youth and Families Act 2005* (Vic) s 184 states that a mandatory reporter who forms the belief on reasonable grounds that a child is in need of protection on a ground referred to in s 162(1)(c) or (d) 'must report to the Secretary'.

<sup>9</sup> *Children, Youth and Families Act 2005* (Vic) s 33.

<sup>10</sup> *Children, Youth and Families Act 2005* (Vic) s 33(2).

<sup>11</sup> *Children, Youth and Families Act 2005* (Vic) ss 187, 30.

This section displays seven comparative tables relevant to State and Territory reporting provisions detailed in the previous sections (section 1.1 to section 1.3). The tables are:

- Table 1.1 Reporter groups
- Table 1.2 Types of abuse and neglect that must be reported
- Table 1.3 Key features of legislative reporting duties
- Table 1.4 Legislation containing reporting duties and key provisions
- Table 1.5 Legislative definition of ‘child’ for the purpose of reporting duties
- Table 1.6 Maximum penalties, and penalty units
- Table 1.7 What must be reported – types of abuse and neglect, abuse vs harm, and the extent of harm

### **Important note**

These comparative tables show the law at 31 December 2012. The treatment in Stage 1 of developments in each State and Territory charts the changes to each jurisdiction’s laws over the period 2003-12.

In 2014, the *Child Protection Reform Amendment Act 2014* (Qld) was passed, which will make substantial changes to Queensland’s mandatory reporting legislation. These changes will shift Queensland’s position towards the current position in Victoria. The changes will broaden some mandatory reporting duties, but will narrow others. The changes also will introduce a more formal statutory footing for differential response pathways.

These pending changes in Queensland are the most significant legislative amendments made in any jurisdiction to mandatory reporting legislation in the period after the 2003-12 time period which defined the scope of this research project.

**Table 1.1: Reporter groups: Australian States and Territories**

Jurisdiction	Teachers	Police	Nurses	Doctors	Others
ACT	Yes	Yes	Yes	Yes	Dentists, midwives, home education inspectors, school counsellors, childcare centre carers, home-based care officers, public servants working in services related to families and children, the public advocate, the official visitor, paid teacher's assistants/aides, paid childcare assistants/aides
NSW	Yes	Yes	Yes	Yes	A person who, in the course of his or her professional work or other paid employment delivers health care, welfare, education, children's services, residential services, or law enforcement, wholly or partly, to children (and managers in organisations providing such services)
NT	Yes	Yes	Yes	Yes	All persons
QLD	Yes	No	Yes	Yes	Nil
SA	Yes	Yes	Yes	Yes	Pharmacists, dentists, psychologists, community corrections officers, social workers, religious ministers, employees and volunteers in religious organisations, teachers in educational institutions; family day care providers; employees and volunteers in organisations providing health, education, welfare, sporting or recreational services to children; managers in relevant organisations
TAS	Yes	Yes	Yes	Yes	Midwives, dentists, psychologists, probation officers, principals and teachers in any educational institution, child care providers, employees and volunteers in government funded agencies providing health, welfare or education services to children
VIC	Yes	Yes	Yes	Yes	Midwives, school principals
WA	Yes	Yes	Yes	Yes	Midwives
Cth	No	No	No	No	Registrar or a Deputy Registrar of a Registry of the Family Court of Australia, or of the Family Court of Western Australia; a Registrar of the Federal Magistrates Court; or family consultants; family counsellors; family dispute resolution practitioners; arbitrators; lawyers independently representing a child's interests

**Table 1.2: Types of abuse and neglect that must be reported: Australian States and Territories**

Jurisdiction	Physical abuse	Sexual abuse	Psychological / emotional abuse	Neglect	Exposure to domestic violence
ACT	Yes	Yes	No	No	No
NSW	Yes	Yes	Yes	Yes	Yes
NT	Yes	Yes	Yes	Yes	Yes
QLD	Yes	Yes	Yes	Yes	No
SA	Yes	Yes	Yes	Yes	No
TAS	Yes	Yes	Yes	Yes	Yes
VIC	Yes	Yes	No	No	No
WA	No	Yes	No	No	No
Cth	Yes	Yes	Yes	Yes	Yes

**Table 1.3: Key features of legislative reporting duties: Australian States and Territories**

Jurisdiction	State of mind	Extent of harm	Past and present only / both past and present, and future
ACT	Belief on reasonable grounds	Not specified: 'sexual abuse...or non-accidental physical injury'	Past and present only
NSW	Suspects on reasonable grounds that a child is at risk of significant harm	A child or young person 'is at risk of significant harm if current concerns exist for the safety, welfare or well-being of the child or young person because of the presence, to a significant extent, of... basic physical or psychological needs are not being met...physical or sexual abuse or ill-treatment... serious psychological harm'	Both
NT	Belief on reasonable grounds	Any significant detrimental effect caused by any act, omission or circumstance on the physical, psychological or emotional wellbeing or development of the child	Both
QLD	Becomes aware, or reasonably suspects	Significant detrimental effect on the child's physical, psychological or emotional wellbeing	Both
SA	Suspects on reasonable grounds	Any sexual abuse; physical or psychological abuse or neglect to extent that to the extent that the child 'has suffered, or is likely to suffer, physical or psychological injury detrimental to the child's wellbeing; or the child's physical or psychological development is in jeopardy'	Past and present only <sup>12</sup>
TAS	Believes, or suspects, on reasonable grounds, or knows	Any sexual abuse; physical or emotional injury or other abuse, or neglect, to extent that the child has suffered, or is likely to suffer, physical or psychological harm detrimental to the child's wellbeing; or the child's physical or psychological development is in jeopardy	Past and present only <sup>13</sup>
VIC	Belief on reasonable grounds	Child has suffered, or is likely to suffer, significant harm as a result	Both

<sup>12</sup> Also if 'a person with whom the child resides (whether a guardian of the child or not)—

(i) has threatened to kill or injure the child and there is a reasonable likelihood of the threat being carried out; or

(ii) has killed, abused or neglected some other child or children and there is a reasonable likelihood of the child in question being killed, abused or neglected by that person'

<sup>13</sup> Also if there is 'a reasonable likelihood of a child being killed or abused or neglected by a person with whom the child resides'.

Jurisdiction	State of mind	Extent of harm	Past and present only / both past and present, and future
	(both regarding the child's injury or abuse, <i>and</i> the presence of a protective parent)	of physical injury or sexual abuse and the child's parents have not protected, or are unlikely to protect, the child from harm of that type	
WA	Belief on reasonable grounds	Not specified: any sexual abuse	Past and present only
Cth	Suspects on reasonable grounds	Not specified: any assault or sexual assault; serious psychological harm; serious neglect	Both

**Table 1.4: Legislation containing reporting duties and key provisions: Australian States and Territories\***

Jurisdiction	Legislation
ACT	Children and Young People Act 2008 (ACT) s 356
NSW	Children and Young Persons (Care and Protection) Act 1998 (NSW) ss 23, 27
NT	Care and Protection of Children Act (NT) ss 15, 16, 26
QLD	Public Health Act 2005 (Qld) ss 158, 191; Education (General Provisions) Act 2006 (Qld) ss 364-366A; Child Protection Act 1999 (Qld) ss 22, 186
SA	Children’s Protection Act 1993 (SA) ss 6, 10, 11
TAS	Children, Young Persons and Their Families Act 1997 (Tas) ss 3, 4, 14
VIC	Children, Youth and Families Act 2005 (Vic) ss 162, 182, 184
WA	Children and Community Services Act 2004 (WA) ss 124A-H
Commonwealth	Family Law Act 1975 (Cth) ss 4, 67ZA

\* Note: many jurisdictions also impose other obligations to make notifications of harm occurring to children while in their care, or in departmental care. Examples are obligations on licensees (and other responsible officers) of departmental and licensed care services (see for example *Child Protection Act 1999* (Qld) s 148), and licensees of child care services (see for example *Child Care Services (Child Care) Regulations 2006* (WA) r 20). Because these obligations are somewhat different in provenance, purpose and operation to the mandatory reporting duties enacted in legislation, we have not treated these obligations as a ‘true’ mandatory reporting duty for the purpose of this research project.

**Table 1.5: Legislative definition of ‘child’ for the purpose of the reporting duties: Australian States and Territories**

Jurisdiction	Current Legislation	Former provisions	Children to whom the provisions apply
ACT	Children and Young People Act 2008 (ACT) s 11: a ‘child’ is a person under 12 years old; s 12: a ‘young person’ is a person of 12 years or older, but not yet an adult.	Both CYPA 1999 at 1 January 2003; and CYPA immediately before CYPA 2008 as made, defined ‘child’ in s 7 and ‘young person’ in s 8 in the same way as the 2008 legislation.	Children under age 18
NSW	Children and Young Persons (Care and Protection) Act 1998 (NSW) s 3: ‘child’ is a person who is under the age of 16 years; ‘young person’ is a person who is aged 16 or above but who is under the age of 18 years; but the duty to report in s 27 applies only where a person ‘has reasonable grounds to suspect that a <i>child</i> is at risk of harm’ (our emphasis)	Children and Young Persons (Care and Protection) Act 1998 (NSW) s 3: ‘child’ is a person who is under the age of 16 years; ‘young person’ is a person who is aged 16 or above but who is under the age of 18 years	Children under age 16
NT	Care and Protection of Children Act (NT) s 13: ‘child’ is a person who is under the age of 18 years	Community Welfare Act s 4: ‘child’ is a person who has not attained the age of 18 years	Children under age 18
QLD	Public Health Act 2005 (Qld) Sch 2: ‘child’ means an individual under 18 years; Education (General Provisions) Act 2006 (Qld) ss 364-366A apply to students under 18; Child Protection Act 1999 (Qld) s 8: a child is an individual under 18 years.	Health Act 1937 s 76M at 1 January 2003 defined ‘child’ as a person under the age of 17 years; this was changed so the duty applied to children under 18 years via s 76K, comm 31 August 2005; Education (General Provisions) Act 1989 (Qld) ss 146A-B apply to students under 18 Child Protection Act 1999 (Qld) s 8: a child is an individual under 18 years.	Children under age 18
SA	Children’s Protection Act 1993 (SA) s 6(1): a ‘child’ is a person under 18 years of age	Children’s Protection Act 1993 (SA) s 6(1) at 1 January 2003: a ‘child’ is a person under 18 years of age	Children under age 18
TAS	Children, Young Persons and Their Families Act 1997 (Tas) s 3(1): a ‘child’ is a person under 18 years of age	Children, Young Persons and Their Families Act 1997 (Tas) s 3(1): a ‘child’ is a person under 18 years of age	Children under age 18
VIC	Children, Youth and Families Act 2005 (Vic) s 3(1): ‘child’ means a person who is under the age of 17 years	Children and Young Persons Act 1989 (Vic) s 3(1): ‘child’ means a person who is under the age of 17 years	Children under age 17
WA	Children and Community Services Act 2004 (WA) s 3: a ‘child’ is a person under 18 years of age	Children and Community Services Act 2004 (WA) s 3: a ‘child’ is a person under 18 years of age	Children under age 18

**Table 1.6: Maximum penalties, and penalty units: Australian States and Territories**

Jurisdiction	Child protection legislation at 1/1/2003	Penalty unit at 1/1/2003	Changes over time
ACT	<i>Children and Young People Act 1999</i> (ACT) s 159(2) (maximum penalty of <b>50 penalty units (\$5000), 6 months' imprisonment, or both</b> ).	\$100 (see note in CYP Act)	Legislation Act s 133: \$110 (am by Legislation (Penalty Units) Amendment Act 2009 No 35) comm 21 Oct 2009) so from 21 Oct 2009 to 31 Dec 2012 penalty was 50 penalty units (\$5500), 6 months' imprisonment, or both. (Note: penalty unit now \$140 since 23 August 2013, am by Legislation (Penalty Units) Amendment Act 2013)
NSW	<i>Children and Young Persons (Care and Protection) Act 1998</i> s 27(2) (maximum penalty of 200 penalty units, hence <b>\$22,000</b> )	A penalty unit was \$110: <i>Crimes (Sentencing Procedure) Act 1999</i> s 17	NSW penalty unit remains \$110 but now no penalty as the penalty was removed from s 27 by the Children Legislation Amendment (Wood Inquiry Recommendations) Act 2009 No 13, Schedule 1.1 [7], comm 24 January 2010
NT	<i>Community Welfare Act 1983</i> (NT) s 14(1) (maximum penalty of 200 penalty units, hence <b>\$22,000</b> )	A penalty unit was \$110: <i>Penalty Units Act</i> (NT) s 3(1)	The maximum penalty remains 200 penalty units. The <i>Penalty Units Act</i> s 3 sets the value of a penalty unit as \$130, so the maximum penalty is \$26,000. (Note: <i>Community Welfare Amendment Act 2002</i> (Act No. 61; comm 9 December 2002) s 10 increased the maximum penalty from \$500 to 200 penalty units.
QLD	<i>Health Act 1937</i> (Qld) s 76KE (maximum penalty of 50 penalty units, hence <b>\$3750</b> )	A penalty unit was \$75: <i>Penalties and Sentences Act 1992</i> (Qld) s 5(1)(b))	The penalty unit value has changed from 2003-2012 as follows: from 27 Nov 2000: s 5(1)(b): \$75 (1999 No 70 s 166 sch 1); from 1 January 2009: s 5(1)(c): \$100 (2008 No 66 s 3(2)); renumb as s 5(1)(d) by 2011 No 18 s 403; from 21 August 2012: s 5(1)(d): \$110 (2012 No 17 s 34). PHA: 50 penalty units (\$5500); EGPA: 20 pen. units (\$2200)
SA	<i>Children's Protection Act 1993</i> (SA) s 11(1) (maximum penalty of <b>\$2500</b> )	na	Increased to \$10,000 by the <i>Children's Protection (Miscellaneous) Amendment Act 2005</i> (SA) (No 76) s 10(1) (comm 31/12/2006).
TAS	<i>Children, Young Persons and Their Families Act 1997</i> (Tas) s 14(2)(b) (maximum penalty of 20 penalty units, hence <b>\$2000</b> )	A penalty unit was \$100: <i>Penalty Units and Other Penalties Act 1987</i> (Tas) s 4)	Increased to \$2400 as penalty unit increased to \$120 (comm 24 October 2007 – am by Act 37 of 2007)
VIC	<i>Children and Young Persons Act 1989</i> (Vic) s 64(1A) (maximum penalty of 10 penalty units, hence <b>\$1000</b> )	A penalty unit was \$100: <i>Sentencing Act 1991</i> (Vic) s 110;	<i>Children, Youth and Families Act 2005</i> (Vic), s 184(1) maximum penalty is 10 penalty units. Through <i>Sentencing Act 1991</i> (Vic), s 110 and <i>Monetary Units Act 2004</i> (No 10 of 2004), the value of a penalty provision can be indexed and amended. Under the MUA 2004 s 11(1)(b) a penalty unit for the 2012/13 financial year was \$140.84. So, the maximum penalty since 1 July 2012 has been \$1408.
WA	None	Not applicable	From 1 January 2009: \$6000.

**Table 1.7: What must be reported – types of abuse and neglect, abuse vs harm, and the extent of harm: Australian States and Territories**

	Legislative reporting provisions - what must be reported - types of abuse and neglect – extent of harm	Abuse / harm; significant harm
ACT	<p><i>Children and Young People Act 2008</i> (ACT)</p> <p>Section 356(1)(c) If the mandated reporter 'believes on reasonable grounds that a child or young person <b>has experienced, or is experiencing</b> -</p> <ul style="list-style-type: none"> <li>i. <b>sexual abuse</b>; or</li> <li>ii. <b>non-accidental physical injury</b>; and</li> </ul> <p>the person's reasons for the belief arise from information obtained by the person during the course of, or because of, the person's work</p>	<p><i>Focus is 'abuse' explicitly for sexual abuse, and 'injury' as a consequence of abuse <u>causing</u> physical injury</i></p> <p>Sexual abuse (any) Non-accidental physical injury (any; no mention of significance)</p>
NSW	<p><i>Children and Young Persons (Care and Protection) Act 1998</i> (NSW)</p> <p>Section 27: If the mandated reporter 'has <b>reasonable grounds to suspect that a child is at risk of significant harm</b>; and those grounds arise during the course of or from the person's work'</p> <p>Section 23(1): A child 'is <b>at risk of significant harm</b> if <u>current concerns exist for the safety, welfare or well-being of the child because of the presence, <b>to a significant extent</b>, of any one or more of the following circumstances:</u></p> <ul style="list-style-type: none"> <li>(a) the child's or young person's <b>basic physical or psychological needs</b> are not being met or are at risk of not being met,</li> <li>(b) the parents or other caregivers have not arranged <b>and</b> are unable or unwilling to arrange for the child or young person to receive necessary <b>medical care</b>,</li> <li>(b1) in the case of a child or young person who is required to <b>attend school</b> in accordance with the Education Act 1990—the parents or other caregivers have not arranged <b>and</b> are unable or unwilling to arrange for the child or young person to receive an education in accordance with that Act,</li> <li>(c) the child or young person has been, or is at risk of being, <b>physically or sexually abused</b> or ill-treated,</li> <li>(d) the child or young person is living in a household where there have been incidents of <b>domestic violence</b> and, <u>as a consequence</u>, the child or young person is at risk of serious physical or psychological harm,</li> <li>(e) a <b>parent or other caregiver has behaved in such a way</b> towards the child or young person that the child or <u>young person has suffered</u> or is at risk of suffering <b>serious psychological harm</b>,</li> <li>(f) the child was the subject of a pre-natal report under section 25 and the birth mother of the child did not engage successfully with support services to eliminate, or minimise to the lowest level reasonably practical, the risk factors that gave rise to the report.'</li> </ul>	<p><i>Focus is 'risk of significant harm' with subsequent provisions focusing on the abuse <u>causing</u> the 'harm' specified</i></p> <p>Neglect (a), (b), (b1) Physical abuse (c) Sexual abuse (c) Exposure to domestic violence + risk of serious physical or psychological harm (d) Psychological/other abuse + serious psychological harm (e)</p> <p>Focus on 'significant harm' (but complex, convoluted drafting)</p>

	Legislative reporting provisions - what must be reported - types of abuse and neglect – extent of harm	Abuse / harm; significant harm
NT	<p><i>Care and Protection of Children Act 2007 (NT)</i></p> <p>Section 26(1): A person is guilty of an offence if the person (a) ‘believes, on reasonable grounds, any of the following:</p> <ul style="list-style-type: none"> <li>i. a child has suffered or is likely to suffer <b>harm</b> or <b>exploitation</b>;</li> <li>ii. a child aged less than 14 years has been or is likely to be a victim of a sexual offence;</li> <li>iii. a child has been or is likely to be a victim of an offence against section 128 of the Criminal Code’ and does not report it.</li> </ul> <p>Section 26(2): A person is guilty of an offence if the person (a) is a health practitioner or someone prescribed by regulation; and (b) ‘believes, on reasonable grounds,</p> <ul style="list-style-type: none"> <li>i. that a child aged at least 14 years (but less than 16 years) has been or is likely to be a victim of a <b>sexual offence</b>; and</li> <li>ii. that the difference in age between the child and alleged sexual offender is more than 2 years;</li> </ul> <p>and does not report it.</p> <p>Section 15(1): <b>Harm</b> to a child is any <b>significant detrimental effect</b> caused by any act, omission or circumstance on:</p> <ul style="list-style-type: none"> <li>(a) the physical, psychological or emotional wellbeing of the child; or</li> <li>(b) the physical, psychological or emotional development of the child.</li> </ul> <p>Section 15(2): Without limiting subsection (1), harm can be <u>caused by</u> the following:</p> <ul style="list-style-type: none"> <li>(a) <b>physical, psychological or emotional abuse</b> or neglect of the child;</li> <li>(b) <b>sexual abuse or other exploitation</b> of the child;</li> <li>(c) <b>exposure of the child to physical violence</b>.</li> </ul> <p><i>Example: A child witnessing violence between the child's parents at home</i></p> <p>Section 16(1): <b>Exploitation</b> of a child includes sexual and any other forms of exploitation of the child. Section 16(2): Without limiting subsection (1), sexual exploitation of a child includes: (a) sexual abuse of the child; and (b) involving the child as a participant or spectator in any of the following: (i) an act of a sexual nature; (ii) prostitution; (iii) a pornographic performance.</p>	<p><i>Focus is on the child suffering ‘harm’ as a consequence of abuse <u>causing</u> the ‘harm’ specified</i></p> <p><i>For sexual abuse, the focus is also explicitly on the child being a victim of ‘exploitation’, which is akin to ‘abuse’</i></p> <p>Physical abuse Sexual abuse Emotional abuse Neglect Exposure to physical violence (e.g., a child witnessing violence between parents at home)</p> <p>Focus on significant harm via ‘significant detrimental effect’ concept</p>

	Legislative reporting provisions - what must be reported - types of abuse and neglect – extent of harm	Abuse / harm; significant harm
QLD	<p><i>Public Health Act 2005</i> (Qld) Section <b>191</b>: A mandated reporter must report ‘<b>the harm or likely harm</b>’ if they ‘become aware, or reasonably suspect, during the practice of his or her profession, that a child has been, is being, or is likely to be, harmed’</p> <p>Section <b>158</b>: <b>Harm</b> means ‘any <b>detrimental effect</b> on the child’s physical, psychological or emotional wellbeing— (a) that is of a <b>significant</b> nature; and (b) that has been <u>caused by</u>— (i) physical, psychological or emotional abuse or neglect; or (ii) sexual abuse or exploitation.’</p>	<p><i>Focus is on the child suffering ‘harm’ as a consequence of abuse causing the ‘harm’ specified</i></p> <p>Physical abuse Psychological abuse Emotional abuse Neglect Sexual abuse or exploitation</p> <p>Focus on significant harm via ‘significant detrimental effect’</p>
	<p><i>Education (General Provisions) Act 2006</i> (Qld) Section 364 defines ‘sexual abuse’. <b>Sections 365, 366</b> (State and non-State schools respectively): ‘if a staff member becomes aware, or reasonably suspects, in the course of the staff member’s employment at the school, that a child attending the school has been sexually abused’ Sections <b>365A, 366A</b> (State and non-State schools respectively): ‘if a staff member becomes aware, or reasonably suspects, in the course of the staff member’s employment at the school, that a child attending the school is likely to be sexually abused’</p>	<p><i>Focus is ‘abuse’ explicitly</i></p> <p>Sexual abuse only (school staff)</p>
SA	<p><i>Children’s Protection Act 1993</i> (SA) Section <b>6(1)</b>: ‘<b>abuse or neglect</b>, in relation to a child, means— (a) sexual abuse of the child; or (b) physical or emotional abuse of the child, or neglect of the child, <u>to the extent that</u>— (i) the child has suffered, or is likely to suffer, physical or psychological <b>injury detrimental to the child’s wellbeing</b>; or (ii) the child’s physical or psychological development is in jeopardy Section <b>10</b>: ‘<b>abuse or neglect</b>’, in relation to a child, has the same meaning as in section 6(1), but includes a reasonable likelihood, in terms of section 6(2)(b), of the child being killed, injured, abused or neglected by a person with whom the child resides. Section <b>11(1)</b> ‘If (a) a person to whom this section applies suspects on reasonable grounds that a child has been or is being abused or neglected; and (b) the suspicion is formed in the course of the person’s work (whether paid or voluntary) or of carrying out official duties’, the person must report it.</p>	<p><i>Focus is ‘abuse’ explicitly, and as a consequence of being the cause of the ‘injury’ specified</i></p> <p>Sexual abuse Physical abuse Emotional abuse Neglect</p> <p>Less strong focus on significant harm via ‘detriment to wellbeing’ concept</p>

	Legislative reporting provisions - what must be reported - types of abuse and neglect – extent of harm	Abuse / harm; significant harm
TAS	<p><i>Children, Young Persons and Their Families Act 1997 (Tas)</i>  Section 3(1): ‘<b>abuse or neglect</b>’, means  (a) sexual abuse; or  (b) physical or emotional <b>injury</b> or other abuse, or neglect, <u>to the extent that</u>—  (i) the injured, abused, or neglected person has suffered, or is likely to suffer, physical or psychological <b>harm detrimental to the person’s wellbeing</b>; or  (ii) the injured, abused, or neglected person’s physical or psychological development is in jeopardy</p> <p>Section 14(2) ‘If a prescribed person, in carrying out official duties or in the course of his or her work (whether paid or voluntary), believes, or suspects, on reasonable grounds, or knows –  (a) that a child has been or is being abused or neglected or is an affected child within the meaning of the Family Violence Act 2004; or  (b) that there is a reasonable likelihood of a child being killed or injured or abused or neglected by a person with whom the child resides; or  (c) while a woman is pregnant that there is a reasonable likelihood that after the birth of the child –  (i) the child will suffer abuse or neglect, or may be killed by a person with whom the child is likely to reside; or  (ii) the child will require medical treatment or other intervention as a result of the behaviour of the woman, or another person with whom the woman resides or is likely to reside, before the birth of the child’ the person must report it.</p>	<p><i>Focus is ‘abuse’ explicitly, and as a consequence of being the <u>cause</u> of the ‘injury’ specified</i></p> <p>Sexual abuse  Physical injury or abuse  Emotional injury or abuse  Neglect  Exposure to family violence</p> <p>Less strong focus on significant harm via ‘detriment to wellbeing’ concept</p>
VIC	<p><i>Children, Youth and Families Act 2005 (Vic)</i>  Section 184(1): ‘A mandatory reporter who, in the course of practising his or her profession or carrying out the duties of his or her office, position or employment as set out in section 182, forms the <b>belief on reasonable grounds that a child is in need of protection on a ground referred to</b> in section 162(1)(c) or 162(1)(d)’ must report it.</p> <p>Section 162(1) ‘For the purposes of this Act a child is <b>in need of protection</b> if any of the following grounds exist -  (c) the child has suffered, or is likely to suffer, <b>significant harm</b> <u>as a result of physical injury and</u> the child's parents have not protected, or are unlikely to protect, the child from harm of that type;  (d) the child has suffered, or is likely to suffer, <b>significant harm</b> <u>as a result of sexual abuse and</u> the child's parents have not protected, or are unlikely to protect, the child from harm of that type;’</p>	<p><i>Focus is the child being ‘in need of protection’ due to ‘harm’ as a consequence of injury or abuse being the <u>cause</u> of the ‘harm’, plus the absence of a protective parent</i></p> <p>Physical injury  Sexual abuse</p> <p>Clear focus on ‘significant harm’</p>

	Legislative reporting provisions - what must be reported - types of abuse and neglect – extent of harm	Abuse / harm; significant harm
WA	<p><i>Children and Community Services Act 2004</i></p> <p>Section 124A defines 'sexual abuse'. Section <b>124B</b>(1) requires a mandated reporter who in the course of their work 'believes on reasonable grounds that a child (i) has been the subject of sexual abuse that occurred on or after commencement day; or (ii) is the subject of ongoing sexual abuse' to report it.</p>	<p><i>Focus is 'abuse' explicitly</i></p> <p>Sexual abuse</p>

## 1.5. Legislative developments for each State and Territory over time: 2003-2012

In Australia, reporting laws have developed since the 1970s. Each State and Territory has constitutional power to pass legislation about child protection. In the absence of a coordinated national approach, and with States and Territories having different priorities and preferences about child protection and family welfare, each jurisdiction has enacted its own mandatory reporting legislation at different times, in different ways, and with occasional amendments which usually broaden but sometimes narrow the scope of the duty (Mathews & Kenny, 2008).<sup>14</sup>

Below, we provide a 10 year historical review and analysis of the development of the mandatory reporting laws in each State and Territory. For each jurisdiction, we describe:

- the original legislative position at 1 January 2003;
- key legislative changes between 1 January 2003 and 31 December 2012, noting the effects these changes may have on reporting practice;
- a summary of the position at 31 December 2012; and
- a summary timeline depicting key changes.

The findings from this Stage 1 Report will then inform our analysis in Stage 2 of this study. In Stage 2, we will collate and analyse government data about reports and outcomes of reports for each type of child abuse and neglect, by each reporter group, from each State and Territory for the 2003-2012 period. This will indicate within each jurisdiction the influence of different legislative provisions on reporting practice and outcomes. It will also inform an analysis across jurisdictions of the influence of different legislative frameworks on reporting practice and outcomes.

The following sections detail legislative developments for each State and Territory over the period 2003-2012:

- 1.5.1 Australian Capital Territory
- 1.5.2 New South Wales
- 1.5.3 Northern Territory
- 1.5.4 Queensland
- 1.5.5 South Australia
- 1.5.6 Tasmania

---

<sup>14</sup> Note that the State and Territory laws synthesized and traced below do not contain references to the Commonwealth provisions under the Family Law Act, which apply nationally.

- 1.5.7 Victoria
- 1.5.8 Western Australia

### **1.5.1. Australian Capital Territory**

#### **1.5.1.1. Original position at 1 January 2003: Australian Capital Territory**

##### **Children and Young People Act 1999**

In the Australian Capital Territory, the Children and Young People Act 1999 (ACT) s 159(2) imposed a fairly narrow mandatory reporting duty. Section 159(2) imposed a duty to report reasonable suspicions of past or presently-occurring sexual abuse or non-accidental physical injury to a child or young person, on selected persons who form that suspicion in the course of their work or voluntary duties. Hence, the duty did not apply to neglect, or emotional abuse. As well, the duty did not apply to risk of future abuse.

The duty was imposed by s 159(1) on a broad range of professionals as follows:

- (a) doctors
- (b) dentists
- (c) enrolled or registered nurses
- (d) school teachers
- (e) police officers
- (f) school counsellors
- (g) persons caring for children at child care centres
- (h) persons coordinating or monitoring the provision of home-based care on behalf of a family day-care scheme licensee
- (i) public servants who provide services related to the health and welfare of children, young people or families
- (j) the community advocate
- (k) the official visitor.

As in other jurisdictions, voluntary reports could be made of situations outside the mandatory reporting duty (s 158). For mandated reports, immunity was conferred by s 163(1)(a) and (b). Confidentiality was conferred by ss 404 and 405. An unusual provision provided a penalty for making a report other than in good faith (s 160). Uniquely in Australia, the Australian Capital Territory penalty provision included the possibility of imprisonment: s 159(2) set a maximum penalty of 50 penalty units (at the time, a penalty unit was \$100, hence \$5000), 6 months' imprisonment, or both.

#### **1.5.1.2. Key changes, 2003-12: Australian Capital Territory**

The *Children and Young Persons Act 2008* replaced the *Children and Young Persons Act 1999*, commencing 27 October 2008. Between 2003 and this date, the only substantive change was to add midwives as a reporter group in 159(1)(e). However, several other changes occurred which should be noted.

### **Midwives added as a reporter group (commencing 18 November 2006)**

This occurred when the *Health Legislation Amendment Act 2006 (No 2)* Sch 2 Pt 2.2 commenced on 18 November 2006, which renumbered subsections in s 159(1) and added midwives as a reporter group:

- (c) a nurse; or
- (ca) an enrolled nurse; or
- (cb) a midwife

This may be expected to have produced an increase in reports by this group, but probably only very moderate due to the restricted scope of the reporting duty.

### **New exception in 159(3) (commencing 1 August 2006)**

Section 159(3) provided an exception for not reporting and was inserted by *Children and Young People Amendment Act 2006 (Act 6)* s 16, which commenced on 1 August 2006. The exception applied if a reporter had a reasonable belief that someone else has made a report about the same child or young person in relation to the same abuse or neglect<sup>15</sup> and the other person reported the same reasons for their belief as the person has for their belief.

If anything, this may be expected to have produced a slight decline in the number of multiple reports about the same child.

### **Children and Young Persons Act 2008 (commencing 27 October 2008)**

The Children and Young Persons Act 2008, which commenced on 27 October 2008, made the following changes:

- some provisions were renumbered (the key mandated reporting provision, formerly s 159, was renumbered s 356, without changing the scope; the offence provision for a false or misleading

---

<sup>15</sup> This wording appears to imply that the reporting duty can apply to neglect. However, the reporting duty is clearly expressed as being limited to sexual abuse and intentional physical injury. Neglect can certainly cause physical injury, but any physical injury caused by neglect is arguably usually caused without intention, at least in contrast to the kind of physical injury caused intentionally by physical abuse. At most, this inclusion arguably should be limited to situations of physical injury caused intentionally by neglect. Alternatively, this is a drafting error and should be amended. Based on the clear definitions of 'abuse' and 'neglect' in ss 342 and 343, in my view it is a drafting error.

mandatory report is in s 358; immunity was provided, in s 874; confidentiality was provided, in s 857; the exception in the former s 159(3) was renumbered s 357(1) ie where a reporter has a reasonable belief that someone else has made a report about the same child or young person in relation to the same abuse, and the other person reported the same reasons for their belief as the person has for their belief;

- there was a clarification of the scope of some mandated reporter groups (s 356) by stating that:
  - ‘teacher’ at a school includes a teacher’s assistant or aide if the person is in paid employment at the school;
  - person caring for a child at a childcare centre includes a childcare assistant or aide caring for a child at the childcare centre if they are in paid employment there (but not volunteers caring for a child).
- a new exception was added by s 357(2) for not reporting in situations where a reporter had a reasonable belief that physical injury was caused to a child by another child or young person, and a person with parental responsibility for the child is willing and able to protect the child from further injury
  - if this kind of situation was previously being reported (erroneously) then this may be expected to produce a small decline in reports of physical injury.

### **Change in penalty (commencing 21 October 2009)**

The penalty was unchanged in its form but in substance it is higher, due to changes in the definition of a ‘penalty unit’. A penalty unit was redefined as \$110 in the Legislation Act s 133, by the Legislation (Penalty Units) Amendment Act 2009 (No 35), so from 21 October 2009 to 31 December 2012 the penalty was 50 penalty units (\$5500), 6 months’ imprisonment, or both.

### **New reporter group: home education inspectors (commencing 20 September 2010)**

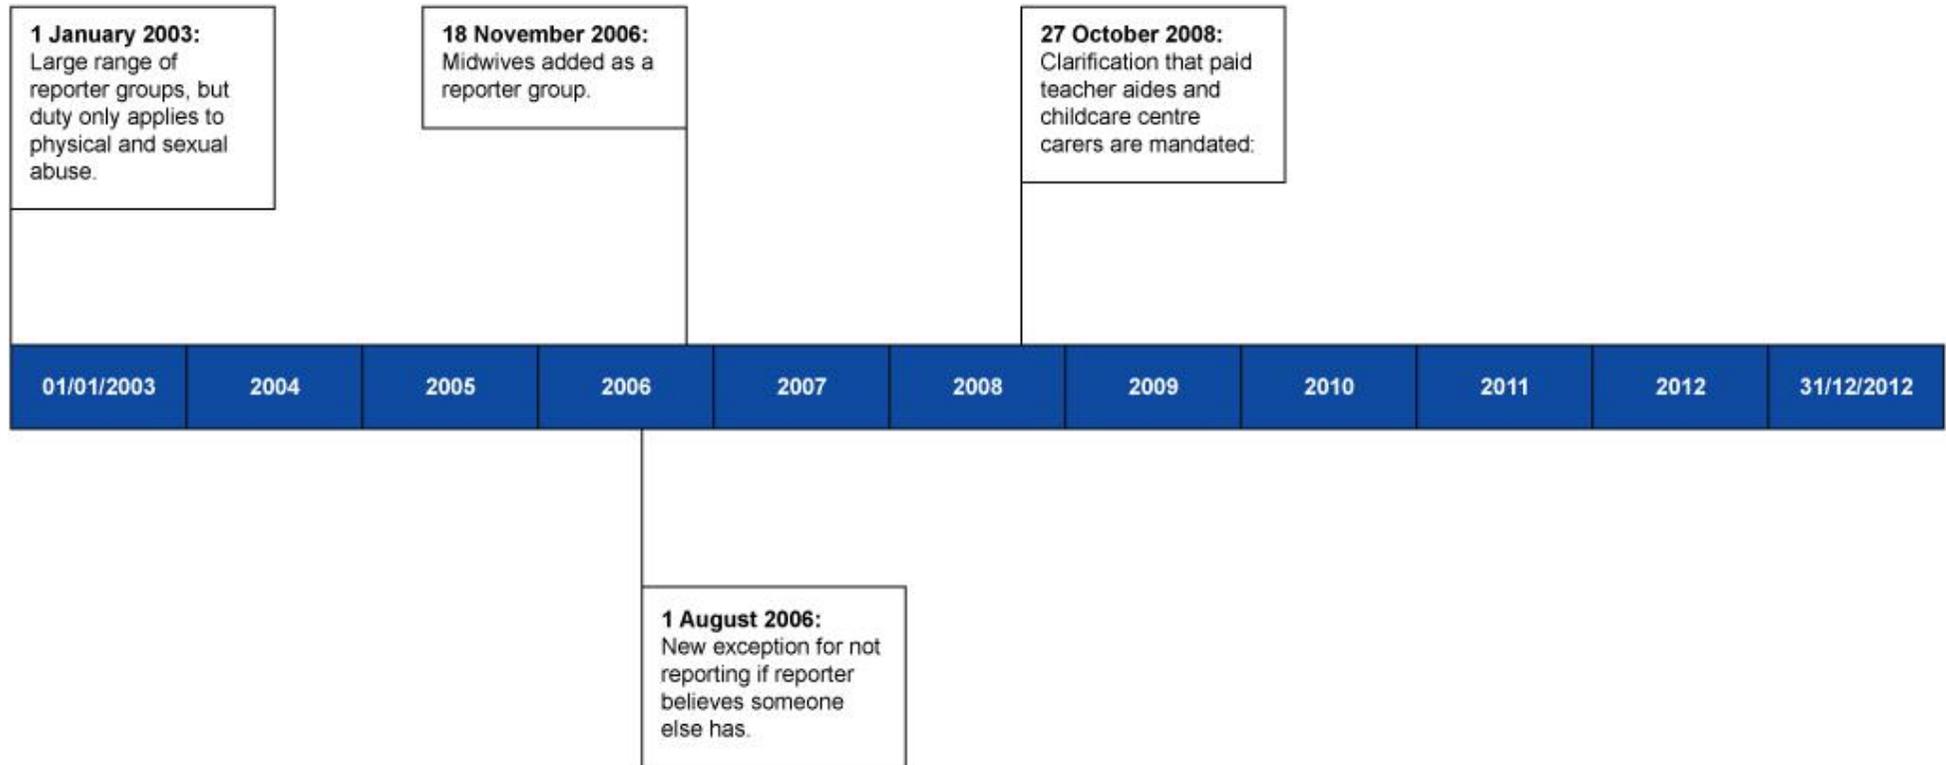

An addition was made to the list of mandated reporters in s 356(2)(g) of ‘persons authorized to inspect education programs, materials or other records used for home education of a child or young person’ as a mandated reporter group (inserted by Children and Young People Amendment Act 2010 (No 2)). Due to the small population of this group of mandated reporters, and the narrow scope of the reporting duty, this change may not be expected to cause much difference in reporting practice.

#### **1.5.1.3. Current position: Australian Capital Territory**

The duty is limited to intentional physical injury and sexual abuse, but is applied to a wide range of professionals. A very substantial penalty is provided, and uniquely in Australia includes the possibility of imprisonment. Provisions indicate situations in which a report is not required. A suspected drafting error in

these provisions may confuse reporters about whether or not neglect and emotional abuse must be reported.

**Figure 1.1: Timeline showing key developments, Australian Capital Territory, 2003-2012**

## **1.5.2. New South Wales**

### **1.5.2.1. Original position at 1 January 2003: New South Wales**

#### **Children and Young Persons (Care and Protection) Act 1998**

At 1 January 2003, in New South Wales the *Children and Young Persons (Care and Protection) Act 1998* (NSW) imposed a broad range of mandatory reporting obligations. Under s 23, the duty applied to a broad range of types of child abuse and neglect. This range of reportable types included exposure to domestic violence, and NSW at the time was the only State to include such a duty. The state of mind activating the duty was 'reasonable grounds to suspect a child is at risk of harm'. The duty applied to both suspected past/present harm, and to risk of suspected future harm. Under s 27, the duty was extended to a broad range of professionals in professions including education, health, welfare and law enforcement who delivered services to children, and to those in management positions in these organisations. The penalty was 200 penalty units, which equated to \$22,000. A limiting feature in this legislation compared to most other jurisdictions was that a 'child' was defined as a person under 16; hence the reporting duty only applied to those aged 15 or under (s 3). Immunity from proceedings was provided by s 29(1)(a)-(e). Confidentiality was conferred by s 29(1)(f).

#### **An unusually broad range and definition of 'risk of harm'**

For the purpose of the mandatory reporting duty, a child was defined as being 'at risk of harm' by s 23 'if current concerns existed for the safety, welfare or well-being of the child' because of any of the following circumstances:

- (a) the child's or young person's basic physical or psychological needs are not being met or are at risk of not being met,
- (b) the parents or other caregivers have not arranged and are unable or unwilling to arrange for the child or young person to receive necessary medical care,
- (c) the child or young person has been, or is at risk of being, physically or sexually abused or ill-treated,
- (d) the child or young person is living in a household where there have been incidents of domestic violence and, as a consequence, the child or young person is at risk of serious physical or psychological harm,
- (e) a parent or other caregiver has behaved in such a way towards the child or young person that the child or young person has suffered or is at risk of suffering serious psychological harm.

The definition in s 23 was broad in three ways:

- 1) By predicating the duty with the opening clause 'if current concerns exist for the safety, welfare or well-being of the child', the provision was premised on broader and more slippery concepts than other jurisdictions' legislation which imposed clearer limits on reportable cases of, for example, significant physical abuse and neglect;
- 2) By not clearly limiting the reporting duty in all cases to situations of significant harm; for example, with physical abuse, the legislation was drafted as applying where the child 'has been, or is at risk of being, physically abused or mistreated';
- 3) By including exposure to domestic violence, albeit technically limiting reportable situations to those situations where the child was at risk of serious physical or psychological harm. It can be noted that this provision may have influenced a likelihood among reporters, especially police officers, to be unable or unwilling to discriminate amongst different domestic violence cases and hence to 'overreport').

Therefore, key features of the New South Wales definition provision which worked with the reporting duty provision may be expected to have influenced a much higher tendency towards reporting, including the reporting of cases which were of minimal gravity (overreporting).

The definition combined with the reporting provision in s 27 as follows:

***Section 27 Mandatory reporting***

- (1) This section applies to:
  - (a) a person who, in the course of his or her professional work or other paid employment delivers health care, welfare, education, children's services, residential services, or law enforcement, wholly or partly, to children, and
  - (b) a person who holds a management position in an organisation the duties of which include direct responsibility for, or direct supervision of, the provision of health care, welfare, education, children's services, residential services, or law enforcement, wholly or partly, to children.
- (2) If:
  - (a) a person to whom this section applies has reasonable grounds to suspect that a child is at risk of harm, and
  - (b) those grounds arise during the course of or from the person's work,

the person must, as soon as practicable, report to the Director-General the name, or a description, of the child and the grounds for suspecting that the child is at risk of harm.

The penalty in s 27 of \$22,000 was also unusually high and should also be noted as a factor possibly influencing reporting practice.

### **1.5.2.2. Key changes, 2003-12: New South Wales**

#### **A new category of mandated report (commencing 30 March 2007)**

The *Children and Young Persons (Care and Protection) Miscellaneous Amendments Act 2006 No 95* (Sch 1 [1], commencing 30 March 2007), amended s 23 by adding a new category of mandated report, in s 23(f). Reports were required of situations where a child was the subject of a pre-natal report and ‘the birth mother of the child did not engage successfully with support services to eliminate, or minimize to the lowest level reasonably practical, the risk factors that gave rise to the report’. This is also a broader reporting duty generally not replicated elsewhere.<sup>16</sup>

#### **Major changes: the Children Legislation Amendment (Wood Inquiry Recommendations) Act 2009 No 13, Schedule 1.1 (commencing 24 January 2010)**

After the Wood Inquiry into child protection in New South Wales, four substantial amendments were introduced which affected the concept of harm, a new category of reportable harm, the penalty provision, and reporting mechanisms.

#### **Change to concept of harm – ‘significant’ harm (commencing 24 January 2010)**

The *Children Legislation Amendment (Wood Inquiry Recommendations) Act 2009 No 13* (hereafter referred to as the Wood legislation) added a qualification of ‘significant harm’ to the reporting duty in s 23 definition of ‘risk of harm’ (Sch 1.1). This limited the class of reportable cases in a clearer manner than had previously existed (Sch 1.1[1] and [2]). This was achieved by:

- changing the heading (so it reads ‘Section 23 Child or young person at risk of significant harm’);
- adding the word ‘significant’ to s 23(1) (so the sentence reads: ‘a child or young person is at risk of significant harm’ rather than the previous ‘at risk of harm’
- adding the words ‘to a significant extent’ so the sentence reads as follows:

23 Child or young person at risk of significant harm

---

<sup>16</sup> A note to s 25 was added by this Act Sch 1 [2], stating that the intention of s 25 reports were (a) to allow assistance and support to be provided to the expectant mother to reduce the likelihood that her child, when born, will need to be placed in out-of-home care, and (b) to provide early information that a child who is not yet born may be at risk of harm subsequent to his or her birth, and (c) in conjunction with section 23 (f) and section 27, to provide for mandatory reporting if there are reasonable grounds to believe that the child is at risk of harm subsequent to his or her birth.

For the purposes of this Part and Part 3, a child or young person is at risk of significant harm if current concerns exist for the safety, welfare or well-being of the child or young person because of the presence, to a significant extent, of any one or more of the following circumstances.

If the previous unqualified concept of harm did in fact influence hypersensitive reporting (overreporting, or the making of clearly unnecessary reports) before this change, then if this change has been conveyed to reporters, it may be expected that there has been a reduction in such practice – ie fewer ‘clearly unnecessary’ reports – especially for exposure to domestic violence and neglect.

### **New category of reportable harm: school attendance (commencing 24 January 2010)**

The Wood legislation added a new s 23(b1) which required reports where parents or caregivers have not arranged and are unable or unwilling to arrange for the child to receive an education where they are required to attend school in accordance with the Education Act 1990.

This may be expected to have resulted in an increase in reports under this category (or as a type of neglect).

### **Major change by removing the penalty from s 27(2) (commencing 24 January 2010)**

At 1 January 2003, the penalty for failure to report was maximum of 200 penalty units. This equated to \$22 000 (see Table 6). In a major change, the Wood legislation removed the penalty from s 27 (Children Legislation Amendment (Wood Inquiry Recommendations) Act 2009 No 13, Schedule 1.1 [7]).<sup>17</sup>

If the penalty previously had any influence on hypersensitive reporting (overreporting, or the making of clearly unnecessary reports), then if this change has been conveyed to reporters one may expect a reduction in such practice ie fewer ‘clearly unnecessary’ reports.

### **Alternative reporting via s 27A (commencing 24 January 2010)**

To enable the new focus on differential response which was promoted by the Wood legislation, the amendments also added a new s 27A (Sch 1.1 [8]). This enabled mandated reporters to make a report to the assessment officer of designated agencies who had created such arrangements (Child Well Being Units: eg in health, education, police and juvenile justice) (s 27A(2)), and this report would meet the mandated reporter’s duty under s 27 (S 27A(6)).

---

<sup>17</sup> Amendments to the NSW CYP (CP) Act made by the Children Legislation Amendment (Wood Inquiry Recommendations) Act 2009 related to the Wood Inquiry recommendations 6.2 and 10.1.

After receiving the report, the assessment officer is to assess whether the matter should be reported to the Director-General under s 27 (s 27A(3)).

- **If so**, then the assessment officer or the reporter must report the matter to the Director-General (s 27A(4)).
- **If not**, the assessor or the staff member may, if either have concerns for the wellbeing for the child, make such referral or take such action as considered necessary or appropriate (or as is reasonably available) to safeguard or promote the safety, welfare and well-being of the child (s 27A(5)).
- Under these arrangements, the normal protections to reporters are provided (s 29(1)(a)-(c) provides immunity; s 29(1)(f) confers confidentiality).

This new scheme may be expected to also reduce the number of reports of more minor concerns to the Director-General.

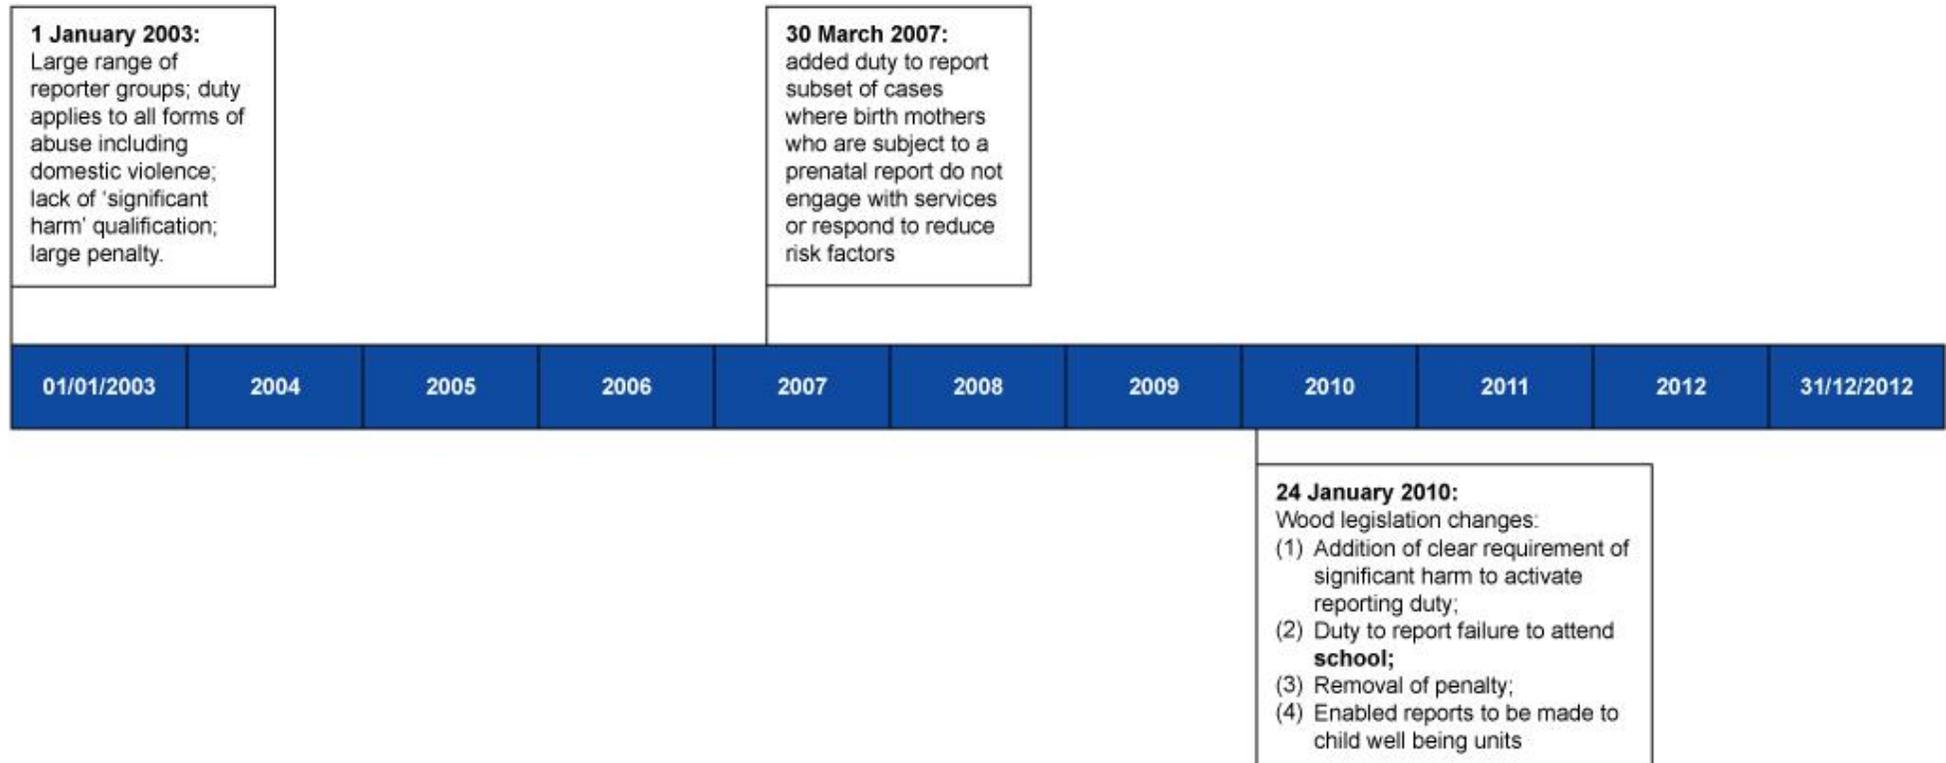

### **1.5.2.3. Current position: New South Wales**

There have been no further changes after the Wood legislation. Therefore, the current situation, existing since 24 January 2010, is that members of a broad range of professions are required to report current concerns for the safety, welfare or well-being of a child because of the presence, to a significant extent, of (s 23)(1):

- (a) the child's basic physical or psychological needs are not being met or are at risk of not being met;
- (b) lack of necessary medical care and the parents' caregivers are unable or unwilling to arrange it;
- (b1) lack of education in accordance with the Education Act;
- (c) the child has been or is at risk of being physically or sexually abused or ill-treated;
- (d) the child is living in a household where there have been incidents of domestic violence and as a consequence the child is at risk of serious physical or psychological harm
- (e) a parent/caregiver has behaved in such a way towards the child that the child has suffered or is at risk of suffering serious psychological harm;
- (f) the child was subject of a prenatal report and the birth mother and the mother did not engage successfully with support services to eliminate, or minimize to the lowest level reasonably practical, the risk factors that gave rise to the report'.

No penalty exists for noncompliance.

**Figure 1.2: Timeline showing key developments, New South Wales, 2003-2012**

### 1.5.3. Northern Territory

#### 1.5.3.1 Original position at 1 January 2003: Northern Territory

##### Community Welfare Act 1983

At 1 January 2003, the *Community Welfare Act 1983* (No 76)<sup>18</sup> contained wide mandatory reporting provisions which, uniquely for Australian jurisdictions, applied to all persons (s 14); a separate provision specifically applied to police officers (s 13).<sup>19</sup> Section 14 required a person ‘who believes, on reasonable grounds, that a child has suffered or is suffering maltreatment’ to report it. The state of mind activating the duty was belief on reasonable grounds. Section 4(3) defined ‘maltreatment’ to include physical, emotional, psychological and sexual abuse, with a threshold of significance indicated by the concepts of ‘seriousness’, ‘severity’ and other stipulated qualifications regarding the injury caused or likely to be caused; it extended to risk of abuse and neglect to this degree (see below). It also contained a specific reference to female genital mutilation (s 4(3)(e)). Because of the definition of ‘maltreatment’ in s 4(3), the duty applied to abuse and neglect thought to have already occurred or to be presently occurring, and to situations where there was believed to be a substantial risk of such abuse and neglect. The maximum penalty was 200 penalty units.<sup>20</sup> Immunity from liability for making a report was provided by s 14(2). Confidentiality was indirectly protected by s 97, although this was not as clear a protection as existed elsewhere.

Under the definition in s 4(3) operating from 2003, a child was deemed ‘to have suffered maltreatment where –

---

<sup>18</sup> This Act and its original mandatory reporting provisions commenced on 20 April 1984. Note the addition at some point of the FGM subsection, and of the ‘or she’ after the original provisions’ use of only the male pronoun.

<sup>19</sup> **13. Investigation of maltreatment** - (1) Where a member of the Police Force believes on reasonable grounds that a child has suffered or is suffering maltreatment, he or she – (a) shall, as soon as practicable, notify the Minister of the circumstances and the knowledge that constitutes the reasonable grounds for his or her so believing; and (b) may investigate the circumstances to ascertain if the child has suffered or is suffering maltreatment. (2) Where a member of the Police Force carries out an investigation under subsection (1)(b), he or she shall, within 24 hours after completing the investigation, furnish to the Minister a report on his or her investigations and, if he or she is satisfied on reasonable grounds that the child has suffered maltreatment, all material facts on which the knowledge that constitutes the reasonable grounds for his or her belief is based.

<sup>20</sup> **14. Maltreatment to be reported** - (1) A person, not being a member of the Police Force, who believes, on reasonable grounds, that a child has suffered or is suffering maltreatment shall, as soon as practicable after obtaining the knowledge that constitutes the reasonable grounds for his or her so believing, report the fact, and all material facts on which that knowledge is based, to the Minister or a member of the Police Force. Penalty: 200 penalty units.

- (a) he or she has suffered a physical injury causing temporary or permanent disfigurement or serious pain or has suffered impairment of a bodily function or the normal reserve or flexibility of a bodily function, inflicted or allowed to be inflicted by a parent, guardian or person having the custody of him or her or where there is substantial risk of his suffering such an injury or impairment;
- (b) he or she has suffered serious emotional or intellectual impairment evidenced by severe psychological or social malfunctioning measured by the commonly accepted standards of the community to which he or she belongs, because of his or her physical surroundings, nutritional or other deprivation, or the emotional or social environment in which he or she is living or where there is a substantial risk that such surroundings, deprivation or environment will cause such emotional or intellectual impairment;
- (c) he or she has suffered serious physical impairment evidenced by severe bodily malfunctioning, because of his or her physical surroundings, nutritional or other deprivation, or the emotional or social environment in which he or she is living or where there is substantial risk that such surroundings, deprivation or environment will cause such impairment;
- (d) he or she has been sexually abused or exploited, or where there is substantial risk of such abuse or exploitation occurring, and his or her parents, guardians or persons having the custody of him or her are unable or unwilling to protect him or her from such abuse or exploitation; or
- (e) being a female, she –
  - (i) has been subjected, or there is substantial risk that she will be subjected, to female genital mutilation, as defined in section 186A of the Criminal Code; or
  - (ii) has been taken, or there is a substantial risk that she will be taken, from the Territory with the intention of having female genital mutilation performed on her.’

### **1.5.3.2. Key changes, 2003-12: Northern Territory**

The *Community Welfare Act 1983* was amended by several Acts until 2007, but not substantially.<sup>21</sup>

#### **Major change from ‘maltreatment’ to ‘harm’ and inclusion of exposure to physical violence (commencing 8 December 2008)**

---

<sup>21</sup> Earlier, a significant amendment had occurred in 2002 when ss 12-14 were amended by the *Community Welfare Amendment Act 2002* (Act No. 61, 2002; commenced 9 December 2002) s 10, which increased the maximum penalty from \$500 to 200 penalty units.

The *Care and Protection of Children Act 2007 (Act 37)* received assent on 12 December 2007, and Chapter 2 Part 2.1 (the new mandatory reporting provisions) commenced on 8 December 2008.<sup>22</sup> Until then, the MR provisions in the CWA effectively continued. From 8 December 2008, the key provisions in the *Care and Protection of Children Act 2007* applied, replacing the former *Community Welfare Act 1983*.

These new provisions in the *Care and Protection of Children Act 2007* had the following effects:

- The **key change** was replacing the concept of maltreatment with the concept of **'harm'**, which was defined very broadly in s 15 (including exposure of a child to domestic violence, provided the harm threshold was reached). 'Harm' was defined as:
  - (1) **any significant detrimental effect** caused by any act, omission or circumstance on:
    - (a) the physical, psychological or emotional **wellbeing** of the child; or
    - (b) the physical, psychological or emotional **development** of the child.
  - (2) Without limiting subsection (1), harm can be caused by the following:
    - (a) physical, psychological or emotional abuse or neglect of the child;
    - (b) sexual abuse or other exploitation of the child;
    - (c) **exposure of the child to physical violence.**
- Defining **'exploitation'** (s 16) to include sexual and other forms of exploitation of the child. Section 16(2) non-exhaustively defined sexual exploitation as including (a) sexual abuse; and (b) involving the child as a participant or spectator in (i) An act of a sexual nature; (ii) Prostitution; or (iii) A pornographic performance.
- Placing the reporting duty in s 26 in the following terms:
  - (1) A person is guilty of an offence if the person:
    - (a) believes, on reasonable grounds, that a child:
      - (i) has been or is likely to be a victim of a sexual offence; or
      - (ii) otherwise has suffered or is likely to suffer harm or exploitation; and
    - (b) does not, as soon as possible after forming that belief, report (orally or in writing) to the CEO or a police officer.
- Immunity from proceedings was provided by s 27. Confidentiality was indirectly protected by s 97, although this was not as clear a protection as existed elsewhere. The maximum penalty was 200 penalty units.

---

<sup>22</sup> Chapter 1 (definitions) commenced on 7 May 2008 and other provisions.

The new concepts and definitions of harm are arguably broader than the previous concept of maltreatment and the definitions of it. This may be expected to have produced an increase in reports in most categories, and especially for the new category of exposure to physical violence.

### **Further significant change regarding sexual abuse reporting (commencing 1 September 2009)**

The *Care and Protection of Children Amendment Act 2009 (Act 23)* repealed and substituted s 26. This had the effect of:<sup>23</sup>

- Simplifying but not substantially altering the primary existing reporting duty
- Adding duties regarding selected sexual abuse scenarios as follows:
  - Adding a secondary reporting duty regarding a belief on reasonable grounds that a child aged **less than 14** has been or is likely to be a victim of a sexual offence,<sup>24</sup> or an offence against s 128

---

<sup>23</sup> Influenced by the federal government intervention? The provision read as follows: Section 26 - repeal, substitute:

#### **26 Reporting obligations**

(1) **A person** is guilty of an offence if the person:

- (a) believes, on reasonable grounds, any of the following:
  - (i) a child has suffered or is likely to suffer **harm or exploitation**;
  - (ii) a child aged less than 14 years **has been or is likely to be a victim of a sexual offence**;
  - (iii) a child has been or is likely to be a victim of an **offence against section 128** of the Criminal Code; and
- (b) does not, as soon as possible after forming that belief, report (orally or in writing) to the CEO or a police officer:
  - (i) that belief; and
  - (ii) any knowledge of the person forming the grounds for that belief; and
  - (iii) any factual circumstances on which that knowledge is based.

Maximum penalty: 200 penalty units.

(2) A person is guilty of an offence if the person:

- (a) is a **health practitioner** or someone who performs work of a kind that is prescribed by regulation; and
- (b) believes, on reasonable grounds: (i) that a child aged at least 14 years (but less than 16 years) **has been or is likely to be a victim of a sexual offence**; and (ii) that the **difference in age between the child and alleged sexual offender is more than 2 years**; and
- (c) does not, as soon as possible after forming that belief, report (orally or in writing) to the CEO or a police officer:
  - (i) that belief; and
  - (ii) any knowledge of the person forming the grounds for that belief; and (iii) any factual circumstances on which that knowledge is based. Maximum penalty: 200 penalty units.

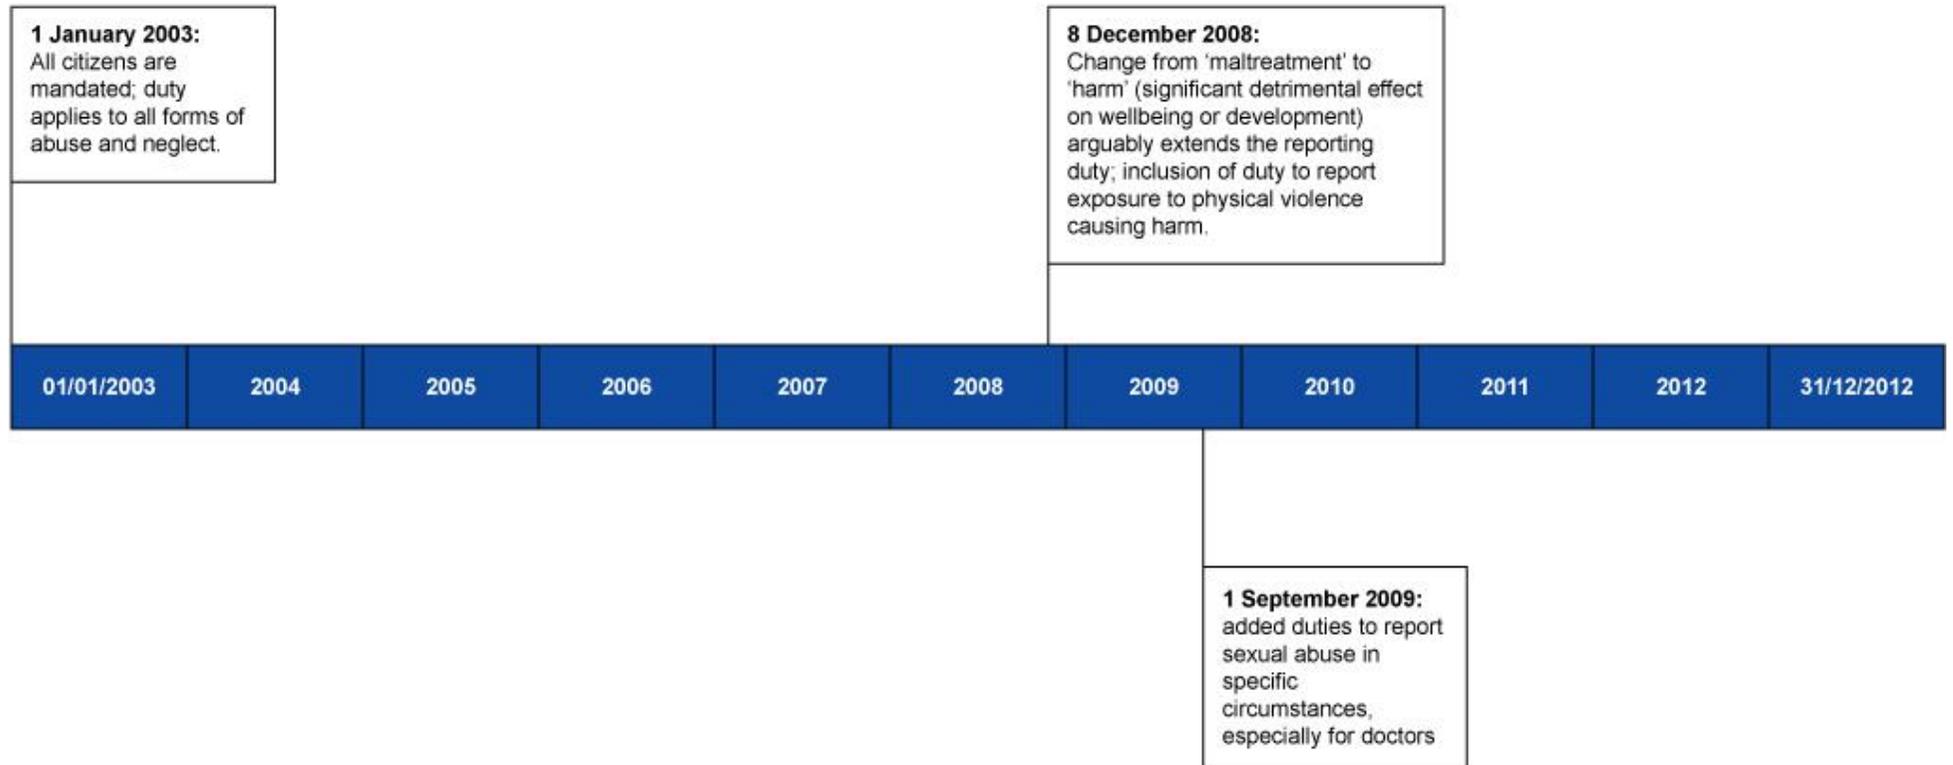

<sup>24</sup> For the definition of 'sexual offence', see the Sexual Offences (Evidence and Procedure) Act s 3.

of the Criminal Code (a child 16-17 years old and under the offender's special care eg teacher or step-parent)

- Adding a reporting duty for health practitioners, and others performing work of a kind prescribed by regulation, who believe on reasonable grounds that a child **aged 14 but less than 16** has been or is likely to be a victim of a sexual offence and the difference in age between the child and alleged offender is more than 2 years.

This, together with the context accompanying the legislative change, may be expected to have produced a significant increase in reports of sexual abuse from September 2009.

**Figure 1.3: Timeline showing key developments, Northern Territory, 2003-2012**

## **1.5.4. Queensland**

### **1.5.4.1. Original position at 1 January 2003: Queensland**

#### **Health Act 1937 (Qld): Original legislation for doctors**

At 1 January 2003, doctors were the only profession in Queensland who had any form of mandatory reporting duty. The duty was in the *Health Act 1937 (Qld) s76K(1)*. The provision was unlike any other in Australia. The provision required a ‘medical practitioner’ who suspects on reasonable grounds the ‘maltreatment or neglect of a child in such a manner as to subject or be likely to subject the child to unnecessary injury, suffering or danger’ to report within 24 hours to a person authorised under a regulation to be notified.<sup>25</sup> Apart from the stated concepts of ‘unnecessary injury, suffering or danger’, the terms ‘maltreatment’ and ‘neglect’ were not defined. The terms ‘unnecessary injury, suffering or danger’ were not otherwise defined. ‘Child’ was defined as a person under the age of 17 (s 76M). Immunity from proceedings was conferred by ss 76K(6) and (7). Also unusually, there was no penalty for failure to comply.

Due to the broad concepts in this reporting duty, it may be expected that doctors would be reporting substantial numbers of cases. However, the lack of a penalty may also have influenced a failure to report.

#### **No legislation for nurses, teachers, police and other professionals**

At 1 January 2003, doctors were the only profession in Queensland under any form of mandatory reporting duty.

### **1.5.4.2. Key changes, 2013-12: Queensland**

The legislation has changed significantly in the period 2003-2012, especially for nurses and teachers. Queensland has now introduced new mandatory reporting legislation for doctors and nurses, for all four forms of child abuse and neglect. There is also mandatory reporting provisions for school staff, although this duty is very limited (applying to sexual abuse only). However, the reporting duties in Queensland are still narrower than most other jurisdictions.

#### **Major legislative change for doctors, and applying to nurses – broader duties (commencing 31 August 2005)**

---

<sup>25</sup> This provision was inserted in 1978 by Act No 65 s 9 but was never proclaimed into force. It was omitted in 1980 by Act No 26 s 3. It was then inserted in 1980 by the *Health Act Amendment Act (No 26) s 4* (commenced 14 June 1980); and was (not substantially) amended in 1995 by Act No 57 s 4 sch 1; and by Act No 58 s 4 sch 2; and in 1998 by Act No 41 s 14(1) sch 1.

The *Child Safety Legislation Amendment Act (No. 2) 2004* (No. 36)<sup>26</sup> amended the *Health Act 1937* to extend doctors' reporting duties and made the provisions much more specific and detailed.<sup>27</sup> In a major development, these provisions were also extended to nurses. These provisions imposed a wide reporting duty for all four classical forms of child abuse and neglect, provided the suspected harm reached the necessary threshold of 'significance'. The duty applied to an awareness or reasonable suspicion that abuse/neglect that had already occurred, and to suspected risk of harm.

The provisions had the following effects:

- Added a new s 76K containing new definitions of 'child' (an individual under 18), 'harm', 'professional' (a doctor or registered nurse) and 'registered nurse' (a person registered under the *Nursing Act 1992* as a registered nurse)
- 'Harm' to a child was defined in s 76K as meaning:
  - 'any detrimental effect on the child's physical, psychological or emotional wellbeing (a) that is of a significant nature; and
  - (b) that has been caused by
    - (i) physical, psychological or emotional abuse or neglect; or
    - (ii) sexual abuse or exploitation'
- Section 76KC imposed the reporting duty in the following terms:
  - This section applies if—
    - a professional becomes aware, or reasonably suspects, during the practice of his or her profession, that a child **has been, is being, or is likely to be, harmed**; and
    - as far as the professional is aware, no other professional has notified the chief executive (child safety) under this section about the harm or likely harm.
  - '(2) The professional must immediately give notice of the harm or likely harm to the chief executive (child safety)— orally; or by facsimile, email or similar communication.
  - (4) To remove any doubt, it is declared that a professional may need to seek further information about harm or likely harm to a child before forming a reasonable suspicion about the matter.

---

<sup>26</sup> This Act commenced on 31 August 2005 (2005 SL No. 62).

<sup>27</sup> Context of the change: The Child Safety Legislation Amendment Bill 2004 (Qld) (No 2) pursuant to recommendation 6.13 of the Crime and Misconduct Commission 2004 report into sexual abuse of children in Queensland foster care, sought to amend the Health Act by extending the obligation imposed on medical practitioners to nurses.

- Under s 76KD if the notification was given other than in writing, then it had to be provided in writing within 7 days.
- Under s 76KE if the notification required under 76KC or 76KD was not given, a maximum penalty was provided of 50 penalty units (\$3750).
- Immunity from liability for giving information **to a professional** was provided by s 76KG.
- The *Child Protection Act 1999* ss 22 and 186 were expressly provided to be relevant to a professional giving a notice or other information under these provisions, by s 76KB(1). Confidentiality was also provided to notifiers by s 76KH.

## Public Health Act 2005

The relevant provisions in the *Health Act 1937* were then placed into the *Public Health Act 2005 (No 48)* (Qld), which commenced 1 December 2005.<sup>28</sup> The PHA 2005 (No 48) Sch 1 amended the *Health Act 1937* and omitted Part 3, which contained the reporting provisions. Accordingly, since 1 December 2005 the relevant provisions for doctors and nurses have been in the *Public Health Act 2005*. The key provisions are in Chapter 5 Part 3. The provisions are unaltered from the original *Public Health Act 2005*, but are renumbered.

Section 158 defines relevant terms. Section 191 sets out the duty. The state of mind which activates the duty to report is 'aware, or reasonably suspects'. The duty applies to awareness or reasonable suspicion of past/presently occurring abuse/neglect meeting the definition of significant harm, and extends to suspected likely future abuse/risk of significant harm. The term 'harm' is defined in s 158 as 'any detrimental effect on the child's physical, psychological or emotional wellbeing (a) that is of a significant nature; and (b) that has been caused by (i) physical, psychological or emotional abuse or neglect; or (ii) sexual abuse or exploitation'.<sup>29</sup> Section 195 provides protection for giving information to professionals. Section 196 confers confidentiality on notifiers. The *Child Protection Act 1999* ss 22 and 186 are expressly provided to be relevant to a professional giving a notice or other information under these provisions, by the *Public Health Act* s 186(2). Section 193 is the offence provision (maximum 50 penalty units; which now equates to \$5500).

---

<sup>28</sup> The *Health Act 1937* (Qld) was amended by the *Child Safety Legislation Amendment Act (No 2) 2004* (Qld), with the relevant amending provisions in Pt 8 of that statute commencing on 31 August 2005 (SL 2005 No 62). The provisions in the *Health Act 1937* were later omitted and inserted into the *Public Health Act 2005* (Qld), operational on 1 March 2006.

<sup>29</sup> There is no clear legislative obligation to report suspected abuse or likely abuse/neglect or harm to an unborn child. The CPA s 21A and s 22 enables such reports and s 22 provides protections to those who make such reports.

### **New duty for teachers to report sexual abuse by school staff (commencing 19 April 2004)**

From 19 April 2004, teachers were required to report reasonable suspicions of specific circumstances of suspected sexual abuse only. The provisions were introduced into the *Education (General Provisions) Act 1989* (Qld) ss 146A-146B (applying to State and non-State schools respectively) by the *Education and Other Legislation (Student Protection) Amendment Act 2003* (Qld) (No 88 of 2003).<sup>30</sup>

However, even this restricted duty was limited, as the legislation restricted the duty to cases of suspected sexual abuse **perpetrated by a school staff member**.<sup>31</sup> The duty was also limited to suspected **past and presently** occurring abuse; it did not apply to suspected future cases. The provisions imposed an obligation on a staff member of a school who 'becomes aware, or reasonably suspects, that a student under 18 years of age attending the school has been sexually abused by someone else who is an employee of the school' to immediately give a written report about the abuse or suspected abuse to the school's principal or the principal's supervisor. It was made an offence not to give such a report (s 146A(2); s 146B(2): maximum penalty of 20 penalty units (\$1500)). Reporters were granted immunity from civil and criminal liability connected with making the report (s 146A(6) and (7); s 146B(5) and (6)). Confidentiality was not expressly conferred, and was arguably not conferred by the *Child Protection Act 1999* (Qld) s 186 (see Part 1.5.4.3).

Despite the unique limitations of the duty, it is likely that this development would result in a significant increase in reports by teachers of sexual abuse from April 2004. Technically, reports under EGPA were

---

<sup>30</sup> This Act was passed on 18 November 2003, but the provisions relevant here (in Part 4 of the amending Act) commenced on 19 April 2004. Under ss 365 and 366 (after amt from 146A and 146B, the teacher made the report to the principal; the principal was then required to report to the CE's nominee; the nominee was then required to report to the police: overall, a series of four steps in the reporting chain (s 146A). For non-State schools, there were only three steps (teacher – principal or director of school's governing body – police): s 146B.

<sup>31</sup> The new 2004 obligation was motivated by the findings of the 2003 Report Of The Board Of Inquiry Into Past Handling Of Complaints Of Sexual Abuse In The Anglican Church Diocese Of Brisbane (O'Callaghan and Briggs, 2003), and in substance was primarily directed at managing educational authorities' legal liability in cases of sexual abuse of students by school staff, rather than being concerned with a broader child protection agenda. The explanatory notes to the Education and Other Legislation (Student Protection) Amendment Bill 2003 state that the object of these provisions is to ensure there is an appropriate response to complaints of sexual abuse of school children by school-based employees. The Bill was motivated by the report of a Ministerial Taskforce which was formed to act on the recommendations of the Anglican Church Report (ACR). The explanatory notes observe that the ACR 'highlighted the issue of sexual abuse in schools and weaknesses in existing systems for checking and monitoring the suitability of teaching and non-teaching staff to work with children and for responding to complaints of sexual abuse perpetrated in school settings.'

meant to be made to police rather than the Department. However, it is possible that some of these reports were made to both police and the Department. In addition, it is unlikely that teachers would restrict their reports of sexual abuse to those cases where the suspected perpetrator was a school staff member.<sup>32</sup> It seems reasonable to hypothesise that the new duty, albeit limited, would have produced an increase in reports by teachers to the Department about other cases of suspected sexual abuse; that is, suspected cases beyond those specified in EGPA.

### **Minor change to name of legislation (commencing 11 August 2006)**

There was no change to this situation until 2006, when the title of legislation changed to the *Education (General Provisions) Act 2006* (No. 39) commencing 11 August 2006. The key provisions were renumbered ss 364-366, with no change to their content.

### **Minor change to clarify children who were the object of the legislation's concern**

Sections 365 and 366 were amended by the *Education and Training Legislation Amendment Act 2009* (No 40) to clarify that the duty applied to 'any of the following' who the staff member was aware or reasonably suspected had been sexually abused by another person who is an employee of the school –

- A student under 18 years attending the school;
- A pre-preparatory age child registered in a pre-preparatory learning program at the school;
- A person with a disability who is being provided with special education at the school.

### **Major amendment to require reports of all cases of sexual abuse, and likely future sexual abuse (commencing 9 July 2012)**

Substantial change occurred in 2012. The uniquely restricted position for teachers' reporting of child sexual abuse was amended in 2012 by the *Education and Training Legislation Amendment Act 2011* (Qld) (No 39), which commenced on 9 July 2012. The key changes, in Part 3 of the amending Act, were:

1. To define (non-exhaustively) the concept of 'sexual abuse';
2. To extend the reporting duty to all suspected cases of sexual abuse, without limiting the class of reportable cases by perpetrator;
3. To extend the reporting duty to suspected 'likely sexual abuse' (new ss 365A and 366A);
4. To create in State schools a more direct chain of reporting (teacher to principal to police officer (3 steps)); previously teacher to principal to CE's nominee to police (4 steps))

---

<sup>32</sup> Research has shown that teachers almost unanimously believed they were required by legislation to report all cases of child sexual abuse: Mathews, Walsh, Butler and Farrell 2009.

5. To enable delegation of the reporting function by a non-State school's governing body director, both where the governing body has only one director (new s 366B(1) and (2)), and where there are more than one director (new s 366B(3) and (4)).

It can be expected that these changes influenced an increase in reports by teachers of child sexual abuse.

#### **1.5.4.3. Current position: Queensland**

##### **Current position for doctors and nurses under the Public Health Act 2005**

There have been no further changes since 2005, apart from the value of the penalty due to change in the definition of 'penalty unit' (see Table 6).

In sum, the changes to the *Public Health Act* can be expected to have had a major impact on reporting of all forms of abuse and neglect by doctors and nurses since 31 August 2005.

##### **Current position for teachers**

Under the current law, the key provisions are in Chapter 12 Part 10 (ss 364-366B). Section 364 defines relevant terms, including 'employee' and 'sexual abuse'. Unlike the other Queensland legislation (PHA), and in contrast to all other Australian jurisdictions except WA, 'sexual abuse' is defined in s 364 in extensive conceptual terms which do not include plain explanations of the kinds of acts included – namely:

'sexual abuse' includes sexual behaviour involving the relevant person and another person in the following circumstances—

- (a) the other person bribes, coerces, exploits, threatens or is violent toward the relevant person;
- (b) the relevant person has less power than the other person;
- (c) there is a significant disparity between the relevant person and the other person in intellectual capacity or maturity.

Sections 365 and 366 set out the duty to report sexual abuse for staff members of State and non-State schools respectively. This duty applies to suspected cases of sexual abuse that have already occurred, or which are occurring. Sections 365A and 366A set out the duty for staff members of State and non-State schools respectively to report suspected *likely* sexual abuse. This duty applies to suspected cases of sexual abuse that have not yet occurred, but which are thought likely to occur (an example is where the suspicion arises by observing the child being groomed for abuse).

In the case of ss 365 and 366, the state of mind which activates the duty to report exists when the staff member 'becomes aware, or reasonably suspects, in the course of the staff member's employment at the school'. In the case of ss 365A and 366A, the state of mind which activates the duty to report exists when

the staff member 'reasonably suspects, in the course of the staff member's employment at the school'. The report must be written, and provided immediately (365(2); 365A(2); 366(2); 366A(2)). For suspected cases of past and present abuse, a penalty for noncompliance exists of 20 penalty units (\$2200).<sup>33</sup> However, no penalty is attached to the obligation to report suspected likely abuse.<sup>34</sup>

Immunity from civil, criminal and administrative proceedings in relation to a report made in good faith is conferred (ss 365(6) and (7), 365A(8) and (9), 366(5) and (6), and 366A(7) and (8)). Confidentiality of the reporter's identity is not expressly conferred by EGPA; arguably, it also is not conferred by the *Child Protection Act 1999* (Qld) s 186, which applies to those who make reports directly to police, the CEO of the Department administering the CPA, or an authorized officer.<sup>35</sup>

### **Important note**

In 2014, the *Child Protection Reform Amendment Act 2014* (Qld) was passed, which will make substantial changes to Queensland's mandatory reporting legislation. These changes will shift Queensland's position towards the current position in Victoria. The changes will broaden some mandatory reporting duties, but will narrow others. The changes also will introduce a more formal statutory footing for differential response pathways.

---

<sup>33</sup> Under the Penalties and Sentences Act 1992 (Qld), a penalty unit is \$110: s 5(1)(d).

<sup>34</sup> **Reporting procedures.** Reports must contain certain details as set out in the *Education (General Provisions) Regulations 2006* (Qld) (r 68 for past/present; r 68A for suspected likely abuse). In **State schools**, for past/present and suspected likely abuse respectively, reports must be made to the principal or the principal's supervisor (365(2); 365A(2)); this person must then give a copy of that report to a police officer (365(4); 365A(5)). If the person suspecting abuse is the principal, the principal must give a written report to a police officer (365(2A); 365A(3)). If the report is about suspected abuse by a State school employee, a report must also be given to a person nominated by the chief executive (365(4A) and (5); 365A(6) and (7)). In **non-State schools**, for past/present and suspected likely abuse respectively, reports must be made to the principal or a director of the school's governing body (366(2); 366A(2)); this person must then give a copy of that report to a police officer (366(4); 366A(6)). If the person suspecting abuse is the principal, the principal must give a written report to a police officer (366(2A); 366A(3)) and to a director of the school's governing body (366(2B); 366A(4)).

<sup>35</sup> Technically, there may therefore be a gap in the EGPA provisions in the lack of an express provision of confidentiality. The CPA s 186 arguably does not confer confidentiality on a report made under EGPA to a school principal because under Schedule 3 of the CPA, an 'authorised officer' is defined as 'a person holding office as an authorised officer under an appointment *under this Act*' (authors' emphasis). A school principal does not hold office under the CPA and so a teacher making a report to the principal may not be satisfactorily protected.

**Figure 1.4: Timeline showing key developments, Queensland, 2003-2012**

## 1.5.5. South Australia

### 1.5.5.1. Original position at 1 January 2003: South Australia

#### Children's Protection Act 1993

In South Australia at 1 January 2003, the *Children's Protection Act 1993* (SA) s 11(1) imposed a broad range of mandatory reporting duties for all four classical forms of abuse and neglect. 'Abuse or neglect' was defined in s 6(1) to include:

- (a) sexual abuse; or
- (b) physical or emotional abuse, or neglect, to the extent that:
  - (i) the child has suffered, or is likely to suffer, physical or psychological injury detrimental to the child's wellbeing; or
  - (ii) the child's physical or psychological development is in jeopardy

Therefore, there was a significance threshold for all types of abuse/neglect other than sexual abuse.

Section 11(1)(a) imposed the reporting duty on a designated person who 'suspects on reasonable grounds that a child has been or is being abused or neglected'. In addition, s 10 included within the concept of 'abuse or neglect' 'a reasonable likelihood, in terms of s 6(2)(b), of the child being killed, injured, abused or neglected by a person with whom the child resides'.<sup>36</sup> Therefore, there was also a qualified duty to report suspected risk of future abuse/neglect.

Section 11(1) imposed the duty when the suspicion was formed in the course of the person's work (whether paid or voluntary) or of carrying out official duties. Immunity was conferred by s 12. Confidentiality was conferred by s 13. The penalty for noncompliance was \$2500.

Section 11(2) imposed the duty on a broad range of professionals:

- (a) medical practitioners
- (ab) pharmacists
- (b) registered or enrolled nurses
- (c) dentists
- (d) psychologists
- (e) police

---

<sup>36</sup> Section 6(2)(b) provided that 'a child is at risk if a person with whom the child resides (whether a guardian of the child or not) (i) has threatened to kill or injure the child and there is a reasonable likelihood of the threat being carried out; or (ii) has killed, abused or neglected some other child or children and there is a reasonable likelihood of the child in question being killed, abused or neglected by that person'.

- (f) community corrections officers
- (g) social workers
- (h) teachers in any educational institution including a kindergarten
- (i) approved family day care providers
- (j) employees and volunteers in government departments or local government or non-government agencies providing health, welfare, education, child care or residential services wholly or partly for children, whether being a person who (i) is engaged in actual delivery of those services; or (ii) holds a management position.

#### **1.5.5.2. Key changes, 2013-12: South Australia**

There have been no substantial, significant changes to the legislation from 2003 to 2012.<sup>37</sup> However, some changes have occurred which may influence reporting practice, especially the addition of new mandated reporter groups.

#### ***Increased penalty, and new mandated reporters from religious organisations, and sporting or recreational organisations (commencing 31/12/2006)***

The *Children's Protection (Miscellaneous) Amendment Act 2005 (SA) (No 76) s 10(1)* increased the penalty to \$10,000. It may be expected that this may produce more defensive reporting from 2007 onwards, but data analysis will indicate whether or not this appears to have occurred.

The *Children's Protection (Miscellaneous) Amendment Act 2005 s 10(2)* also added new categories of mandated reporters as follows:

- (ga) a minister of religion;
- (gb) a person who is an employee of, or volunteer in, an organization formed for religious or spiritual purposes;

However, a limit was placed on clergy's mandated reporting duty by the 2005 Act s 10(5) inserting a new s 11(4) as follows:

---

<sup>37</sup> Although it is interesting to note that the *Children's Protection (Implementation of Report Recommendations) Amendment Act 2009 (No 65)* (commenced 31 December 2009), which made insubstantial amendments to the wording of s 11(2)(j), also inserted a new s 11(6), which makes it an offence to threaten or intimidate, or cause damage, loss or disadvantage to a mandated reporter because the person has made or proposes to make a report (maximum penalty \$10,000).

- (4) This section **does not** require a priest or other minister of religion to divulge information communicated in the course of a confession made in accordance with the rules and usages of the relevant religion.

In addition, s 10(4) added to s 11(2)(j) **'sporting or recreational'** organisations to the list of services included in the mandatory reporting organisations.

These changes may be expected to produce an increase in reports from these groups of professionals.

### **1.5.5.3. Current position: South Australia**

The duty applies to report reasonable suspicions of all forms of abuse and neglect (but not exposure to domestic violence) with a significance threshold applied to all forms except sexual abuse, requiring the child to have suffered, or to be likely to suffer, physical or psychological injury detrimental to the child's wellbeing; or to the extent that the child's physical or psychological development is in jeopardy. The duty is applied to a very broad range of persons. There is a somewhat limited duty to report suspected risk of future abuse and neglect. Immunity is conferred by s 12. Confidentiality is conferred by s 13. The penalty is \$10,000.

**Figure 1.5: Timeline showing key developments, South Australia, 2003-2012**

## 1.5.6. Tasmania

### 1.5.6.1. Original position at 1 January 2003: Tasmania

At 1 January 2003, the *Children, Young Persons and Their Families Act 1997* (Tas) s 14(2) imposed a broad range of mandatory reporting duties for all four classical forms of child abuse and neglect.<sup>38</sup>

**Section 3(1)** defined ‘abuse or neglect’ as meaning:

- (a) sexual abuse; or
- (b) physical or emotional injury or other abuse, or neglect, to the extent that:
  - (2) the injured, abused or neglected person has suffered, or is likely to suffer, physical or psychological harm detrimental to the person’s wellbeing; or
  - (3) the injured, abused or neglected person’s physical or psychological development is in jeopardy.

Therefore, there was a significance threshold for all types of abuse and neglect other than sexual abuse. This was conceptualised in the same way as the South Australian provision.

Section 14(1) imposed the duty on a very broad range of professionals whether paid or voluntary (see below). Section 14(2) imposed the reporting duty on any of these designated persons who ‘believes, or suspects, on reasonable grounds, or knows, (a) that a child has been or is being abused or neglected; or (b) that there is a reasonable likelihood of a child being killed or abused or neglected by a person with whom the child resides’. Section 14(2) imposed the duty when the suspicion was formed in the course of the person’s work (whether paid or voluntary) or of carrying out official duties. Immunity was conferred by s 15.<sup>39</sup> Confidentiality was conferred by 16. The penalty for noncompliance was 20 penalty units which at the time equated to \$2000 as a penalty unit was \$100 (see Appendix; this was increased in 2007 to \$120; hence \$2400).

#### **14. Informing of concern about abuse or neglect**

- (1) In this section, ‘prescribed person’ means –
  - (a) a registered medical practitioner; and
  - (b) a nurse, within the meaning of the Nursing Act 1995; and

---

<sup>38</sup> ‘Child’ was defined as meaning a person under 18 years of age.

<sup>39</sup> Section 15 was later repealed 28 June 2011; amended by Children, Young Persons and Their Families Amendment Act 2011 (No 15) comm 28 June 2011; and was replaced by the Children, Young Persons and Their Families Amendment Act 2011 (No 15) inserting s 101A, comm 28 June 2011).

- (c) a person who is registered as a dentist, dental therapist or dental hygienist under the Dental Practitioners Registration Act 2001; and
- (d) a registered psychologist, within the meaning of the Psychologists Registration Act 1976; and
- (e) a police officer; and
- (f) a departmental employee, within the meaning of the Police Regulation Act 1898; and
- (g) a probation officer appointed under section 4 of the Probation of Offenders Act 1973; and
- (h) a principal and a teacher in any educational institution (including a kindergarten); and
- (i) a person who provides child care, or a child care service, for fee or reward; and
- (j) a person concerned in the management of a child care service licensed under Part 6 of the Child Welfare Act 1960; and
- (k) any other person who is employed or engaged as an employee for, of or in, or who is a volunteer in –
  - (i) a Government Agency that provides health, welfare, education, child care or residential services wholly or partly for children; and
  - (ii) an organisation that receives any funding from the Crown for the provision of such services; and
- (l) any other person of a class determined by the Minister by notice in the Gazette to be prescribed persons.
- (2) If a prescribed person, in carrying out official duties or in the course of his or her work (whether paid or voluntary), believes, or suspects, on reasonable grounds, or knows –
  - (a) that a child has been or is being abused or neglected; or
  - (b) that there is a reasonable likelihood of a child being killed or abused or neglected by a person with whom the child resides –

the prescribed person must inform the Secretary of that belief, suspicion or knowledge as soon as practicable after he or she forms the belief or suspicion or gains the knowledge.

### **1.5.6.2 Key changes, 2003-12: Tasmania**

#### **Minor changes**

Some features of the Tasmanian context have not changed in this period, such as the definitions in s 3. Other relatively minor changes have occurred. The penalty changed slightly in 2007 from a maximum of \$2000 to \$2400 (see Table 6).

#### **Substantial changes**

However, there have been some more substantial changes. These include the addition of two new types of abuse and neglect which must be reported (new duties to report exposure to domestic violence, and a duty

to report prenatally that a child born is reasonably likely to suffer abuse/neglect or to require medical treatment; new reporter groups; and new report destinations.

### **New duty to report exposure to family violence (commencing 30 March 2005)**

Schedule 2 of the *Family Violence Act 2004 (No 67)* inserted the new duty to report a belief or suspicion on reasonable grounds, or knowledge, that a child 'is an affected child within the meaning of the FVA. This duty was added to s 14(2)(a). The FVA s 4 defined an 'affected child' **very broadly** to mean:

'a child whose safety, psychological wellbeing or interests are affected or likely to be affected by family violence'.

The term 'family violence' was then also defined **very broadly** in the FVA s 7 as –

- (a) any of the following types of conduct committed by a person, directly or indirectly, against that person's spouse or partner:
  - (i) assault, including sexual assault;
  - (ii) threats, coercion, intimidation or verbal abuse;
  - (iii) abduction;
  - (iv) stalking within the meaning of section 192 of the Criminal Code;
  - (v) attempting or threatening to commit conduct referred to in subparagraph (i), (ii), (iii) or (iv); or
- (b) any of the following:
  - (i) economic abuse;
  - (ii) emotional abuse or intimidation;
  - (iii) contravening an external family violence order, an interim FVO, an FVO or a PFVO.

This new duty, and the very wide definitions of 'affected child' and 'family violence' may reasonably be expected to have caused a substantial increase in reports in this category from 2005 onwards.

### **New duty to report prenatally (commencing 1 August 2009)**

This amendment created another new class of abuse or neglect required to be reported. The *Children, Young Persons and Their Families Amendment Act 2009 (No. 22 of 2009)* s 6 inserted a new s 14(2)(c) requiring reports by prescribed persons who believe, or suspect, on reasonable grounds, or know -

- (c) while a woman is pregnant, that there is a reasonable likelihood that after the birth of the child–
  - (i) the child will suffer abuse or neglect, or may be killed by a person with whom the child is likely to reside; or

- (ii) the child will require medical treatment or other intervention as a result of the behaviour of the woman, or another person with whom the woman resides or is likely to reside, **before** the birth of the child.

The first part of the duty aims to protect children from a reasonable likelihood of abuse or neglect or death after birth. The second part of the duty aims to be able to provide medical treatment or other interventions due to prenatal maternal behaviour such as substance abuse, or other prenatal behaviour by the woman or a person with whom the woman lives.

This may reasonably be expected to have caused a substantial increase in reports in this category.

### **Reporting to a Community-Based Intake Service (commencing 1 August 2009)**

The Children, Young Persons and Their Families Amendment Act 2009 (No. 22 of 2009) s 6 made amendments to s 14(2) concerning the person or agency to whom the report must be made. According to these new provisions, reports could be made either to the Secretary, or to a Community-Based Intake Service. This change was made to facilitate the new emphasis on differential response.

This may reasonably be expected to have caused a substantial decrease in reports to the Secretary, especially for less serious cases, and especially for neglect, emotional abuse, and exposure to family violence.

### **Addition of midwives as a reporter group (commencing 1 July 2010)**

Midwives were added as a new reporter group in 2010, when the *Health Practitioner Regulation National Law (Tasmania) (Consequential Amendments) Act 2010* added a new s 14(1)(ba).

This may be expected to have had a slight influence on reporting by this group.

### **1.5.6.3. Current position: Tasmania**

Section 14. Informing of concern about abuse or neglect

- (1) In this section, 'prescribed person' means –
  - (a) a medical practitioner; and
  - (b) a registered nurse or enrolled nurse;
  - (ba) a person registered under the Health Practitioners Regulation National Law (Tasmania) in the midwifery profession;

- (c) a person registered under the Health Practitioners Regulation National Law (Tasmania) in the dental profession as a dentist, dental therapist or dental hygienist; and
- (d) a person registered under the Health Practitioners Regulation National Law (Tasmania) in the psychology profession; and
- (e) a police officer; and
- (g) a probation officer appointed under section 5 of the Corrections Act 1997; and
- (h) a principal and a teacher in any educational institution (including a kindergarten); and
- (i) a person who provides child care, or a child care service, for fee or reward; and
- (j) a person concerned in the management of an approved education and care service, within the meaning of the Education and Care Services National Law (Tasmania), or a child care service licensed under the Child Care Act 2001); and
- (k) any other person who is employed or engaged as an employee for, of or in, or who is a volunteer in –
  - (i) a Government Agency that provides health, welfare, education, child care or residential services wholly or partly for children; and
  - (ii) an organisation that receives any funding from the Crown for the provision of such services; and
- (l) any other person of a class determined by the Minister by notice in the Gazette to be prescribed persons.

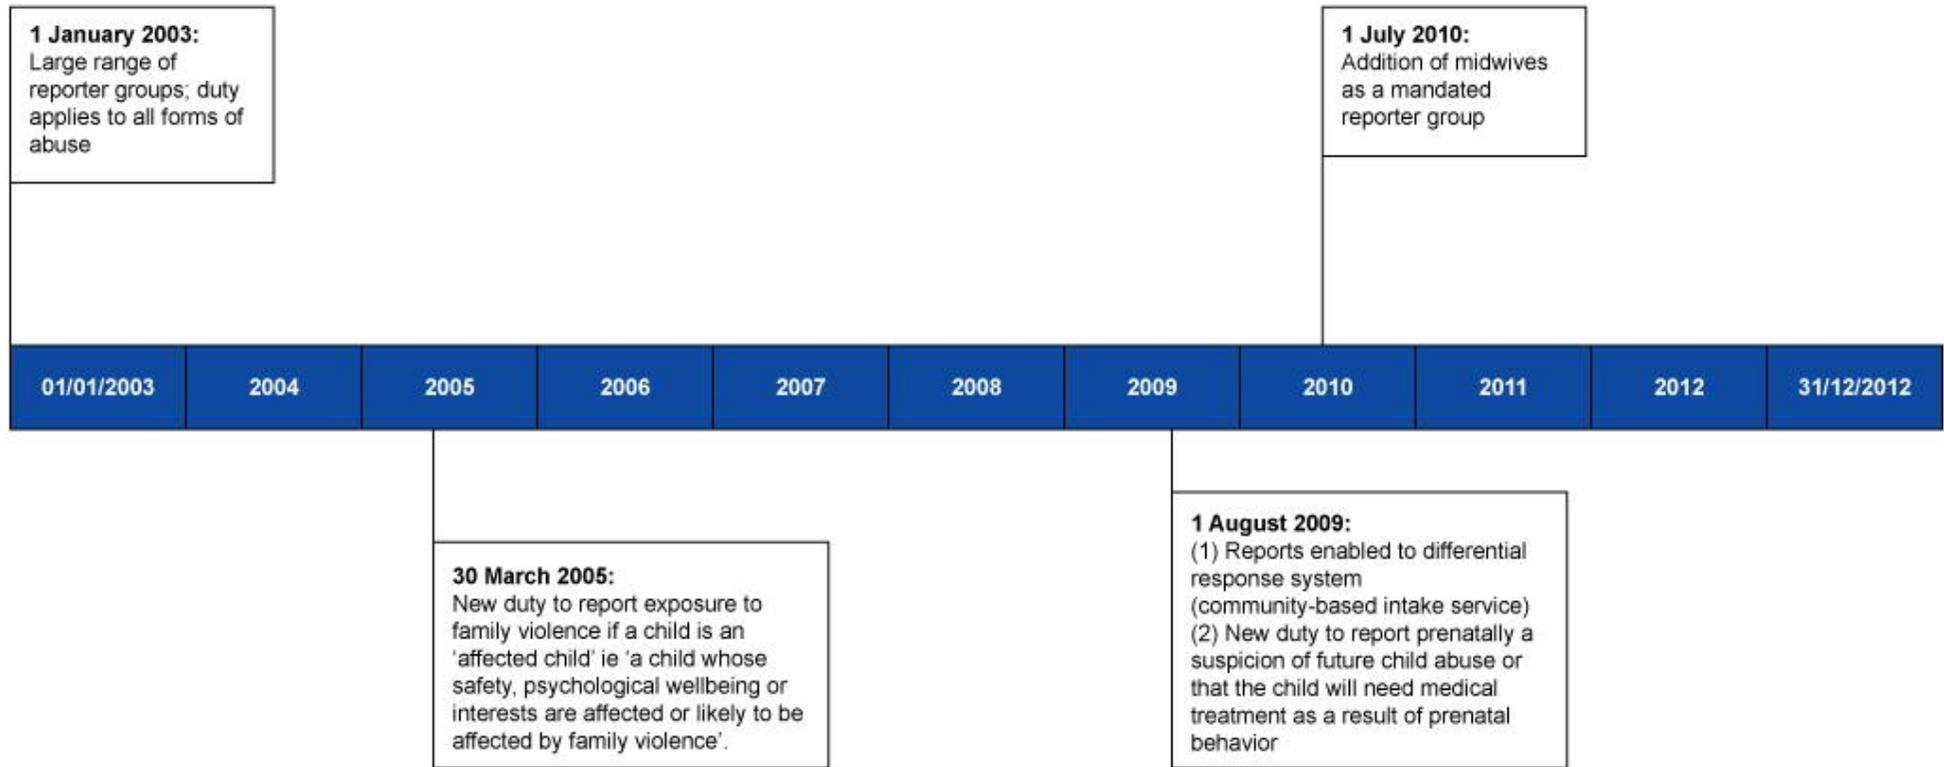

**Section 14(2)** If a prescribed person, in carrying out official duties or in the course of his or her work (whether paid or voluntary), believes, or suspects, on reasonable grounds, or knows –

- (a) that a child has been or is being abused or neglected or is an affected child within the meaning of the Family Violence Act 2004; or
- (b) that there is a reasonable likelihood of a child being killed or abused or neglected by a person with whom the child resides; or
- (c) while a woman is pregnant, that there is a reasonable likelihood that after the birth of the child–

- (i) the child will suffer abuse or neglect, or may be killed by a person with whom the child is likely to reside; or
- (ii) the child will require medical treatment or other intervention as a result of the behaviour of the woman, or another person with whom the woman resides or is likely to reside, before the birth of the child,

the prescribed person must inform the Secretary or a Community-Based Intake Service of that belief, suspicion or knowledge as soon as practicable after he or she forms the belief or suspicion or gains the knowledge.

**Figure 1.6: Timeline showing key developments, Tasmania, 2003-2012**

## 1.5.7. Victoria

### 1.5.7.1. Original position at 1 January 2003: Victoria

#### Children and Young Persons Act 1989

At 1 January 2003, the *Children and Young Persons Act 1989* (Vic) s 64(1A) imposed an obligation to report a 'belief on reasonable grounds that a child is in need of care and protection on a ground referred to in paragraph (c) or (d) of section 63' as soon as practicable after forming the belief, *and* after each occasion on which he or she becomes aware of any further reasonable grounds for the belief. The penalty was 10 penalty units.

Section 63 set out grounds on which a child would be defined as being 'in need of protection'. Section 63(c) and (d) stated (our emphasis):

- (c) the child has suffered, or is likely to suffer, significant harm as a result of **physical injury** **and** the child's parents have not protected, or are unlikely to protect, the child from harm of that type;
- (d) the child has suffered, or is likely to suffer, significant harm as a result of **sexual abuse** **and** the child's parents have not protected, or are unlikely to protect, the child from harm of that type;

Therefore, the duty was limited to two categories of abuse: physical 'injury' and sexual abuse. This made Victoria's reporting duty much narrower than existed in most other jurisdictions. This could be expected to produce a much lower number of reports.<sup>40</sup>

In addition, the duty imposed a threshold of significance of harm, which, uniquely, even applied to sexual abuse. In practice, this would not be expected to reduce reports of sexual abuse, but would have the reasonable intention to limit reports of physical abuse to sufficiently serious cases.

#### **Victoria's parental protection clause: unique Australian provision**

Further, Victoria is the only jurisdiction which has as part of its mandatory reporting provision a clause further limiting the duty to cases in which not only is the harm/abuse condition met, but the reporter must believe 'the child's parents have not protected, or are unlikely to protect, the child from harm of that type'. This clause, in the mandatory reporting context, seems redundant as if the harm or abuse has already happened, then clearly the child's parents did not protect the child from that harm or abuse. Arguably, this

---

<sup>40</sup> The effect on the number of reports is not affected by the discussion on the scope of subsection (c) in Appendix 1 below, as even if the broader view is correct, there would be relatively few cases of neglect causing such a degree of physical injury.

element of Victoria's provision is unsatisfactory. The different conceptual nature of Victoria's provisions seems to stem from these provision being grounded in situations where a child can be defined as being 'in need of protection' – and hence being able to be subject to formal court orders relating to child protection - rather than a true mandatory reporting provision, which is aimed merely at a preliminary identification by designated professionals of cases of abuse/harm, for the related subsequent purpose of government agencies assessing the child's situation and what, if anything, needs to be done to help the child, and the family, including but not limited to the making of child protection orders. The two types of provisions are therefore conceptually different: the mandatory reporting provision focuses on the identification of the child who has suffered abuse or harm. It differs from the 'in need of protection' provision which focuses on the condition required to warrant government agency intervention and hence the justifiable scope of State intervention. The 'able parent' assessment for mandated reporters is arguably not appropriate in a mandatory reporting provision. Not only does it possess a different conceptual nature; it is asking more of a mandatory reporter than is reasonably possible (at least in many cases), and is beyond their reasonable capacity, skill and appropriate professional role. In no other jurisdiction is the mandated reporter expected to undertake such an assessment.

It is unlikely that in practice, reporters would be making such assessments at all, or even if they were, to conclude that a seriously physically or sexually abused child had in fact been protected by their parents from harm or would be in future.<sup>41</sup> Accordingly, it is not likely that this qualification would reduce the

---

<sup>41</sup> There may be some cases where the child may have been harmed by a third party (that is, not one of the child's parents) and the child's parents are able to protect the child from future harm; but even in these cases, the reporter would need to also have knowledge of these circumstances to prevent the duty being activated. Moreover, the types of case in which these circumstances can be readily conceived are not the types of case of child physical abuse which were the target of mandatory reporting laws. An example might be a situation where a child has been physically injured by a school peer, and the child's parent knows of this, the child's parent has taken action to prevent further harm to the child, and the reporter knows all these facts. Yet, the type of case of physical injury to a child which was the target of mandatory reporting laws involves a situation of severe harm to a highly vulnerable child in which the parent is the perpetrator, and the reporter may or may not know this, and may have had no or little prior interaction with the child's parent. To impose a general limit on the activation of a mandatory reporting duty by requiring the reporter to calculate the parent's previous or future protective capacity relating to the child would defeat the purposes of a mandatory reporting provision. These are: to enable identification of severe abuse cases by professionals outside the child's family; to enable expert assessment of the child's (and the family's) situation; to determine what support the child (and family) needs; to facilitate that support; and to take any further action if necessary against the perpetrator of the serious physical or sexual abuse. It is beyond the power and capacity of mandated reporters to engage in such investigative tasks in most cases of serious physical

number of reports. Nevertheless, data analysis may indicate whether this unique qualification appears to affect reporting practice.

Confidentiality was conferred by s 64(4). Immunity was conferred by s 64(3)(a) (professional ethics) and (b) (other liability).

The obligation was imposed on a **wide range of professionals, as follows:** (note that seven of the 14 subsections were operational at 1 January 2003; three had commenced on 4 November 1993; four commenced on 18 July 1994; seven **others had not commenced at 1 January 2003**).<sup>42</sup>

Section 64(1C): Sub-section (1A) [the duty to report] applies to a person referred to in any of the following paragraphs on and from the relevant date—

- (a) a registered medical practitioner within the meaning of the Medical Practice Act 1994;
- (b) a registered psychologist within the meaning of the Psychologists Registration Act 2000;
- (c) a person registered under the Nurses Act 1993;
- (d) a person registered as a teacher under Part III of the Education Act 1958 or permitted to teach under that Part (including by virtue of section 44(4) and (5) of that Act);
- (da) a person appointed to an office in the teaching service under the Teaching Service Act 1981 or employed under Division 4 of Part II of that Act;
- (db) a person employed under section 15B(1)(a)(i) of the Education Act 1958;
- (e) the head teacher or principal of a State school within the meaning of the Education Act 1958 or of a school registered under Part III of that Act;
- (f) the proprietor of, or a person with a postsecondary qualification in the care, education

---

harm, and it is also beyond parental power to undertake some of these tasks. This applies even more clearly to cases of sexual abuse. See further Table 1.7.

<sup>42</sup> Section 64(1C)(a), (c) and (i): Government Gazette 28 October 1993, page 2932: The Governor in Council ordered that 4 November 1993 be the date fixed for the purposes of paragraphs (a), (c) and (i) of section 64(1C) of the Act (ie applying mandatory reporting duty to medical practitioners, nurses, and police officers). Section 64(1C)(d), (da), (db) and (e): Government Gazette 14 July 1994, page 1977: The Governor in Council ordered that 18 July 1994 be the date fixed for the purposes of paragraphs (d)(da)(db) and (e) (ie applying mandatory reporting duty to teachers and school principals).

- or minding of children who is employed by, a children's service to which the Children's Services Act 1996 applies or a person nominated under section 16(2)(b)(iii) of that Act;
- (g) a person with a post-secondary qualification in youth, social or welfare work who works in the health, education or community or welfare services field and who is not referred to in paragraph (h);
  - (h) a person employed under Part 3 of the Public Sector Management and Employment Act 1998 to perform the duties of a youth and child welfare worker;
  - (i) a member of the police force;
  - (j) a probation officer;
  - (k) a youth parole officer;
  - (l) a member of a prescribed class of persons.

Some of these categories had been proclaimed, and so the following groups (essentially, doctors, nurses, police, teachers and principals) were mandated reporters at 1 January 2003:

These groups had been proclaimed effective 4 November 1993:

- (a) a registered medical practitioner within the meaning of the Medical Practice Act 1994;
- (c) a person registered under the Nurses Act 1993;
- (i) a member of the police force;

These groups had been proclaimed effective 18 July 1994:

- (d) a person registered as a teacher under Part III of the Education Act 1958 or permitted to teach under that Part (including by virtue of section 44(4) and (5) of that Act);
- (da) a person appointed to an office in the teaching service under the Teaching Service Act 1981 or employed under Division 4 of Part II of that Act;<sup>43</sup>
- (db) a person employed under section 15B(1)(a)(i) of the Education Act 1958;<sup>44</sup>

---

<sup>43</sup> In essence, those appointed to offices in the teaching service, and temporary employees.

<sup>44</sup> Under the Education Act 1958 s 5, 'non-teaching staff' are defined as teacher aides to assist teachers, teacher assistants to assist teachers in special developmental schools, and rural school aides to assist teachers in rural primary schools. Section 15B(1)(a)(i) states that a council may employ any 'teaching staff' on a part-time or sessional basis. Read together, the provisions and their operation with subsection (db) of the reporting legislation

- (e) the head teacher or principal of a State school within the meaning of the Education Act 1958 or of a school registered under Part III of that Act;

However, several of these categories had not been proclaimed and so the following groups were **not** mandated reporters at 1 January 2003:

- (b) a registered psychologist within the meaning of the Psychologists Registration Act 2000;
- (j) a probation officer;
- (f) the proprietor of, or a person with a postsecondary qualification in the care, education or minding of children who is employed by, a children's service to which the Children's Services Act 1996 applies or a person nominated under section 16(2)(b)(iii) of that Act;
- (g) a person with a post-secondary qualification in youth, social or welfare work who works in the health, education or community or welfare services field and who is not referred to in paragraph (h);
- (h) a person employed under Part 3 of the Public Sector Management and Employment Act 1998 to perform the duties of a youth and child welfare worker;
- (k) a youth parole officer.

#### **1.5.7.2. Key changes, 2013-12: Victoria**

##### **Children, Youth and Families Act 2005 (relevant provisions commenced 23 April 2007)**

The *Children and Young Persons Act 1989* (No. 56 of 1989) was repealed on 23 April 2007 by s 601 of the *Children, Youth and Families Act 2005*, No. 96/2005. The CYFA 2005 incorporated the mandatory reporting provisions in Chapter 4 (Children in need of protection) and Part 4.4 (Reporting) (s 162, 182 ff).

The new legislation made no substantive changes to mandatory reporting provisions.<sup>45</sup> There was no change to the types of abuse that must be reported (provisions renumbered – now s 162(1)(c) and (d) for physical injury and sexual abuse respectively) or the nature of the reporting duty, for example, the state of

---

**would** include as mandated reporters part-time or sessional teachers including assistant teachers, teachers on a special staff, and students in training, but **would not** include teacher aides or teacher assistants.

<sup>45</sup> However, note that the new s 184(4) specified that 'For the purposes of this section, a belief is a belief on reasonable grounds if a reasonable person practising the profession or carrying out the duties of the office, position or employment, as the case requires, would have formed the belief on those grounds'.

mind required to activate the reporting duty.<sup>46</sup> The definition of 'child' as a person under 17 was not amended (s 3). However, it is significant that s 31 enabled significant concerns regarding a child's wellbeing to be referred to a community-based child and family service. This was an aspect of the differential response mechanism built into the legislation at this time.<sup>47</sup>

There were no changes to mandated reporter groups as when enacted, no further groups were gazetted as mandated reporters. The provisions were renumbered as follows in s 182(1)(a)-(l):<sup>48</sup>

- (a) a registered medical practitioner;

---

<sup>46</sup> The state of mind activating the reporting duty in s 184(1) was not altered by the new CYFA 2005. The provision still read: 'A mandatory reporter who, in the course of practicing his or her profession...forms the belief on reasonable grounds...must report'. Note that a new s 184(4) was inserted, stating that 'a belief is a belief on reasonable grounds if a reasonable person practising the profession...would have formed the belief on those grounds'. The explanatory memorandum to the bill states that Clause 184(4) 'clarifies the meaning of a belief on reasonable grounds in relation to mandatory reporters' (Children, Youth and Families Bill, Explanatory Memorandum, p 40). On one view (personal communication, Graham Brewster, 25 November 2013), s 184(4) introduces an objective 'reasonable person' test *to require of a reasonable practitioner that they actually form the belief in the relevant circumstances* to circumvent the problem of a reporter claiming they did not have a reasonable belief as an excuse for not reporting. But, the provision does not state this, and arguably only articulates the circumstances under which a reasonable belief that is *already formed* by a reporter will be deemed to be a reasonable belief, as opposed to one that is unreasonable. Hence, it does not appear to introduce a new, higher, requirement on the reporter to form a belief that a reasonable practitioner would, in any given circumstances.

<sup>47</sup> The Child and Family Information, Referral and Support Teams (ChildFIRST) system enabled individuals who have a significant concern about a child's wellbeing to refer their concern to ChildFIRST for help, rather than reporting to the department responsible for child protection (*Children, Youth and Families Act 2005* (Vic) s 31). This provision complements the mandatory reporting provisions, where reports of a child being 'in need of protection' must be made to the Secretary of the Department (s 184). Children and families who are referred to ChildFIRST are assessed and may be offered home-based family support or referred to other health and welfare services (s 33). ChildFIRST must forward reports to child protection services if the community-based child and family service considers that the situation may involve more significant harm or risk of harm; that is, that the child may be 'in need of protection' (s 33(2)). Similarly, reports made to child protective services may be redirected to ChildFIRST if deemed not to require a child protection response (ss 30, 187).

<sup>48</sup> Section 182(2) was the provision regarding the 'relevant date' and gazetting: (2) In paragraph (f), (g), (h), (i), (j), (k) or (l) of subsection (1) "the relevant date", in relation to a person or class of persons referred to in that paragraph, means the date fixed for the purposes of that paragraph by an Order made by the Governor in Council and published in the Government Gazette.

- (b) a person registered under the Nurses Act 1993;
- (c) a person who is registered as a teacher under the Victorian Institute of Teaching Act 2001 or has been granted permission to teach under that Act;
- (d) the head teacher or principal of a State school within the meaning of the Education Act 1958 or of a school registered under Part III of that Act;
- (e) a member of the police force;
- (f) on and from the relevant date, the proprietor of, or a person with a post-secondary qualification in the care, education or minding of children who is employed by, a children's service to which the Children's Services Act 1996 applies or a person nominated under section 16(2)(b)(iii) of that Act;
- (g) on and from the relevant date, a person with a post-secondary qualification in youth, social or welfare work who works in the health, education or community or welfare services field and who is not referred to in paragraph (h);
- (h) on and from the relevant date, a person employed under Part 3 of the Public Administration Act 2004 to perform the duties of a youth and child welfare worker;
- (i) on and from the relevant date, a registered psychologist;
- (j) on and from the relevant date, a youth justice officer;
- (k) on and from the relevant date, a youth parole officer;
- (l) on and from the relevant date, a member of a prescribed class of persons.

Therefore no change in reporting practice can be expected from this new legislative regime.

### **How harm may be constituted (commenced 23 April 2007)**

A new s 162(2) was inserted by Children, Youth and Families (Consequential and Other Amendments) Act 2006 (No. 48/2006) to clarify that:

‘For the purposes of subsections (1)(c) to (1)(f), the harm may be constituted by a single act, omission or circumstance or accumulate through a series of acts, omissions or circumstances.’

It may be expected that this provision clarified the circumstances in which harm can be caused, while not having a direct influence on the number of reports.

### **Addition of midwives as a new mandated reporter group (commencing 1 July 2010)**

Several statutes have made insubstantial amendments to incorporate changes to professional regulatory mechanisms and definitions.<sup>49</sup> However, the *Statute Law Amendment (National Health Practitioner Regulation) Act 2010 (No. 13 of 2010)*, in amending the definition of ‘nurse’ to add midwives, clearly adds midwives to the list of mandated reporter groups. This Act made several insubstantial amendments to definitions.<sup>50</sup> The more significant amendment was in Schedule item 12, which inserted a definition of ‘midwife’<sup>51</sup> and added midwives to s 182 as a mandated reporter group as a subset of nurses.

12.4 For section 182(1)(b) substitute—

"(b) a nurse;

(ba) a midwife;"

---

<sup>49</sup> The Justice Legislation Amendment Act 2010 (No 30) made consequential amendments (comm 26 June 2010) as follows:

**44 Statute law revision** - (1) In section 184(1) of the **Children, Youth and Families Act 2005**, for "162(c) or 162(d)" substitute "162(1)(c) or 162(1)(d)".

The **Children's Services Amendment Act 2011** (No 80) s 79 (Sch. Item 2) commencing 1 January 2012) inserted a new s 182(fa) as follows:

2.3 In section 182(1), after paragraph (f) insert—

"(fa) on and from the relevant date, the approved provider or nominated supervisor of, or a person with a post-secondary qualification in the care, education or minding of children who is employed or engaged by an education and care service within the meaning of the Education and Care Services National Law (Victoria)".

Similar insubstantial amendments to s 182 were made by the Health Professions Registration Act 2005, No. 97/2005, and the Education and Training Reform Act 2006, No. 24/2006.

<sup>50</sup> For example, item 12.2 stated that In section 3(1)— (a) for the definition of registered medical practitioner substitute—"registered medical practitioner means a person registered under the Health Practitioner Regulation National Law to practise in the medical profession (other than as a student)"; (b) for the definition of registered psychologist substitute—"registered psychologist means a person registered under the Health Practitioner Regulation National Law to practise in the psychology profession (other than as a student)".

<sup>51</sup> **12.3** In section 3(1), insert the following definitions—"midwife means a person registered under the Health Practitioner Regulation National Law—to practise in the nursing and midwifery profession as a midwife (other than as a student); and (b) in the register of midwives kept for that profession; "nurse" means a person registered under the Health Practitioner Regulation National Law to practise in the nursing and midwifery profession as a nurse (other than as a midwife or as a student)".

This may be expected to produce a small increase in reports by this group of professionals, perhaps especially about risk of physical injury.

### **Small change to penalty (commencing 1 July 2012)**

In addition (see Table 6), since 1 July 2012, the penalty has been moderately raised through the combined operation of the *Sentencing Act 1991* (Vic), s 110 and the *Monetary Units Act 2004* s 11(1)(b). The value of a penalty unit for the 2012/13 financial year was \$140.84. So, the maximum penalty since 1 July 2012 has been \$1408. However, it is doubtful whether this increase (if reporters are even aware of it) has influenced reporting behaviour.

#### **1.5.7.3. Current position: Victoria**

There has been no substantial change to reporter groups apart from adding midwives to the existing doctors, nurses, police, teachers and principals, or expansion of the types of abuse and neglect which must be reported (still limited to physical injury and sexual abuse).

#### **1.5.7.4. A note on the scope of s 162(1)(c) in Victoria**

An issue arises as to whether the mandatory reporting duty in subsection (c) applies only to physical injury caused by *physical abuse*, or also to physical 'injury' caused by *neglect*.

This is a complex question to which there may not be a clear and indisputable answer. The provisions are somewhat ambiguous, and key terms (including, most critically, 'physical injury', but also 'physical development', 'health' and 'basic care') are not defined by the Act or by case law. Some contrasting insights are indicated here. It is ultimately a question of statutory interpretation whether the 'physical injury' reporting requirement in (c) applies to any cases of child neglect, and if so, to which cases.

To contextualise the discussion, the subsections regarding physical injury and neglectful circumstances respectively read as follows (in the original 1989 Act s 63(c) and (f), which are unchanged in the 2005 Act s 162(1)(c) and (f)):

'A child is in need of protection if any of the following grounds exist - ...

(c) the child has suffered, or is likely to suffer, significant harm as a result of *physical injury* and the child's parents have not protected, or are unlikely to protect, the child from harm of that type;

(f) the child's *physical development or health* has been, or is likely to be, significantly harmed and the child's parents have not provided, arranged or allowed the provision of, or are unlikely to provide, arrange or allow the provision of, *basic care or effective medical, surgical or other remedial care.*'

(author's emphasis).

### **‘Physical injury’ is not confined to injury caused by physical abuse – it may include some situations of neglect, so that some instances of neglect fall within the mandatory reporting provisions**

While it would be unusual to do so, and would arguably be poor drafting which needs to be remedied, it is arguable that some instances of ‘physical injury’ caused by neglect could also be embraced by subsection (c) which deals generally with physical injury. This argument is supported by the fact that subsection (c) uses the term ‘physical injury’ rather than ‘physical abuse’, and by a claim that this term seems logically capable of applying to cases of ‘physical injury’ caused by neglect where the child is suffering, or is likely to suffer, significant harm as a result of that ‘physical injury’. This argument would conclude, for example, that a child suffering ‘physical injury’ from life-threatening malnutrition, or from failure to receive necessary medical care, would activate the reporting duty in (c).

However, as well as requiring a multiple characterisation of the consequence of the neglect as ‘physical injury’ under (c) in addition to the harm to ‘physical development or health’ as specified in subsection (f), this claim is not as strong as the alternative view.

### **Physical injury is confined to injury caused by physical abuse**

On the alternative view, the term ‘physical injury’ is properly confined to physical abuse, meaning that neglect is never required to be reported under the mandatory reporting provisions, no matter what resulting physical harm may be caused to the child. This conclusion is arguably warranted due to several factors.

First, it is consistent with the legislative scheme normally adopted in child protection statutes, which is to specify which of the four classical forms of abuse and neglect (and any other categories of harm selected as objects of concern by Parliament) must be reported, and under what conditions (usually stating what extent of harm must be present). On this schematic basis, ‘physical injury’ equates with physical abuse and is dealt with in (c); sexual abuse is clearly designated in the next subsection (d); emotional or psychological harm is then dealt with in (e); and neglectful circumstances are addressed in (f). Since it is clearly stated that only grounds (c) and (d) are the subject of mandatory reporting, neglect would seem to be never mandated, regardless of the extent of harm, and nor would emotional abuse.

Second, this conclusion is indicated by approaches to statutory interpretation and common law rules about the construction of statutes. The starting point in statutory interpretation is to determine and give effect to the intention of Parliament as indicated by the language in the statute, and to use accepted rules of statutory interpretation, both legislative and common law, to do so (*Project Blue Sky Inc v Australian Broadcasting Authority* (1998) 194 CLR 355). Applying rules of construction involves identifying the statutory purpose, which can appear from express statements in the statute, by inference from its terms, and by reference to extrinsic materials (*Lacey v Attorney-General (Qld)* (2011) 242 CLR 573). Interpretation

Acts in every State require an interpretation giving effect to the statute's purpose (see eg *Interpretation of Legislation Act 1984* (Vic) s 35(a); *Mills v Meeking* (1990) 169 CLR 214). Other general common law rules include that the Act must be read as a whole (that is, the words of a statute must be read in their context and not in isolation: *K & S Lake City Freighters Pty Ltd v Gordon and Gotch Ltd* (1985) 60 ALR 509; with 'context' including the mischief the statute was intended to remedy: *CIC Insurance Ltd v Bankstown Football Club Ltd* (1997) 141 ALR 618 – this embodies the syntactical presumption of *noscitur a sociis* (the meaning of a word or phrase is to be derived from its context). In this situation, reading the section as a whole and in combination with the duty to notify in s 64 and 184 respectively, it appears that within the scheme of six different kinds of maltreatment or exigency, physical *injury* in (c) is clearly distinguishable from harm caused by neglect in (f), even if the neglect-related harm is to the child's physical *development or health*.

Third, this conclusion is supported by the extrinsic materials including Parliamentary proceedings (which may be consulted to resolve ambiguity: *Interpretation of Legislation Act 1984* (Vic) s 35(b)(ii)). The second reading speech (Mr John, Minister for Community Services, Legislative Assembly, 21 April 1993, p 1005 ff) explains the purpose of the provisions as being to require reports of sexual abuse and severe physical abuse, and makes no mention of emotional abuse or neglect. For example, the Minister states that (author's emphasis):

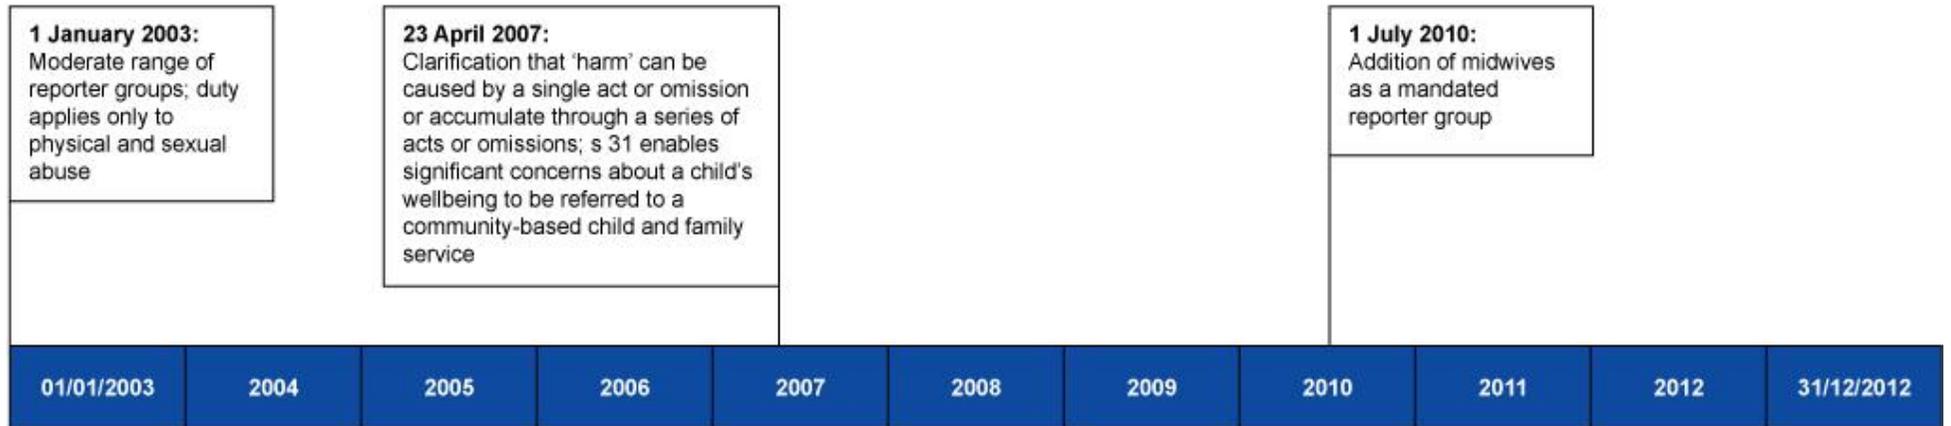

'the provisions are 'considered necessary in view of the extremely low reporting rates of child *sexual abuse* and to a lesser extent child *physical abuse* in this State in comparison with other States which have mandatory reporting. ... Although in recent years Victoria has coped well with overall increases in child abuse reporting rates comparable to the situations in other States, these reports have largely centred on *emotional abuse and neglect* concerns. By contrast, *sexual abuse* reports, and to a lesser extent *physical abuse* reports, have not increased under the present voluntary reporting system at the same rate as they have in other States that have mandatory reporting. As sexual abuse is a hidden problem and is therefore hard to detect, a legal requirement to report such abuse is essential. Indeed the purpose of the proposed amendment is to uncover hidden but serious abuse and to underline *the criminal nature of sexual abuse and severe physical abuse*.'

Other statements in Parliament repeatedly refer to 'physical abuse' and 'physical abuse and sexual abuse' when referring to the new provisions, their impetus, and their purpose: see for example Mrs Garbutt, Legislative Assembly, 29 April 1993, p 1384.

Fourth, this conclusion is suggested by the nature of neglect, as distinct from abuse. As indicated by the terminology in (f), neglect occurs when 'basic care' or effective medical care' is not provided, and if it

reaches a sufficient extent, such neglect may harm the child's 'physical development or health'. This conception of neglect by omission is consistent with that adopted in the general body of literature on child maltreatment. 'Neglect' is usually taken to mean a failure to provide the basic necessities of life, or to provide adequate care to meet a child's basic needs such as nutrition, clothing, shelter, supervision, medical care, education and emotional nourishment (Dubowitz, Back, Starr, & Zuravin, 1993). On this view, the harms caused by neglect – even including cases such as the life-threatening malnutrition situation, and the lack of medical treatment example - are not properly termed 'physical injuries' such as those caused by acts of abuse. Rather, the harms caused by neglect are occasioned through the absence of sufficient conditions for health and development. To the extent that they produce consequences to physical health and wellbeing, they are not so much *injuries* as physical *conditions* which affect the child's physical development or health (such as malnutrition, and the lack of receipt of required medical attention). That is, the neglect has not caused an *injury*, in the same way that physical abuse causes a fracture. It is doubtful whether malnutrition, or failure to receive medical care, are properly called 'physical injuries'; a malnourished child would not normally be described as 'injured' but as suffering from a condition of malnourishment caused by neglect which either has harmed or is likely to harm development or health; similarly, a child who requires medical treatment for a severe infection and who has not received it would not be described as having been physically injured by such neglect, but as having been neglected with a consequent impact on their physical development or health. If this interpretation is correct, these situations would fall within subsection (f) and they would not need to be reported under subsection (c).

**Figure 1.7: Timeline showing key developments, Victoria, 2003-2012**

## 1.5.8. Western Australia

### 1.5.8.1. Original position at 1 January 2003: Western Australia

Western Australia did not have any form of mandatory reporting legislation until 1 January 2009, when the duties described below were introduced.

### 1.5.8.2. Key changes, 2003-12: Western Australia

#### **New mandatory reporting legislation for child sexual abuse only: Children and Community Services Amendment (Reporting Sexual Abuse of Children) Act 2008 (commencing 1 January 2009)**

Western Australia introduced mandatory reporting legislation for child sexual abuse only, with the *Children and Community Services Amendment (Reporting Sexual Abuse of Children) Act 2008* (WA) (No 26 of 2008) commencing on 1 January 2009, inserting provisions into the *Children and Community Services Act 2004* (WA). Hence, from 2003-1 January 2009, there was no mandatory reporting legislation in WA. From 1 January 2009, there has been mandatory reporting, but of very limited scope.

The legislation only applies to child sexual abuse. The key provisions are in Division 9A (ss 124A-124H). Section 124A defines relevant terms. Section 124B(1) sets out the duty. The key reporter groups were doctors, nurses, midwives, police officers, and teachers (which included members of the teaching staff of a community kindergarten). The state of mind which activates the duty to report is 'belief on reasonable grounds'. The duty applies to a reasonable belief of past/presently occurring sexual abuse (not extending to suspected future abuse). In addition, unlike other jurisdictions except Queensland, the term 'child sexual abuse' is defined, albeit non-exhaustively.<sup>52</sup> The penalty for failure to report is \$6000.

The report may be written or oral but if oral the reporter must make a written report as soon as practicable (s 124C) with a penalty of \$3000. Reports must be made to the CEO, a person approved by the CEO, or a member of a class of persons approved by the CEO (s 124B(2)). Reports must contain certain details (s 124C). The CEO must give copies of reports to the police (124D). Confidentiality of the reporter's identity is conferred by s 124F, with a penalty of \$24,000 and imprisonment for 2 years; there are specified exemptions. Immunity from civil, criminal and administrative proceedings in relation to a report made in good faith is conferred (s 129).

---

<sup>52</sup> As (s 5): 'sexual behaviour in circumstances where – (a) the child is the subject of bribery, coercion, a threat, exploitation or violence; or (b) the child has less power than another person involved in the behaviour; or (c) there is a significant disparity in the developmental function or maturity of the child and another person involved in the behaviour'.

The legislation has been amended since commencement, but generally only incidentally to specify the provision of further information in reports made, and to harmonise the provisions with new legislation concerning professional registration.<sup>53</sup>

### **A note on the definition of ‘teacher’: the original 2008 definition**

In the *Children and Community Services Amendment (Reporting Sexual Abuse of Children) Act 2008*, doctors, nurses, police, midwives and teachers were designated as mandated reporters. The legislation defined ‘teacher’ as (s 5):

- (a) a person who, under the *Western Australian College of Teaching Act 2004*, is **registered**, provisionally registered or has a limited authority to teach; or
- (b) a person who is appointed under the *School Education Act 1999* s 236(2) as a
  - (i) member of the teaching staff of a **community kindergarten**; or
- (c) a person who provides instruction in a course that is —
  - (i) mentioned in the *School Education Act 1999* s 11B(1)(a), (b) or (e); and
  - (ii) prescribed for the purposes of this definition;<sup>54</sup> or
- (d) a person who instructs or supervises a student who is participating in an activity that is—
  - (i) part of an educational programme of a school under an arrangement mentioned in the *School Education Act 1999* s 24(1); and
  - (ii) prescribed for the purposes of this definition;<sup>55</sup> or
- (e) a person employed by the chief executive officer as defined in the *Young Offenders Act 1994* s 3 to teach detainees at a detention centre.

---

<sup>53</sup> For example, The *Children and Community Services Amendment Act 2010* (No 49 of 2010) s 72 amended s 124C(3)(c) to delete the words “if known” and insert “if, or to the extent, known”, and added the new subsection (ea) as described above, concerning the information to be provided in the report. Section 85 amended the penalty provisions in 124C(1), (2) and (4) to add the words “a fine of”. The *Health Practitioner Regulation National Law (WA) Act 2010* (No 35 of 2010) s 39 amends the definitions of “doctor”, “nurse” and “midwife” to align those occupational definitions with the new regulatory framework of professional registration. The *Teacher Registration Act 2012* (No 16 of 2012) s 163 amends the definition of “teacher” to align its occupational definition with the new regulatory framework of professional registration.

<sup>54</sup> Essentially, options other than school in the last two years of compulsory education, like vocational education.

<sup>55</sup> Essentially, home schooling.

Therefore, mandated reporters among the teaching profession included registered teachers, those appointed as teaching staff at community kindergartens, instructors in vocational education programs and home schooling programmes, and those who teach in youth detention centres. However, under the original legislation, employees of child care services who do not teach at that centre were not (and still are not) mandated reporters.<sup>56</sup>

Arguably, the original definition would have included as mandated reporters those who were registered teachers working in child care centres. However, at the time, the Act did not expressly include childcare teachers as mandated reporters, and ambiguity arose because the WACTA regulates teaching in schools, rather than child care centres. Amendment in 2012 removed any doubt: **those who teach in child care services are now clearly included as mandated reporters**. Since 2012, there is no doubt that all those who teach in an 'educational venue' must be registered and so fall within the CCSA definition of 'teacher'; since child care centres are now defined as educational venues (see below), and are mandated reporters in that capacity. However, in the child care context, those who simply *provide care* to children are not 'teachers' and so are not mandated reporters.

### **Change in the definition of 'teacher' (commencing 7 December 2012)**

Provisions were enacted in the CCSA by the *Teacher Registration Act 2012* that clarify which persons registered as teachers are mandated reporters. The *Teacher Registration Act 2012* (No 16 of 2012) amended the definition of 'teacher' to **remove** the original ss (b) which included "a person who is appointed under the School Education Act 1999 s 236(2) as a member of the teaching staff of a community kindergarten". However, the relevant provisions in the *Teacher Registration Act* (see ss 4, 6, 7 discussed below) clearly still include **kindergarten teachers (and child care teachers)**, all of whom must be registered to teach in educational venues. Hence, these classes of teachers are still mandated reporters.

### **2012 amendment of 'teacher'**

In 2012 the *Teacher Registration Act 2012* amended the CCSA 2004 s 124A definition of 'teacher' by deleting paragraphs (a) and (b), which stated:

'teacher' means -

---

<sup>56</sup> The *Child Care Services Act 2007* at the time also did not mandated childcare staff. It regulated the provision of child care (rather than education); see also s 4. The *Western Australian College of Teaching Act 2004*, which regulated teaching in schools, did not include childcare staff as 'teachers' and so did not require childcare staff to be registered. See the explanatory memorandum which appears to limit the definition and scope of 'teacher': [http://www.parliament.wa.gov.au/Parliament/bills.nsf/6C1C35600F6FA450C82573A20001DFD7/\\$File/EM%2B-%2BBill%2B257-1.pdf](http://www.parliament.wa.gov.au/Parliament/bills.nsf/6C1C35600F6FA450C82573A20001DFD7/$File/EM%2B-%2BBill%2B257-1.pdf)

- (a) a person who, under the *Western Australian College of Teaching Act 2004*, is **registered**, provisionally registered or has a limited authority to **teach**; or
- (b) a person who is appointed under the *School Education Act 1999* s 236(2) as a member of the teaching staff of a **community kindergarten**;

and inserting a new paragraph (a) so that a ‘teacher’ is defined as:

**a person who is registered under the *Teacher Registration Act 2012*.**

This had the effect that any person who **‘teaches’** at a school, kindergarten, child care centre, detention centre or any place prescribed as an **educational venue**, is a mandated reporter.<sup>57</sup>

This is because under the TRA 2012 s 6, it is an offence to **‘teach** in an **educational venue** unless the person is a registered teacher’.<sup>58</sup> Those who had to be ‘registered teachers’ **include** those who **‘teach’** at child care centres (but does not include those who simply **provide care** at a child care centre). This is because of the definitions of ‘teach’, ‘educational venue’ and ‘educational programme’.<sup>59</sup>

---

<sup>57</sup> Note that under the *Education and Care Services National Law (WA) Act 2012*, ‘education and care service’ is defined as ‘any service providing or intended to provide education and care on a regular basis to children under 13 years of age other than —

- (a) a school providing an educational program to school children in accordance with the School Education Act 1999; or
- (b) a community kindergarten providing an educational program to children in accordance with the School Education Act 1999; or
- (c) a personal arrangement; or
- (d) a service principally conducted to provide instruction in a particular activity; or  
Example: Instruction in sport, dance, music, culture or language or religious instruction.
- (e) a service providing education and care to patients in a hospital or patients of a medical or therapeutic care service; or
- (f) care provided under a child protection law of a participating jurisdiction; or
- (g) a prescribed class of disability service; or
- (h) a service of a prescribed class;

Example: Education and care services to which this Law applies include long day care services, family day care services and outside school hours services, unless expressly excluded.

<sup>58</sup> Under s 7 it is an offence to employ an unregistered person to teach in an educational venue.

<sup>59</sup> ‘Teach’ is defined in s 4 as: ‘to undertake duties in an educational venue that include —

- (a) the **delivery of an educational programme designed to implement a prescribed curriculum** and the assessment of student participation in such an educational programme; or

In sum, this means that among the teaching profession, mandated reporters in Western Australia are those who are registered under the *Teacher Registration Act 2012* and whose duties include delivery of an educational programme in an educational venue. Those who provide care at child care centres but who do not teach at that centre will not be mandated; nor will teacher's aides, teacher's assistants, and student teachers.

### 1.5.8.3. Current position: Western Australia

The duty is limited to sexual abuse, and is applied to a relatively small range of professionals. The duty is also limited by its temporal scope; it applies only to situations of past or currently-occurring sexual abuse, and does not include a requirement to report situations in which a child is believed to be likely to suffer sexual abuse.

- 
- (b) the administration of any such educational programme,  
**but does not include duties of the kind undertaken —**
  - (c) by a teacher's aide or a teacher's assistant, or by a student teacher on practicum placement; or
  - (d) by a person employed or engaged **to provide care** at a child care centre but who is **not** employed or engaged to **teach** at that centre; or
  - (e) by an unpaid volunteer, unless the volunteer is undertaking duties of a kind, or to an extent, prescribed for the purposes of this paragraph; or
  - (f) by such persons, or in such circumstances, if any, as are prescribed.'

'**Educational venue**' is defined in s 4 as 'any of the following — (a) a school as defined in the *School Education Act 1999* s 4; (b) a kindergarten registered under the *School Education Act 1999* Part 5; (c) a **child care centre**; (d) a detention centre; (e) any other place prescribed as an educational venue'. '**Educational programme**' is defined in s 4 as 'an organised set of learning activities designed to enable a student to develop knowledge, understanding, skills and attitudes relevant to the student's individual needs'.

**Figure 1.8: Timeline showing key developments, Western Australia, 2003-2012**

# **Stage 2: Data & Analyses**

## STAGE 2: DATA AND ANALYSES TASMANIA

---

### Introduction, definitions, and notes

The table on p.76 entitled *Key data findings and interpretations* presents a condensed summary of key overall trends and our interpretations of these trends. The *Executive Summary* provides a further refined summary of key trends. As explained in the description of the research project and its approach (**Appendix 1**), these data relate only to **reports by mandated and non-mandated reporters of suspected child abuse and neglect**. Accordingly, the data do **not** relate to reports of general child welfare (child concern reports), although mandated reporters do make such reports. In addition, the data on reports relate to the primary form of abuse or neglect that is the subject of the report; in any given case, a substantiated report may relate to a different type of abuse or neglect than the primary form of maltreatment reported.

**Definitions and practices in Tasmania affect the counts of notifications and investigations.** Significantly, in the case of Tasmania, a qualification must be made in relation to this previous point. As indicated in Appendix 1, Tasmania uses a **caller-defined protocol** when receiving intakes. Essentially, this means that all concerns referred to the child protection agency are initially classed as a ‘notification’ of suspected child abuse and neglect, and not only those related to suspected maltreatment. This will have the effect of inflating the number of notifications in Tasmania. The agency then determines whether an investigation is required. Because this decision whether or not to investigate is taken on this wider class of notifications, the ‘investigation rate’ in Tasmania may appear lower than in some other jurisdictions.

**Change in recording practice.** Further, it is relevant that in Tasmania, a change in recording practice occurred in 2008. Before 2008, every contact regarding a case was recorded as a notification. From 2008 onwards, only the initial contact regarding a case was recorded as a notification. This change can be expected to have influenced a downwards impact on the number of notifications in the period from 2008 onwards relative to the period before 2008, although its precise extent is not known. In addition, changes may have occurred at specific periods in time in coding notifications as ‘not stated’ and ‘other’ rather than as being related to a form of maltreatment, and this may also influence some trends: see the note under ‘Not stated/other’ at the end of this ‘Definitions and notes’ section.

**A further note on nomenclature:** State and Territory legislation about mandatory reporting normally use the terms ‘reporting’ and ‘report’ to denote key concepts and actions in this domain. Government data systems often use the term ‘notification’ to characterize a report of child abuse or neglect, to distinguish such a report from one that is simply a general contact to the agency about a child’s general welfare unrelated to maltreatment. This research project is about reporting of child abuse and neglect. For simplicity, and because

this project is driven by an exploration of legislative mandatory reporting duties regarding child abuse and neglect in practice, our analyses use the term 'report' to describe a report made to the Department about suspected child abuse or neglect which is classed by the government agency as a 'notification'. In the case of Tasmania, this is subject to the qualification explained above. See further **Appendix 1**, including Table 1.

## **Legislative changes of note in Tasmania, 2003-2012**

**1 January 2003:** Large range of reporter groups; duty applies to all sexual abuse, and physical abuse, emotional abuse, and neglect where sufficient detriment to wellbeing has been caused or is likely to be caused.

**30 March 2005:** Duty to report exposure of child to family violence where child's 'safety, psychological wellbeing or interests are affected or likely to be affected by family violence' – family violence defined very broadly. Hypothesis: Substantial increase in reports of family violence, coded as emotional abuse or neglect.

**1 August 2009:** Reports by mandated reporters can be made to a community-based intake service. Hypothesis: Substantial decrease in reports to Dept especially of emotional abuse, neglect, family violence, and even physical abuse.

1 August 2009: Duty to report prenatally where suspect that the child after birth will suffer abuse or neglect, be killed, or will require medical treatment as a result of the mother's behavior, or the behavior of a person with whom the mother resides or is likely to reside. Hypothesis: Slight increase in reports of neglect, physical abuse.

## **Definitions and notes: Tasmania**

The data has been analysed using the following category definitions as provided by Department of Health and Human Services, Tasmania.

**Medical practitioners:** Includes only registered medical practitioners. This includes both general practitioners and specialists in hospitals or in the community.

**Nurses:** Includes registered and enrolled nurses and nurses' aides. Nurses have not been identified as a separate group in the recorded data prior to 2008. Therefore the category of 'other health professional' has been used to represent notifications by nurses for the period 2004-2007. It is unclear which other reporting groups are also captured in the category of 'other health professional'. Accordingly, numbers of notifications for nurses may be inflated in the tables for the period 2004 to 2007.

**Police:** Any member of a federal, state or territory law enforcement agency.

**School personnel:** Any appropriately trained person involved in the instruction of children or providing direct support for this education. This includes teachers, teacher aides, school principals and teachers who work in preschool, kindergarten, primary, secondary, technical, sporting or art and crafts education.

**Child care worker:** Any person engaged in providing occasional, part-time or full-time care for children.

**Social welfare professionals:** Includes social workers, welfare and community workers, counsellors and psychologists.

**Major mandated reporter groups combined:** For the purpose of this research study, and to provide meaningful findings about the proportional contribution to reporting made collectively by the major occupational reporter groups for the Tasmanian government, we conducted some analyses by combining the reporting practice of the major mandated reporter groups. In doing this, we adopted a similar approach to that used for other jurisdictions (see Appendix 1 Research Approach). Accordingly, for Tasmania, the groups outlined above - medical practitioners, nurses, police, school personnel, child care workers, and social welfare professionals - were combined for some analyses to represent the category of 'major mandated reporter groups combined'. Reports by four main groups – police, doctors, nurses and teachers – constitute the majority of reports made by these groups (76%).

**Other reporter groups combined:** All other reporter groups combined not identified above.

**Not investigated:** This category includes reports where the notification outcome is either stated as 'other intervention', 'advice/referral to other agency', and 'no further action/no issue'.

**Other intervention:** Low risk of harm requiring a non-investigatory response. This may include: where low level harm or risk of harm has occurred and immediate advice is given and recorded; where the family needs are still assessed and a case plan is developed; where children are assessed as low risk but still in need; where there are parenting issues or one-off incidents; and where the notification is referred to another section of the Child Protection service because the service is already working with the child.

**Advice/referral to other agency:** This category includes referrals to agencies outside the Child Protection section. This can include other sections within the community services department and child protection services in another jurisdiction. It can also include brief advice and telephone counselling.

**No further action/no issue:** This category is used where there are concerns about the child/ren but there is not risk of harm/actual harm and no departmental action is required. This may include contacts that are police initiated but there are no care and protection issues; where the family has moved interstate; where

the matter is historical and there is no longer contact between the parties; where it is from the family court and the department is already involved.

**Investigated:** Where there are sufficient concerns regarding significant harm or risk of harm to warrant an investigatory response. An investigation is the process of child protection obtaining more detailed information about a child subject of a contact and makes an assessment about the harm or degree of harm to the child and the child's protective needs. In Tasmania, according to information from the Department, an assessment is only classed as an investigation if it includes the interviewing or sighting of the child.

**Substantiated:** No specific definition provided. Taken to be all notifications investigated by the Department and found to have evidence that a child was being abused or at risk of being abused.

**Not substantiated:** No specific definition provided. Taken to be all notifications investigated by the Department and not found to have evidence that a child was being abused or at risk of being abused.

**Emotional abuse:** Emotional abuse refers to a chronic attitude or behaviour directed at a child, or the creation of an emotional environment, which is seriously detrimental to or impairs the child's social, emotional, cognitive, intellectual, psychological and/or physical development resulting from behaviours of family members or other caregivers such as persistent hostility, rejection or scapegoating. In cases of emotional abuse, parents or caregivers may see no relationship between their attitude to the child and the child's behaviour, and so they identify problems in terms of the child. It is important to be aware that emotional abuse refers to the repeated, continual behaviour or the ongoing attitude on the part of the parents or caregivers towards the child. Children can also experience emotional harm when they are not protected from family violence. Children can suffer harm either directly or indirectly. For example: when they witness repeated domestic/family violence; when violence is frequent within the home; and when they are assaulted when attempting to intervene.

**Neglect:** Includes seven sub-categories of neglect: child; physical; medical; supervisory; emotional; educational; and abandonment. Child neglect is the failure to meet the essential needs of a child through inadequate care, supervision and support. It can be difficult to meet all of the needs of a child all the time, but it is persistent neglect, or the failure to provide care that affects their health and well-being, that is of concern. Physical neglect is the failure to provide the necessities to sustain the life or health of the child: the basic needs of food, clothing and shelter. Medical neglect occurs when a parent fails to provide adequate health care. It includes refusing or delaying in seeking medical treatment, failing to give regular medication for chronic conditions such as diabetes or asthma, and failing to take normal preventative measures. Supervisory neglect occurs when parents fail to supervise their child, or to arrange for proper supervision in their absence. Supervisory neglect often occurs where children are left in the care of another child who is

not old enough to be responsible to care for another child. Emotional neglect is failing to provide adequately for a child's emotional and psychological developmental needs. This includes not spending enough time with the child, or not providing the experiences a child needs for their mind and emotions to develop. Educational neglect occurs when the child is not provided with learning opportunities. Abandonment involves leaving a child totally, without arranging for necessary care.

**Physical abuse:** Physical abuse refers to non-accidental injury to a child. Physical abuse may result in a range of injuries from cuts, bruises, burns, soft tissue injuries to dislocations and fractures and caused by a range of acts such as excessive discipline, severe beatings or shakings. It may also include poisoning, attempted suffocation or strangulation and death. Physical abuse includes the deliberate denial of a child's basic needs such as food, shelter or supervision to the extent that injury or impaired development is inevitable.

**Sexual abuse:** Sexual abuse refers to any sexual behaviour between a child and an adult or an older, bigger, or more powerful person for that person's sexual gratification. The range of sexual behaviours that are considered harmful to children includes; any form of sexual touching (fondling genitals, buttocks, breasts, abdomen, thighs; any oral/genital contact; penile or digital penetration); any form of sexual suggestion to children, including the showing of pornographic videos; the use of children in the production of pornographic videos or films; exhibitionism; and child prostitution.

**Not stated/other:** In some years, some referrals were coded not as relating to any of the forms of maltreatment, but as 'not stated' or 'other'. For example, 2008 witnessed a substantial number of approximately 1300 referrals coded not as relating to any of the forms of maltreatment, but as 'not stated', although in subsequent years the number of these referrals declined. Similarly, in 2011 and 2012, there were approximately 1000 referrals coded not as relating to any of the forms of maltreatment, but as 'other'. It is reasonable to proceed on the basis that if a notification was related to suspected abuse or neglect it would have been coded and counted as such; however it is possible that some of these referrals related to neglect or emotional abuse and may partly explain trends in those reports from 2007.

## Key data findings and interpretations: Tasmania

### Key legislative changes and hypotheses

**At 1 January 2003:** Large range of reporter groups; duty applies to all sexual abuse, and physical abuse, emotional abuse, and neglect where sufficient detriment to wellbeing has been caused or is likely to be caused

**30 March 2005: Duty to report exposure of child to family violence** where child's 'safety, psychological wellbeing or interests are affected or likely to be affected by family violence' – family violence defined very broadly - HYPOTHESISE Substantial increase in reports of family violence, coded as emotional abuse or neglect

**1 August 2009: Reports by mandated reporters can be made to a community-based intake service –** HYPOTHESISE Substantial decrease in reports to Dept especially of emotional abuse, neglect, family violence, and even physical abuse

**1 August 2009:** Duty to report prenatally where suspect that the child after birth will suffer abuse or neglect, be killed, or will require medical treatment as a result of the mother's behaviour, or the behaviour of a person with whom the mother resides or is likely to reside – HYPOTHESISE Slight increase in reports of neglect, physical abuse

**Important contextual notes:** as explained in the Introduction, definitions and notes to this section, several features of the Tasmanian context influence counts of notifications and investigations. The *caller-defined protocol (CDP)* will inflate the number of notifications. The narrow definition of '*investigation*' will lower the count of investigations relative to some other jurisdictions which adopt a broader construction. The *change to recording practice (CRP)* in 2008, where only the initial contact regarding a case is counted as a notification, whereas previously all contacts relating to the case were counted as notifications, can also be expected to reduce the number of notifications.

Note also that 2008 witnessed a substantial number of approximately 1300 referrals coded not as relating to any of the forms of maltreatment, but as 'not stated'. In subsequent years the number of these referrals declined. In 2011 and 2012, similarly, there were approximately 1000 referrals coded not as relating to any of the forms of maltreatment, but as 'other'. It is possible that some of these referrals related to neglect or emotional abuse and can partly explain the decline in those reports from 2007 to 2008.

All interpretations made below by the research team need to be read in light of these contextual factors and qualifications.

## GLOBAL TRENDS 2004-2012

Table	Subject	Key findings 2004-2012	Interpretation
1.2	Number of reports by year, by abuse type, with percentage change (all reporter groups combined)	<ul style="list-style-type: none"> <li>Report numbers increase for <b>EA</b> especially 2004-2006 (2020 to 5627) before declining to 4145 in 2008 and stabilising.</li> <li>Overall increase in <b>EA</b> reports (2020 to 5088).</li> <li>Increase in <b>N</b> reports 2004 to 2007 (3807 to 5689), then decline after 2007 and stabilising through 2012 (3775).</li> <li>Substantial decline in <b>PA</b> reports (2090 to 1404).</li> <li>Decline in <b>SA</b> reports (1186 to 959).</li> </ul>	<p><b>EA</b> increase likely due to DV reporting from 2005, and influenced by CDP</p> <p>Neglect decline after 2007 likely due to DR, CRP</p> <p><b>PA</b> decline unusual; possibly due to DR, and possible influence of CRP</p> <p><b>SA</b> decline an interesting outcome and somewhat unusual</p>
1.3	Number of reports by abuse type, and outcome of reports (all reporter groups combined)	<p>Less than one quarter of all reports were investigated (23,078/98,987).</p> <p><b>EA</b> reports were the least likely to be investigated.</p> <p>Of all investigations, approximately 50% were substantiated (11,273/23,078).</p>	<p>Likely due to new MR duty to report EDV and high proportion of EDV reports; also influenced by CDP</p> <p>Strong SR of investigated reports</p>
1.5	Number of reports by abuse type, as a percentage of all reports, by year (all reporter groups combined)	<ul style="list-style-type: none"> <li><b>EA</b>: substantial increase over time in number of reports, and proportion of all reports (22% to 45%). Currently by far the most frequently reported type, followed by <b>N</b> (34%), <b>PA</b> (13%) and <b>SA</b> (9%).</li> <li><b>N</b>: stable reports over time. Reduction in proportion of all reports (42% to 34%).</li> <li><b>PA</b>: decline over time in number of reports (2090 to 1404) and proportion of all reports (23% to 13%).</li> <li><b>SA</b>: slight decline over time in number of reports (1186 to 959) and in proportion of all reports (13% to 9%).</li> </ul>	<p>Likely due to new MR duty to report EDV and due to DR report destination since 2009; also influenced by CDP</p> <p><b>N</b> report stability suggests reporting to DR not proceeding as envisaged</p> <p><b>PA</b> decline an interesting trend; may be being reported to DR</p>
1.8	Number of reports by all major reporter groups combined, compared with other reporter groups combined, with percentage change	<p>Reports by major reporter groups have increased overall by 70%. Most of this increase occurred in 2005 and 2006, with a decline after 2007 and then an upturn from 2011.</p> <p>Reports by other reporter groups have declined by 29%, especially after 2007.</p> <p>Numerically, reports by major reporter groups have always exceeded those made by other reporter groups. This proportion has steadily increase and by 2012 reports by major reporter groups are more</p>	<p>Likely due to new MR duty to report EDV; and influenced by CDP</p> <p>Likely due to DR report destination</p> <p>Likely due to large range of MR groups and broad reporting duty and new MR duty re EDV</p>

GLOBAL TRENDS 2004-2012			
		than twice those by other reporter groups.	
1.10	Number of reports by all major reporter groups combined, compared with other reporter groups combined, by outcome of reports, as a percentage of all reports	Over the decade, 8,245 substantiated reports by major reporter groups; 3,028 by other reporter groups.	Mandated reporters make an unusually strong contribution to casefinding
1.12	Number of reports by reporter group, and outcome of reports, as a percentage of all reports (all reports over 10 year period combined, all abuse types combined)	<ul style="list-style-type: none"> <li>• Reports by police accounted for 3479 substantiated reports (the highest proportion of any group), followed by social workers (2286) and school personnel (1795).</li> <li>• Police made by far the most reports, accounting for one in every three reports. 82% were not investigated.</li> <li>• Mandated reporters make two thirds of all reports.</li> </ul>	Mandated reporters make an unusually high proportion of reports. Police are by far the highest reporter group and the number of reports not investigated suggests some reporting practice that may require change (although this is likely influenced by CDP).
1.16	Number of reports by year, by reporter group, by abuse type, with percentage change	<ul style="list-style-type: none"> <li>• Substantial increase since 2004 in reports of <b>EA</b> especially by police (758 to 3012), whose reports account for nearly the entire increase (2020 to 5088).</li> <li>• Mandated reporters report <b>EA</b> four times as much as nonmandated reporters.</li> <li>• Increase in reports of <b>N</b> 2004 to 2007 (3807 to 5689) followed by decline in 2008 (3175) and stabilisation.</li> <li>• Decline since 2006 in reports of <b>PA</b> by police, teachers, other reporters.</li> <li>• Decline since 2006 in reports of <b>SA</b> by mandated reporters, but also by other reporters. However, there was an upturn in 2005-2007 and a sudden large decline in 2008 before stability in numbers from 2008.</li> </ul>	<p>Increase in <b>EA</b> likely due to new MR duty to report EDV; also possible influenced of CDP</p> <p>N increase difficult to explain without further research; decline likely due to DR and possible impact of CRP</p> <p>Decline in <b>PA</b> reports unusual; possibly being reported to DR, and possible impact of CRP</p> <p>Overall decline in <b>SA</b> reports unusual; possibly being reported to DR but may be explicable by unusual surge 2005-2007; drop in 2008 difficult to interpret completely but likely influenced to some extent by CRP; see also the contextual note on 'not stated' and 'other'.</p>

REPORTS BY TYPE OF ABUSE/NEGLECT 2004-2012			
Table	Subject	Key findings 2004-2012	Interpretation
1.18	Number of reports of	<ul style="list-style-type: none"> <li>• Substantial increase overall from</li> </ul>	Increase in <b>EA</b> likely due to

## REPORTS BY TYPE OF ABUSE/NEGLECT 2004-2012

	emotional abuse by year, by reporter group, with percentage change	<p>2020 in 2004 to 5088 in 2012. Most of this was due to reports by police (758 in 2004 to 3012 in 2012).</p> <ul style="list-style-type: none"> <li>• Sudden increase from 2004 to 2006, especially in reports by police (758 to 3311) and social workers (252 to 691), and other reporters (770 to 1221).</li> <li>• Decline from 2007 to 2008 followed by stabilisation.</li> </ul>	<p>new MR duty to report EDV from 30 March 2005.</p> <p>Decline 2007 to 2008 likely due to alternative report destination, and CRP; see also the contextual note on 'not stated' and 'other'. Stability since (rather than the decline continuing) indicates differential response reporting may not be operating optimally, but may also be influenced by CRP.</p>
<b>1.19</b>	Number of reports of neglect by year, by reporter group, with percentage change	<ul style="list-style-type: none"> <li>• Increase from 2004 to 2007 especially by police and teachers.</li> <li>• Overall decline from 2007 to 2012 (5689 to 3775).</li> <li>• Substantial decrease from 2007 to 2012 especially in reports of N by police (955 to 547) and teachers (921 to 639) and other reporters (2784 to 1549).</li> <li>• However, increase by social workers from 2011 to 2012 (655 to 823).</li> </ul>	Substantial decline overall since 2007 indicates more reports are being made to DR agencies, especially by some groups eg police, teachers, members of the public. CRP may also have influenced this trend. See also the contextual note on 'not stated' and 'other'.
<b>1.20</b>	Number of reports of physical abuse by year, by reporter group, with percentage change	<ul style="list-style-type: none"> <li>• Overall decline from 2004 to 2012 (2090 to 1404).</li> <li>• Substantial decrease from 2006 to 2012 especially in reports of PA by police (499 to 206), nurses (95 to 6), teachers (600 to 465) and other reporters (709 to 371).</li> </ul>	Substantial decline overall since 2006 indicates more reports are being made to DR agencies, especially by some groups eg police, teachers, members of the public. CRP may also have influenced this trend.
<b>1.21</b>	Number of reports of sexual abuse by year, by reporter group, with percentage change	<p>Overall decline from 2004 to 2012 (1186 to 959). Substantial decrease from 2006 to 2012 especially in reports of SA by police (351 to 234), nurses (68 to 4), teachers (226 to 170) and other reporters (595 to 224).</p>	Substantial decline overall especially since 2006 indicates more reports are being made to DR agencies, especially by some groups eg police, teachers, members of the public. CRP may also have influenced this trend.

## REPORTS BY REPORTER GROUPS 2004-2012

Table	Subject	Key findings 2004-2012	Interpretation
<b>1.26.1</b>	Reports by major reporter groups combined, by year, by	<ul style="list-style-type: none"> <li>• Substantial increase in reports of EA (1250 to 4173), and as a</li> </ul>	Substantial increase in reports of EA likely due to

## REPORTS BY REPORTER GROUPS 2004-2012

	abuse type (number and percentage)	<p>proportion of all reports (26% to 51%);</p> <ul style="list-style-type: none"> <li>• Slight increase in reports of <b>N</b> (1666 to 2226) and decline in proportion of all reports (35% to 27%);</li> <li>• Decline in reports of <b>PA</b> (1231 to 1033) and as a proportion of all reports (26% to 13%);</li> <li>• Slight increase in reports of <b>SA</b> (662 to 735) and decline as a proportion of all reports (14% to 9%).</li> </ul>	new duty to report EDV. Decline in reports of <b>PA</b> may be explained by referral to DR agencies, and CRP may also have influenced this trend.
<b>1.26.2</b>	Reports by major reporter groups combined, by year, by outcome of reports (number and percentage)	<p>Substantiation numbers have increased (545 to 889) while percentage has declined overall due to investigations having increased (916 to 1438). Over the decade, 8245 substantiations of 16,019 investigations. Number of reports not investigated has increased from 3893 to 6729.</p>	<p>Strong SR of investigated cases. Increase in reports not investigated likely due to reports of EDV, CRP.</p>
<b>1.26.3</b>	Reports by other reporter groups combined, by year, by abuse type (number and percentage)	<ul style="list-style-type: none"> <li>• Slight increase in reports of <b>EA</b> (770 to 915), and as a proportion of all reports (18% to 30%);</li> <li>• Decrease in reports of <b>N</b> (2141 to 1549) and stable as a proportion of all reports (50%);</li> <li>• Substantial decline in reports of <b>PA</b> (859 to 371) and as a proportion of all reports (20% to 12%);</li> <li>• Substantial decline in reports of <b>SA</b> (524 to 224) and as a proportion of all reports (12% to 7%).</li> </ul>	<p>Decline in <b>N</b> and <b>PA</b> reports may reflect reporting to DR agencies, and possible influence of 2008 CRP; see also contextual note on 'not stated' and 'other'. Decline in <b>SA</b> reports more curious; difficult to explain without further research.</p>
<b>1.26.4</b>	Reports by other reporter groups combined, by year, by outcome of reports (number and percentage)	<p>Substantiation numbers have declined (263 to 182) and especially since 2007 (499 to 182). Investigations have also declined since 2007 (1283 to 461). Over the decade, 3028 substantiations of 7059 investigations.</p>	<p>Substantial declines in investigations and substantiations as a result of reports by other reporters. May be explained by increasing referral to DR, effect of CRP on investigation numbers.</p>
<b>1.26.9</b>	Reports by police, by year, by abuse type (number and percentage)	<ul style="list-style-type: none"> <li>• Substantial increase in <b>EA</b> especially from 2004 to 2007 (758 to 3321) stabilising through 2012 (3012). <b>EA</b> now accounts for <b>75%</b> of all police reports.</li> <li>• Stable <b>N</b> reports over decade but decline since 2007 (955 to 547).</li> <li>• Decline in <b>PA</b> especially since</li> </ul>	<p><b>EA</b> increase likely due to new reporting duty re EDV but indicates reports not being made to DR agencies; may also be influenced by CDP to an extent but 2008 CRP might work as a corrective to this.</p>

## REPORTS BY REPORTER GROUPS 2004-2012

		<p>2006 (499 to 206).</p> <ul style="list-style-type: none"> <li>Decline in <b>SA</b> since 2006 (351 to 234).</li> </ul>	<p>Decline in <b>N</b> suggests fewer reports of any kind or redirection to DR.</p> <p>Decline in <b>PA</b> and <b>SA</b> may indicate too little reporting, or redirection of even these reports to DR; may also be influenced by CRP.</p>
<b>1.26.10</b>	Reports by police, by year, by outcome of reports (number and percentage)	<p>Substantiation percentage fluctuates over decade (from approximately 40% to over 80% of investigations). Since 2007, decline in investigations (956 to 535) and substantiations (457 to 386), and a decline in reports not investigated (4003 to 3464).</p>	<p>Substantiation decline may indicate the increase in <b>EA</b> reports and investigations, and the decline in <b>PA</b> and <b>SA</b> reports and investigations. Other factors may also be relevant eg agency practice, referral to other services</p>
<b>1.26.11</b>	Reports by school personnel, by year, by abuse type (number and percentage)	<ul style="list-style-type: none"> <li>Decline in <b>EA</b> since 2007 (458 to 377) and <b>EA</b> now accounts for 23% of all reports.</li> <li>Increase in <b>N</b> reports over decade (437 to 639) although decline since 2007 (921 to 639).</li> <li>Stable <b>PA</b> reports over decade although decline since 2007, and decline as proportion of teachers' reports (37% to 28%).</li> <li>Stable <b>SA</b> reports over decade but decline from 2007 to 2009 (239 to 83) followed by increase through 2012 (83 to 170).</li> </ul>	<p>Decline in <b>EA</b> suggest reporting to DR, possible influence of CRP.</p> <p>Fluctuation in neglect reports suggests level of need and change in report destination. Decline from 2008 indicates effect of CRP</p> <p>Decline in <b>PA</b> reports suggests referral to DR, possible influence of CRP.</p> <p>Fluctuation in <b>SA</b> reports difficult to explain without further research</p>
<b>1.26.12</b>	Reports by school personnel, by year, by outcome of reports (number and percentage)	<ul style="list-style-type: none"> <li>From 2004 to 2007, increase in investigations (275 to 899) and substantiations (156 to 318).</li> <li>Since 2007, overall decline in investigations (899 to 376) and substantiations (318 to 213).</li> <li>From 2007 to 2008, sudden drop in investigations (899 to 331) and substantiations (318 to 144); followed by steady rise from 2010-2012 in investigations (256 to 376) and substantiations (129 to 213).</li> <li>Substantiation percentage fluctuates over decade (30-60% of investigated reports).</li> </ul>	<p>Marked fluctuations in investigations likely due to agency factors and practices, and nature of reports.</p>

## DETAILED YEARLY ANALYSIS 2004-2012

Table	Subject	Key findings 2004-2012	Interpretation
<b>2.6.1</b>	Number of reports by major	Reports <b>increase substantially from</b>	Increase in <b>EA</b> 2004-06

## DETAILED YEARLY ANALYSIS 2004-2012

	<p>reporter groups combined, by year, abuse type, and outcome</p>	<p><b>2004-06</b> for all types:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> reports more than tripled from 1250 to 4406;</li> <li>• <b>N</b> reports increased from 1666 to 2601;</li> <li>• <b>PA</b> reports increased from 1231 to 1641;</li> <li>• <b>SA</b> reports increased from 662 to 951.</li> </ul> <p>Reports then <b>declined markedly from 2007-2008</b>:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> reports declined from 4356 to 3293;</li> <li>• <b>N</b> reports declined from 2905 to 1692;</li> <li>• <b>PA</b> reports declined from 1237 to 800;</li> <li>• <b>SA</b> reports declined from 862 to 513.</li> </ul> <p>A <b>steady, moderate increase</b> then occurs from <b>2008-12</b>:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> reports increased from 3293 to 4173;</li> <li>• <b>N</b> reports increased from 1692 to 2226;</li> <li>• <b>PA</b> reports increased from 800 to 1033;</li> <li>• <b>SA</b> reports increased from 513 to 735.</li> </ul> <p>Substantiations are generally stable for each type over the decade apart from a decrease from 2007-08 for all types except emotional abuse. Declines in substantiations are apparent for N, PA and SA after 2007. The number of reports not investigated increases markedly for <b>EA</b> (1089 to 3614) but remains relatively stable for all other types over the decade.</p>	<p>possibly due to heightened awareness of DV but difficult to isolate reasons without further research.</p> <p>Decline in reports 2007-08 possibly related to (1) change in agency recording practice (no longer recording as notifications additional intakes about a matter already notified); (2) ability to report to differential response agencies; (3) CRP; (4) 'not stated' coding in 2008.</p> <p>Lower numbers of substantiations for N, PA and SA after 2007 possibly related to quality and nature of reports, and may be partly influenced by CRP but distinct child counts show reduced number of children in substantiated cases. Difficult to explain fully without further research.</p> <p>Lower investigations for PA and SA after 2007 possibly due to agency factors and practices (including CDP and CRP), and possibly nature and quality of reports.</p>
<p><b>2.6.2</b></p>	<p>Number of reports by other reporter groups combined, by year, abuse type, and outcome</p>	<p>From 2004 to 2007, reports increase for <b>EA</b> (770 to 1237) and <b>N</b> (2141 to 2784), but decline for <b>PA</b> (859 to 672) and remain stable for <b>SA</b> (524 to 538).</p> <p>In 2008, reports decline for all types:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> (1237 to 852)</li> <li>• <b>N</b> (2784 to 1483)</li> <li>• <b>PA</b> (672 to 433)</li> <li>• <b>SA</b> (538 to 297)</li> </ul> <p>Reports then stabilise for <b>EA</b> and <b>PA</b> and <b>SA</b> through 2012, and decline and increase again for N. Substantiation trends vary.</p>	<p>Increase in <b>EA</b> likely due to heightened awareness of DV</p> <p>Low numbers of substantiations likely related to quality and nature of reports. However, extremely low substantiation numbers of <b>SA</b> and <b>PA</b> in recent years notable and possibly concerning; may be partly influenced by CRP but distinct child counts show reduced number of children in substantiated cases.</p>

## DETAILED YEARLY ANALYSIS 2004-2012

		<p><b>EA:</b> increase through 2006 (to 142), then decline through 2012 (to 53)</p> <p><b>N:</b> increase through 2007 (to 282), then decline through 2012 (to 90)</p> <p><b>PA:</b> increase through 2006 (to 100), then decline through 2012 (to 31)</p> <p><b>SA:</b> increase through 2006 (to 63), then decline through 2012 (to 8)</p> <p>Over the decade, a very high proportion (80-90%) of all reports was not investigated; less so for <b>SA</b>.</p>	<p>Low investigations likely due to agency factors and practices (including CDP), and possibly nature and quality of reports.</p>
2.6.5	Number of reports by police, by year, abuse type, and outcome	<p>From 2004 to 2006, increase in reports for:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> (758 to 3311)</li> <li>• <b>N</b> (546 to 922)</li> <li>• <b>PA</b> (311 to 499)</li> <li>• <b>SA</b> (174 to 351).</li> </ul> <p>Decline after 2006 through 2012 for <b>PA</b> (499 to 206) and <b>SA</b> (351 to 234) and after 2007 through 2012 for <b>N</b> (955 to 547). Relatively stable after 2007 through 2012 for reports of <b>EA</b> (3321 to 3012).</p> <p>Investigation rates show few reports are investigated:</p> <p><b>EA:</b> approximately 80-90% are not investigated</p> <p><b>N:</b> approximately 60-85% are not investigated</p> <p><b>PA:</b> 65-80% are not investigated</p> <p><b>SA:</b> 65-90% are not investigated</p> <p>Substantiation rate of police reports that are investigated is relatively stable (although in some specific years it varies from the general range):</p> <p><b>EA:</b> range is 39-91%, and from 2008 onwards 69-91% (total 62%)</p> <p><b>N:</b> range is 38-75%, and from 2008 onwards 51-74% (total 51%)</p> <p><b>PA:</b> range is 47-86%, and from 2008 onwards 53-86% (total 61%)</p> <p><b>SA:</b> range is 28-63%, and from 2008 onwards 36-63% (total 44%)</p>	<p>Increase and sustained trend in <b>EA</b> reports reflects new duty to report DV</p> <p>Decline in <b>N</b> and <b>PA</b> reports after 2007 suggests reports being made to DR agencies; 2008 CRP; possibly the 'not stated' coding.</p> <p>Very low investigation rate likely due to agency factors and practices (including caller-defined protocol), nature and quality of reports, high proportion of reports of DV and neglect, referral to DR.</p> <p>Substantiation rate over the decade for investigated police reports is high for all types except SA, over 50%. For SA it is still strong. From 2008 onwards the SR is even higher. This may suggest improved triaging, increase in investigative resources and skills, and possibly other agency factors.</p>
2.6.6	Number of reports by school personnel, by year, abuse type, and outcome	<p>From 2004 to 2007, increase in reports for:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> (175 to 458)</li> <li>• <b>N</b> (437 to 921)</li> <li>• <b>PA</b> (478 to 515)</li> <li>• <b>SA</b> (187 to 239).</li> </ul> <p>Decline after 2007 through 2009 in reports for:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> (458 to 261)</li> <li>• <b>N</b> (921 to 273)</li> </ul>	<p>Increase in <b>EA</b> reports reflects new duty to report DV</p> <p>Decline in <b>EA</b>, <b>N</b> and <b>PA</b> reports after 2007 suggests reports being made to DR agencies; 2008 CRP; 'possibly the 'not stated' coding in 2008.</p> <p>Decline in <b>SA</b> reports 2007-</p>

## DETAILED YEARLY ANALYSIS 2004-2012

		<ul style="list-style-type: none"> <li>• <b>PA</b> (515 to 257)</li> <li>• <b>SA</b> (239 to 83).</li> </ul> <p>Increase 2009-2012 in reports for:</p> <ul style="list-style-type: none"> <li>• <b>EA</b> (261 to 377)</li> <li>• <b>N</b> (273 to 639)</li> <li>• <b>PA</b> (257 to 465)</li> <li>• <b>SA</b> (83 to 170).</li> </ul> <p>Investigation rates show more reports by teachers are investigated than by police, but rates in most years are still low:</p> <ul style="list-style-type: none"> <li>• <b>EA</b>: in most years, approximately 70-80% are not investigated</li> <li>• <b>N</b>: in most years, approximately 60-85% are not investigated</li> <li>• <b>PA</b>: in most years, approximately 60-70% are not investigated</li> <li>• <b>SA</b>: in most years, approximately 65-80% are not investigated</li> </ul> <p>Numbers of substantiated reports of <b>SA</b> are very low after 2007 (in the 3 years 2008-2010 there was a total of 15 substantiated reports by teachers of <b>SA</b>).</p> <p>Substantiation rate of teachers' reports that are investigated varies by year and abuse type:</p> <p><b>EA</b>: range is 25-80%, but from 2008 onwards is more stable at 47-80% (total 44%)</p> <p><b>N</b>: range is 37-65%, but from 2008 onwards is more stable at 41-63% (total 48%)</p> <p><b>PA</b>: range is 32-58%, but from 2008 onwards is more stable at 36-58% (total 43%)</p> <p><b>SA</b>: range is 12-54%, with the 12% in 2008 being an outlier (total 35%)</p>	<p>09 possibly of concern; perhaps was remedied based on increase from 2009-12.</p> <p>Increase in reports since 2009 especially of <b>N</b>, <b>PA</b> may indicate growing awareness of appropriate extent of role of DR agencies.</p> <p>Low investigation rate likely due to agency factors and practices (including CDP), nature and quality of reports, high proportion of reports of DV and neglect, referral to DR.</p> <p>Teachers' knowledge and reporting of <b>SA</b> appears to require attention.</p> <p>Substantiation rate over the decade for investigated reports is strong for all types. For <b>SA</b> it is still strong. From 2008 onwards the SR is generally markedly higher except for one outlier for <b>SA</b> in 2008. This may suggest improved triaging, increase in investigative resources and skills, effect of CRP, and possibly other agency factors.</p>

## DISTINCT CHILDREN IN REPORTS 2004-2012

Table	Subject	Key findings 2004-2012	Interpretation
3.1	Number of reports for each child who was the subject of a report, over the decade	98,987 reports involving 32,486 children. 47% of children in reports were only reported once and 18% were reported twice. 28% of all reports related to children reported	65% of children in reports were reported once or twice. 35% of children in reports were reported three

## DISTINCT CHILDREN IN REPORTS 2004-2012

		once or twice.	or more times.  72% of all reports concern children who are reported three or more times, suggesting a relatively small group of children may be subject to chronic maltreatment and may not be receiving sufficient service provision
--	--	----------------	--

### **Important Note**

Data and analysis regarding the reporting over time, and each year, of different types of child abuse and neglect, by each major reporter group, as presented for other jurisdictions has not been presented for Tasmania. Tasmania considers “that benefit will not be realised by publishing a broad range of dis-aggregations of activity counts, notifications, investigations and substantiations. As noted by better practice guides on performance information principles, it is not helpful to release data which does not clearly or reliably tell a meaningful ‘performance story’. Differences in information reported over time can arise for a range of reasons including variability in recording practices. Interpretations of such variations can be particularly problematic for smaller jurisdictions like Tasmania where dis-aggregations often result in relatively low numbers for which changes do not reflect material variations in policy or practice. Given there could be many interacting and competing explanations for the dis-aggregations derived for Tasmania, publication has not been recommended or supported”. Enquiries regarding unpublished data can be made by e-mailing [cafs.reporting@dhhs.tas.gov.au](mailto:cafs.reporting@dhhs.tas.gov.au)

# **Stage 3: Two Literature Reviews**

## STAGE 3: TWO LITERATURE REVIEWS

---

### Overview

Stage 3 was described broadly in the project brief as: “a documentary analysis of Australian and overseas literature on legal and contextual factors affecting reporting of child abuse and neglect” (p.2).

Two literature reviews were conducted:

**Literature review 1:** Contextual factors influencing mandatory reporting of child abuse and neglect; and

**Literature review 2:** Theoretical critiques of mandatory reporting laws.

Stage 3 therefore contributes to the *identification of opportunities to harmonise the various statutory regimes*. More specifically, findings from the review of factors influencing mandatory reporting may inform further work in developing strategies for policy and practice which can optimise the conditions for mandatory reporting; for example, in enhancing reporter training for specific professional groups and in specific domains. Findings from the review of theoretical critiques may shed light on the nature, presence and strength of theoretical underpinnings for mandatory reporting law, both generally, and for specific maltreatment types. However, decisions on whether, how, and to what extent to harmonise the statutory regimes require policy deliberations and decisions by various government departments.

The reviews are in the form of *systematized reviews* (Grant et al 2009) with *rapid evidence synthesis* (Gannan, Ciliska, & Thomas, 2010; Khangura, Konnyu, Cushman, Grimshaw, & Moher, 2012). These are literature reviews which approach the rigour of traditional systematic reviews, while being less comprehensive due to constraints of time, personnel and finance. Like systematic reviews, they have as their purpose: the comprehensive searching for relevant literature across multiple databases using a carefully constructed search strategy; a narrative, thematic synthesis of results; and analysis of results, areas of uncertainty, and implications (Grant et al 2009). Unlike systematic reviews, they do not include a comprehensive evaluation of the methodological quality of studies and potential sources of bias (Gannan et al., 2010). Informed by our experience conducting reviews for the *Cochrane Database of Systematic Reviews*, our approach comprised the following 5 steps: (i) question development and refinement, (ii) systematic literature search, (iii) screening and selection of studies, (iv) narrative synthesis of included studies, and (v) report production.

### **3.1 Literature review 1: Factors influencing mandatory reporting of child abuse and neglect**

#### **Purpose**

The purpose of literature review 1 was to identify and synthesise the published literature on the factors influencing mandatory reporting of child abuse and neglect.

#### **Background**

Among the many challenges in mandatory reporting of child abuse and neglect is understanding what influences reporting practice (or behaviour). Gaining a better understanding of the factors responsible for reporting tendency can inform the design, content and methods for potential interventions to improve reporting practices among mandatory reporters. Many of the factors influencing mandatory reporting will be malleable, for example, via interventions targeting: legislative reform (e.g., in the wording of the statutes); institutional policy reform (e.g., internal procedures and guidelines for reporting); education and training; mentoring schemes; and organisational cultures.

There is no definitive model that has yet been developed to conceptually depict the multitude of factors potentially affecting mandatory reporting of child abuse and neglect. In its simplest form, the process of reporting child maltreatment to statutory child protection authorities is conceptualised as a two-part process in which reporters must (i) detect child abuse and/or neglect, and then (ii) report it.

#### **Approach**

Preliminary scoping of the evidence revealed no prior systematic reviews had been conducted on factors influencing mandatory reporting of child abuse and neglect. We located two previous narrative reviews: one of professionals' reporting of suspected child abuse (Brosig & Kalichman, 1992) and another on barriers to reporting and educational interventions aiding reporting of child maltreatment (Alvarez, Kenny, Donohue, & Carpin, 2004).

This systematized review (Grant et al., 2009) comprises a systematic search strategy and rapid evidence synthesis. It provides a guide to the state of the current evidence base rather than a full systematic review and evaluation.

#### **Inclusion and exclusion criteria**

Literature was included or excluded based on six criteria: (i) publication type (we included only primary research reports published in peer-reviewed journals and excluded books, book chapters, and theses); (ii) publication topic (we included only studies of factors affecting/ predicting/ determining/ associated with/ correlated with/ contributing to the reporting of child abuse and/or neglect by professionals required to report child abuse and neglect, including report barriers and facilitators); (iii) study type (we included only

primary studies reporting original data and excluded other reviews and commentary); (iv) definitions (“mandatory reporting” was defined as the legislative obligation to report physical abuse, emotional abuse, sexual abuse, or neglect to statutory child protection authorities and “mandatory reporter” was defined as professionals required by law to report); (v) participant populations (we included studies with sub-populations of mandatory reporters: e.g. nurses, physicians, teachers and excluded studies with non-mandatory reporters and students); and (vi) outcomes (we included studies where reporting practice, behaviour, or tendency was investigated and reported).

Only narrative synthesis was undertaken. Statistical data synthesis was not conducted.

## **Overview of studies**

Seventy-two studies met the inclusion criteria. Most of the studies were conducted in the USA (n=48). Studies were also conducted in Australia (n=10), Taiwan (n=6), Canada (n=3), Israel (n=3), Sweden (n=2), Brazil (n=1) and Denmark (n=1). The first study was conducted in 1981 with US nurses and paediatricians (Nelpka, O'Toole & Turbett, 1981).

Fifty of the 72 studies focused broadly on factors influencing reporting of child abuse or neglect/child maltreatment generally or as an undifferentiated phenomenon without specifying factors influencing reporting of specific maltreatment subtypes. Twenty-two studies focused on reporting for distinct maltreatment subtypes (physical abuse n=17; sexual abuse n=4; and exposure to intimate partner violence n=1). No studies focused solely on mandatory reporting of emotional abuse or neglect.

Of the 72 studies, 63 were quantitative, 5 were qualitative, 3 were mixed methods studies combining quantitative and qualitative methods, and 1 study employed an experimental design. The predominant study type was a cross-sectional survey providing a snapshot of reporting practice at one point in time. Participant self-report questionnaires and/or interviews were used in the majority of studies. Data on reporting practice were gathered in two ways: (i) actual reporting, by asking participants to indicate whether, and how many cases of child abuse and neglect they had reported; and (ii) hypothetical reporting, by providing vignettes or scenarios and asking participants to indicate how likely they would be to report each case.

Studies sampled teachers (n=16), doctors (n=15), nurses (n=10), psychologists (n=7), school counsellors (n=3), dentists (n=2), child care workers (n=2), social workers (n=1), and police (n=1). Multiple professional groups (e.g. mental health practitioners, family therapists) were studied concurrently 15 studies. In total, over 24 000 mandated reporters participated in the 72 studies. Study sample sizes ranged from 10 participants in a small scale qualitative study (Nayda, 2002) to 1412 participants in a large scale quantitative study (Crenshaw, Lichtenberg, & Bartell, 1993). Response rates ranged from 11% (Herendeen et al., 2014)

to 95% (Turbett & O'Toole, 1983). Response rates were not reported in 16 of the studies. Purposive samples were reported in 6 studies. Typically in the quantitative studies, random samples were drawn from mailing lists of professional associations, or from records of professionals employed in departments/districts/regions.

## Key findings

The 72 studies identified factors influencing mandatory reporting of child abuse and neglect. These factors were categorised into 4 factor themes:

- **case factors** (child factors; family factors);
- **reporter factors** (socio-demographics, attitudes, knowledge, education/training, fears/concerns, beliefs, self-efficacy, and previous CPS experience);
- **organisational factors** (private v public, perceived social support, time pressure, and location); and
- **jurisdictional factors** (wording of reporting law).

These factor themes, relevant study findings, study authors, and study frequencies are shown in Table 3.1.

Apart from case characteristics, the major factors that appear to influence mandatory reporting are **reporter attitudes**, **reporter knowledge** (encompassing education and training), **reporter fears and concerns** about the effects of mandatory reporting, and **reporter experience with and confidence in child protection services** (CPS). Emerging areas of research also point to the importance of workplace support for reporting, and the wording of the reporting statute.

There is a lack of research on factors influencing mandatory reporting, especially for the professional groups whose reporting has been most problematic (e.g. police). No studies have focused explicitly on factors influencing mandatory reporting of emotional abuse or neglect.

### **Case factors**

*Case factors (child factors)* influencing mandatory reporting include: (i) the type of maltreatment; (ii) the seriousness/severity of the maltreatment; (iii) the observed effects of maltreatment on the child; (iv) certainty that maltreatment had occurred; (v) direct disclosure from the child; (vi) child age; (vii) the veracity of the child; and (viii) child ethnicity/race. More studies focused on maltreatment type and seriousness than other case characteristics. Physical and sexual abuse and more serious maltreatment were more likely to be reported than neglect and emotional abuse and less serious maltreatment by most professional groups studied. The importance of these case characteristics to reporting decisions points to a clear need for professional education and training about the use of case-related information in the formulation of professional judgements and actions.

*Case factors (family factors)* influencing mandatory reporting include: (i) family hostility, disinterest, or resistance; (ii) family SES; (iii) family ethnicity; (iv) maltreatment co-occurrence with intimate partner violence; and (v) maltreatment co-occurrence with substance abuse. Family case variables were less frequently studied than child case variables. Family cooperativeness as indicated by the presence of parental hostility, resistance or disinterest is a significant influence on mandatory reporting of child abuse and neglect. The importance of these case characteristics to reporting decisions points to a clear need for professional education and training specific to reporter groups based on their “vantage point” (Giovannoni, 1995, p.494) to observe children, parent(s), and families.

### ***Reporter factors***

Research reveals mixed findings with respect to the influence of reporter ***socio demographic characteristics*** on mandatory reporting practice (including age, gender, ethnic background, parental status, qualifications and years of experience). In various studies, these factors were found to have a positive effect, negative effect, or no effect at all, indicating the influence of these variables may be more sensitive than other factors to reporter group membership and/or study location. The only Australian study included in this group of papers investigated factors influencing mandatory reporting with Queensland nurses (Fraser et al., 2010). This study found no association between likelihood to report and years of nursing experience, and a positive association between reporting of child sexual abuse and parental status.

Reporter ***attitudes*** towards mandatory reporting were the most frequently studied factor influencing reporting practice with twenty studies investigating this variable, typically alongside numerous other variables. Unlike the ambiguity found for socio-demographic characteristics, there was no ambiguity in these study findings. More positive attitudes towards the reporting duty significantly increased the likelihood that mandatory reporters would comply with their duty to report. This tendency has been reported in studies of both actual reporting practice (by asking participants to indicate whether they had reported cases of child abuse and neglect), and hypothetical reporting (by providing vignettes or scenarios and asking participants to indicate how likely they would be to report each case). It is clear that positive attitudes towards mandatory reporting act as facilitators to reporting. Cultivating positive attitudes towards mandatory reporting obligations, therefore, should be part of reporter induction. Many studies showed, for example, that mandatory reporters were keen to fulfil their mandatory reporting obligations, showed awareness of moral and ethical principles, and saw it as an important component of their professionalism.

Reporter **knowledge** of warning signs and indicators and of the reporting law and procedures has been shown to influence mandatory reporting. Unambiguous findings suggest that reporting is associated with higher levels of knowledge.

The influence of reporter **education and training** has yielded mixed findings with three studies finding positive associations with reporting practice, one finding no association, and one finding an association only for neglect. This variable requires further investigation in future research as the inclusion criteria for this review did not easily fit studies of interventions for mandatory reporters; only one experimental intervention study was included (Hawkins & McCallum, 2001). A full systematic review of the effectiveness of training interventions for mandatory reporters would shed further light on the role of this variable in shaping reporting practice, including detailing the contents and methods for the most effective education and training initiatives for specific reporter groups, and specific maltreatment sub-types.

Reporter **fears and concerns** featured heavily in the studies as a barrier to reporting in at least 14 studies. Fears and concerns can be categorised into four groups: (i) child-oriented fears/concerns; (ii) family-oriented fears/concerns; (iii) legal fears/concerns; and (iv) self-oriented fears/concerns. Child-oriented fears and concerns were about reprisal against child from the family or alleged perpetrator, of altering the reporter's relationship with the child, and that report would be negative for child. Family-oriented fears and concerns were about damage incurred by making inaccurate report or wrongly accusing the family, of intrusion into family privacy, of parental denial or disapproval of reports, of offending parent(s), of damage to relationships with parent(s), and of the negative consequences for the family. Legal fears and concerns included those relating to charges or possible legal suit, of court proceedings generally, of appearing as a witness in court, of legal ramifications for false reports. Self-oriented fears and concerns were about protection of their identity as a reporter, the confidentiality of reports, about retribution to themselves as reporters, and of danger to their personal safety. Only two of these studies were conducted in Australia (Nayda, 2002; Van Haeringen et al., 1998). These studies were conducted more than a decade ago, with data drawn from relatively small samples of South Australian nurses (Nayda, 2002), and Queensland doctors (Van Haeringen et al., 1998). Further investigation of the specific fears/concerns of a broader range of mandatory reporters in Australian contexts, including for different geographical locations may be warranted given findings from another small scale Australian study of rural practitioners in Victoria which found rural placement was a barrier to reporting. Fears and concerns could then be more explicitly addressed during reporter induction and further education and training, and targeted for greatest effect.

Reporters' deeply held underlying **beliefs** were also found to influence reporting practice. This was particularly evident in studies with participants from diverse cultures (e.g. Ben Natan et al., 2010; Haj-Yahia & Attar Schwartz, 2008). Underlying beliefs about parental rights, cultural differences, preserving harmonious relationships, loyalty to parents, and deferral to professional hierarchies in reporting are some

examples of these beliefs. Although less malleable, beliefs are thought to contribute to attitude formation and the strength of beliefs can be correlated with intention to perform a behaviour (such as reporting) (see for example Ajzen, 2005). Only one of these studies was conducted in Australia (Schweitzer et al., 2006). This study, with Queensland doctors, found their belief that abuse was a once-off incident and unlikely to be repeated was a significant predictor of failure to report.

Reporter *self-efficacy* with respect to reporting was also studied with higher reporting self-efficacy linked to greater likelihood of reporting. The link between reporting self-efficacy and education and training has not been explored.

Previous *experience with and confidence in the child protection system* (CPS) is a significant barrier to and facilitator of reporting. Negative experiences and lack of confidence in authorities as barriers to reporting were detailed in at least 13 studies. Specific issues identified included lack confidence in CPS, distrust of CPS, perceived inadequate or inappropriate responses from CPS including over-reactions, view that CPS would not investigate or would not take prompt action, delay in taking a report on the CPS hotline, feeling that CPS does not generally offer help, views of CPS inefficient, incompetent, slow, busy, underfunded, lack of feedback from CPS about reports, and lack of follow-up. Many of these issues relate to reporters' perceptions of CPS roles and effectiveness. None of the included studies specifically investigated the impact of more effective communication between CPS and mandatory reporters and thus we do not know whether improving communication and collaboration could influence reporter perceptions of and confidence in CPS. Feedback mechanisms for mandatory reporters may be one way to create a communicative/collaborative alliance. Outside the field of child protection, the education literature indicates clearly and strongly the effectiveness of feedback (see for example Hattie, 2009). Feedback is linked to expectations, motivation, and task performance. Correctional review, focused on goals, and two-way feedback appear to be most effective. Extrinsic rewards are least effective.

### ***Organisational/workplace factors***

Organisational factors are characteristics of reporters' workplaces that may facilitate or inhibit reporting. Factors identified included the public or private nature of the context (reported specifically in studies of doctors and dentists), aspects of workplace culture such as perceived social support for reporting, time constraints of an office visit (reported in studies of doctors) and the "hassle" involved in making reports (also reported in studies of doctors). Rural location was identified in an Australian study (Francis et al., 2012) as a barrier to reporting on account of living and working in a small community.

### ***Jurisdictional factors***

Only one study included in this review investigated jurisdictional factors influencing mandatory reporting (Brosig & Kalichman, 1992). This study with psychologists in the USA, found direct effects of statutory wording on clinicians' hypothetical reporting practice as measured in vignettes. This study is part of a broader suite of studies conducted in the USA that have explored the effects of statutory wording on clinical practice. These studies were not included in the review as they did not meet inclusion criteria, but are mentioned here for completeness (see for example Brosig & Kalichman, 1992; Levi & Brown, 2005; Levi et al., 2006; Crowell & Levi, 2012).

## **Summary**

There is a lack of rigorous Australian research on factors influencing mandatory reporting, especially for the professional groups whose reporting has on occasion presented challenges (e.g., police). There is little research generally that differentiates factors influencing mandatory reporting of specific maltreatment subtypes. To our knowledge, there are no studies that have been conducted anywhere in the world, focusing solely on factors influencing mandatory reporting of emotional abuse or neglect. This is highly relevant given the rise in reports for emotional abuse and potential for systems burden.

Mandatory reporting of child abuse and neglect is multiply determined by numerous interacting factors. Professionals' reporting of child abuse and neglect is not only dependent upon what they can "see": what has been described as their "vantage points" (Giovannoni, 1995, p.494) or what they have the opportunity to observe, that is, case characteristics. Professionals' reporting is also related to their own characteristics (such as socio-demographic features, knowledge, attitudes, and experiences), the characteristics of the organisations in which they work, and jurisdictional characteristics such as the wording of the statutes under which they work. The factors influencing reporting practice identified in this review suggest a complex and nuanced situation; mandatory reporting is clearly more complex than it is often depicted. Yet many of the factors may be malleable via legislative reform, reworking of institutional reporting procedures and guidelines, improving education and training and enhancing organisational cultures.

**Table 3.1: Literature review 1: Factors influencing mandatory reporting of child abuse and neglect**

Factor theme	Findings	Number of studies	Authors
<b>Case factors (child)</b>			
	Type of maltreatment (physical and/or sexual abuse more likely to be reported)	10	Beck & Ogloff (1995); Beck et al., (1994); Bryant & Milsom (2005); Bryant (2009); Eisbach & Driessnack (2010); O’Toole et al., (1994); O’Toole et al., (1999); Rindfleisch & Bean (1988); Saulisbury & Campbell (1985); Webster et al., (2005)
	Seriousness/severity of maltreatment (more serious/severe abuse more likely to be reported)	13	Ashton (1999); Crenshaw et al., (1995) Egu & Weiss (2003); Flaherty et al., (2008); Hawkins & McCallum (2001); O’Toole et al., (1994); O’Toole et al., (1999); Rindfleisch & Bean (1988); Saulisbury & Campbell (1985); Turbett & O’Toole (1983); Willis & Wells (1988); Zellman (1992); Zellman (1990a)
	Observed effects of maltreatment (clear negative effects more likely to be reported)	6	Azevedo et al., (2012); Eisbach & Driessnack (2010); Finlayson & Koocher (1991); Flaherty et al., (2008); Sundell (1997); Turbett & O’Toole (1983)
	Certainty of maltreatment (greater certainty of occurrence more likely to be reported)	8	Beck & Ogloff (1995); Crenshaw et al., (1993); Holland (1999); Kalichman et al., (1988); Kalichman et al., (1990); Saulisbury & Campbell (1985); Sundell (1997); Van Haeringen et al (1998)
	Disclosure of maltreatment (direct child disclosure more likely to be reported)	5	Crenshaw et al., (1995); Finlayson & Koocher (1991); Kalichman & Craig (1991); Kalichman & Craig (1993); Kalichman et al., (1988)
	Age of child (younger children more likely to be reported)	4	Janowski & Martin (2003); Kalichman & Craig (1991); O’Toole et al., (1994); Webster et al., (2005)
	Veracity of child (more likely to be reported)	2	Crenshaw et al., (1995); Eisbach & Briessnack (2010)
	Ethnicity/race (children of colour <u>not</u>	2	Egu & Weiss (2003); Willis & Wells (1988)

Factor theme	Findings	Number of studies	Authors
	more likely to be reported)		
<b>Case factors (family)</b>			
	Family hostility/disinterest/resistance (more likely to be reported)	7	Azevedo et al., (2012); Crenshaw et al., (1995); Janowski & Martin (2003); Kalichman & Craig (1991); Kalichman et al., (1989); O'Toole et al., (1994); Sundell (1997)
	Family SES (generally, lower SES more likely to be reported)	3	Lane & Dubowitz (2007); Nelpka et al., (1981) – positive & negative assoc; Turbett & O'Toole, (1983)
	Family ethnicity/race (families of colour <u>not</u> more likely to be reported)	2	Nelpka et al., (1981); Turbett & O'Toole, (1983)
	Co-occurrence with intimate partner violence (more likely to be reported)	1	Davidov et al., (2012)
	Co-occurrence with substance abuse (more likely to be reported)	1	Sundell (1997)
<b>Reporter factors</b>			
<b>Socio-demographics</b>	Age (no association)	4	Ashton (1999) – no assoc; Bryant & Milsom (2005) – no assoc; O;Toole et al., (1994) – no assoc; Saulsbury & Campbell (1985) – no assoc
	Gender (mixed findings)	6	Ashton (1999) – no assoc; Bryant & Milsom (2005) – no assoc; Gunn et al., (2005) – male; Kenny (2001) – female; O'Toole et al (1994) – no assoc; O'Toole et al., (1999) – male;
	Ethnic background (mixed findings)	3	Ben Natan et al., (2012) – Jewish; O;Toole et al., (1994) – no assoc; O'Toole et al., (1999) – non-white
	Parental status (mixed findings)	5	Ashton (1999) – no assoc; Ben Natan et al., (2012) – positive assoc; Fraser et al., (2010) – sexual abuse only; Nightingale & Walker (1986) –

Factor theme	Findings	Number of studies	Authors
			positive assoc; O'Toole et al., (1999) – negative assoc
	Qualifications (mixed findings)	2	Haj-Yahia & Attar Schwartz (2008) – lower qualifications; O'Toole et al., (1994) – no assoc
	Years of experience (mixed findings)	15	Bryant & Milsom (2005); Bryant (2009) – no assoc; Fraser et al., (2010) – no assoc; Goldman & Padayachi (2005) – no assoc; Gunn et al., (2005) – more years; Haj-Yahia & Attar Schwartz (2008) – fewer years; Kenny (2001) – more years; Nightingale & Walker (1986) – more years; O'Toole et al., (1994) – no assoc; Saulsbury & Campbell (1985) – no assoc
<b>Attitudes</b>	Attitudes towards mandatory reporting (more positive attitudes, more likely to report)	20	Beck & Ogloff (1995); Ben Natan et al., (2012); Crenshaw et al., (1995); Crenshaw et al., (1993); Feng & Levine (2005); Feng & Wu (2005); Feng et al., (2010); Finlayson & Koocher (1991); Flaherty et al., (2006); Fraser et al., (2010) – emotional abuse, sexual abuse & neglect only; Goebbels et al., (2008); Haj-Yahia & Attar Schwartz (2008); Hawkins & McCallum (2001); Kalichman & Brosig (1993); King et al., (1998); Lee et al., (2007); Renniger et al., (2002); Rindfleisch & Bean (1988); Zellman (1990a); Zellman (1990b)
	Attitudes towards physical/corporal punishment (more positive attitudes, less likely to report)	3	Feng & Levine (2005); Feng et al., (2010); Kenny (2004)
<b>Knowledge</b>	Knowledge of warning signs & indicators (greater knowledge more likely to report)	7	Beck et al., (1994); Eisbach & Driessnack (2010); Haj-Yahia & Attar Schwartz (2008) – physical abuse, emotional abuse, neglect only; Hawkins & McCallum (2001); Janowski & Martin (2003); Kenny (2004); Lee et al., (2007)
	Knowledge of reporting law / requirements / procedures (greater knowledge, more likely to report)	4	Feng & Levine (2005); Gunn et al., (2005); Kenny (2004); Renniger et al., (2002)

Factor theme	Findings	Number of studies	Authors
<b>Education/training</b>	Specific child protection training (more likely to report)	5	Fraser et al., (2010) – neglect only; Goldman & Padayachi (2005) – no association; Hawkins & McCallum (2001); King et al., (1998); Nightingale & Walker (1986)
	Expertise / speciality (e.g. paediatrician v general practitioner; school counsellor v teacher) (greater expertise more likely to report)	5	Kenny & McEachern (2002); Rindfleisch & Bean (1988); Uldum et al., (2010); Van Haeringen et al., (1998); Webster et al., (2005)
<b>Fears/concerns</b>	Fears/concerns: e.g. of inaccurate report; repercussions for child and/or family; damage to relationship with family; reporter identity disclosure; court proceedings/lawsuit; (more fears, less likely to report)	14	Abrahams et al., (1989); Blaskett & Taylor (2003); Borres & Haag (2007); Crenshaw et al., (1995); Flaherty et al., (2004); Gunn et al., (2005); Hinson & Fossey (2000); Hansen et al, (1997); Kalichman & Brosig (1993); Kenny (2001); Morris et al., (1985); Nayda (2002); Uldum et al., (2010); Van Haeringen et al., (1998)
<b>Beliefs</b>	Beliefs: e.g. violating parent rights; cultural differences; abuse as a single incident; other professionals should report; therapy/treatment better than reporting (less likely to report)	6	Ben Natan et al, (2010); Haj-Yahia & Attar Schwartz (2008); Hansen et al, (1997); Holland (1999); Renniger et al., (2002); Schweitzer et al., 2006
<b>Self-efficacy</b>	Perceived self-efficacy in reporting (higher self-efficacy, more likely to report)	6	Feng & Wu (2005); Feng & Levine (2005); Feng et al., (2010); Flaherty et al., (2006); Goebbels et al., (2008); Herendeen et al, (2014)
<b>Previous CPS experience</b>	Previous experience of reporting / failing to report to CPS / confidence in CPS (negative experiences/lower confidence, less likely to report)	13	Eisbach & Driessnack (2010); Finlayson & Koocher (1991); Flaherty et al., (2004); Flaherty et al., (2008); Gunn et al., (2005); Hansen et al., (1997); Holland (1999); Jones et al., (2008); Kalichman et al., (1989); Nayda (2002); Sundell (1997); Webster et al., (2005); Zellman (1990b)
<b>Organisational/workplace factors</b>			

Factor theme	Findings	Number of studies	Authors
	Private vs public (public, more likely to report)	2	Morris et al., (1985); Uldum et al., (2010)
	Perceived social support for reporting (greater support, more likely to report)	1	Flaherty et al., (2008); Feng & Wu (2005); Feng & Levine (2005)
	Time pressure and limitations (barrier to reporting)	3	Borres & Haag (2007); Flaherty et al., (2004); Gunn et al., (2005)
	Location (rural location, barrier to reporting)	3	Francis et al., (2012); O'Toole et al., (1999); Webster et al., (2005)
<b>Jurisdictional factors</b>	Wording of reporting law (greater clarity)	1	Brosig & Kalichman (1992)

## 3.2 Literature review 2: Theoretical critiques of mandatory reporting laws

### Purpose

The purpose of this review was to identify and synthesise critical assessments or analyses of mandatory laws which were premised on or informed by a theoretical perspective. Theoretical perspectives offer a way of illuminating the phenomenon of child abuse and neglect, and of the nature and consequences of social and legal strategies developed to respond to it, principally in this context the strategy of mandatory reporting legislation. Informed by a theoretical perspective, critical analyses of the policy measure which is the subject of the critique can produce conclusions which occupy various points on a spectrum of support or opposition to the measure; for example:

- very strong support of the measure;
- mostly supportive of the measure while identifying some problems with it (conceptual, legal, ethical, clinical, practical);
- partial opposition to the measure in general while partly endorsing it in some form;
- complete opposition to the measure.

### Definitions

The nature of a 'theoretical perspective' can be explained as one which is more than a mere personal perspective; it is an analysis based on an established theoretical framework or approach. In general, such theoretical perspectives draw on the disciplines of ethics and philosophy, and their sub-fields. The relevant perspective is used to inform a normative argument about whether a particular social policy ought to exist, or ought not to, based on a particular theoretical perspective. Hence, these kinds of critique are exercises in *normative ethics*.

Examples of the theories that may inform analyses of mandatory reporting laws include:

- Philosophical theories such as liberalism and its elements (e.g., by Locke, Mill), rights theories (including children's rights), feminism;
- Bioethics (concepts of beneficence, nonmaleficence, justice, autonomy), whether with the child, parent, family, clinician or community as the locus of concern;
- Ethical theories/moral philosophy such as:
  - *deontological ethics* i.e., that decisions should only be made informed by assessing one's duties and the rights of others (e.g., Kant; Rawls and social contractarianism and its variations e.g., Okin, Nussbaum);
  - *consequentialism* i.e., a teleological approach which posits that the morality of a policy or act depends on its actual outcome; examples are utilitarian theory (a policy is justifiable if it

produces the most happiness for the most people), and welfarism (a policy is justifiable if it maximises economic welfare);

- *relational ethics* i.e., the morality of a policy depends on whether it promotes interdependence and relationships in achieving ethical goals;
- *pragmatism* i.e., the morality of a policy depends on whether it works to promote social goods and beneficial social reform.

## **Inclusion and exclusion criteria**

Literature was included or excluded based on three criteria: (i) publication type; (ii) publication topic; and (iii) approach adopted. The majority of the literature included in this review of analyses of mandatory reporting laws did not explicitly state its adopted theoretical basis, explain it, and apply it to a carefully articulated context of child maltreatment. Therefore, from a theoretical standpoint, this area of the field is relatively underdeveloped. Instead, much work explored the context and developed an argument based on an unarticulated theoretical position, which was usually a pragmatic or consequentialist argument about the asserted or real outcomes of mandatory reporting. The shortcoming of such an approach is that it rests on less thoroughly explored assumptions and principles, and does not fully explore or apply the quasi-theoretical principles to the entire situation. However, this work can still present some useful insights, and accordingly we decided to include scholarly refereed work which adopted such an approach. This decision also resulted in the review not being so small as to be unhelpful.

### ***Included papers***

- Publication type: scholarly peer-reviewed works including journal articles, book chapters
- Publication topic: paper was about mandatory reporting legislation concerning child abuse and neglect (either child abuse and neglect generally, or any specified type or types of abuse or neglect); that is, legislation that has as its specific nature and purpose the reporting of child abuse and neglect
- Approach adopted: (a) papers that explicitly or implicitly used one or more modes of 'big T' Theory (e.g., an expressly stated liberal critique, rights-based critique, feminist critique, or economic critique) to conduct a normative or theoretical critique of the laws; (b) papers that explicitly or implicitly used one or more modes of 'little T' theory (e.g., arguments based on the practical results or consequences of the laws, which implicitly relate to a 'Big T' theory but without expressly using such a framework) to conduct a normative or theoretical critique of the laws.

### ***Excluded papers***

- Publication type: non-peer reviewed works including conference papers, professional opinion
- Publication topic: papers about reporting policy, procedures or guidelines as distinct from mandatory reporting legislation
- Approach adopted: (a) papers that simply made assertions about the laws and/or their effects without being either explicitly or implicitly underpinned by a theoretical basis; (b) papers about empirical studies of reporting, attitudes, experiences, training etc; (c) mere replication or adoption of a theory without exploration or argumentation (e.g. papers that made only a bare comment on mandatory reporting legislation).

## **Thematic analysis of theoretical critiques: Key findings**

Thematic outlines of theoretical analyses in favour of the laws, and opposing the laws, are depicted in Tables 2 and 3 respectively. The tables list authors of key works in the field, identify the theoretical perspective/s adopted in these works, and detail the key themes or arguments embodied in the works. Full citations are presented in the reference list.

Five key findings were identified from the analysis of theoretical critiques in the included works.

### ***1. Lack of true theoretical critiques***

Our review revealed a dearth of true theoretical critiques of mandatory reporting laws, either as a whole phenomenon of study, or as applied to specified types of child abuse or neglect, or in relation to specific reporter groups.

### ***2. Other weaknesses in the literature***

Much of the literature – both supporting and opposing mandatory reporting laws - does not distinguish between maltreatment types, or extents of harm, or age of the child. Further, most of the work in this field does not distinguish between reporting by different mandated reporter groups, and between mandated reporters and non-mandated reporters. As well, a good deal of the scholarship was situated in the USA and the Australian State of New South Wales in particular contexts at particular times when mandatory reporting laws were conceptually broader than at other times, applying to a broader concept of harm or risk of harm. Some work develops an argument around one theme and draws a broad generalised conclusion about the laws. Finally, much work using a pragmatic or consequentialist approach operated on an assumption that all unsubstantiated reports are unwarranted reports; an assumption that has since been cogently criticised and shown to be misconceived.

### ***3. Major key themes/arguments in favour of the laws either in whole or in part***

These arguments have been based primarily on grounds regarding children's rights to safety, bioethics and consequentialism. Key arguments are that the most serious abuse affects very young children who cannot help themselves; reporting is a method of intervening in these cases to protect the child and without these reports, the cases will not come to the attention of welfare and protective agencies. It is argued that child abuse remains underreported and mandatory reporting increases case identification, enables health rehabilitation to be provided to the child, and can prevent the escalation of abuse and subsequent cost. Mandatory reporting increases awareness of child maltreatment and increases reports and case identification; a system of non-mandatory reporting does not produce comparable compliance. Child abuse is both a matter requiring intervention to assist the child and a State/public concern which legitimizes a necessary level of intrusion in the private sphere. Mandatory reporting of serious child abuse and neglect is

consistent with multiple strands of political philosophy and normative ethics. Both older and more recent work accepts that mandatory reporting laws are a beneficial approach which contributes to child protection but must be appropriately drafted, reporters must be properly trained, and child protection systems must be properly resourced to respond to reports.

Studies relevant to the major key themes/arguments in favour of the laws are shown in Table 3.2.

#### ***4. Major key themes/arguments opposing the laws either in whole or in part***

These arguments have been based primarily on consequential grounds regarding the alleged effect of mandatory reporting laws on child protection systems as a whole, if those systems are not adequately resourced. The concern behind these arguments is that mandatory reporting of child abuse and neglect results in a large increase in reported cases, most of which are unwarranted, with which the child protection system – on the assumption that it is under-resourced, and will remain so – is unable to cope. The argument proceeds that these additional reports divert scarce resources, so that there are fewer resources available to deal with already known cases. In addition, with added resources being allocated to mandatory reporting and responses to it – a form of tertiary and secondary prevention - there are fewer resources available for primary prevention. A distinct body of work opposes the laws when applied to existing therapeutic relationships. Further work focuses on the argument that investigations of unsubstantiated reports cause trauma to the family and violate parental privacy and autonomy.

Studies relevant to the major key themes/arguments opposing the laws are shown in Table 3.3.

#### ***5. Presence/absence of overall consensus***

The literature reveals theoretical and quasi-theoretical arguments in favour of the laws, and against them. Hence, there is a lack of consensus in the field about the overall theoretically-based merits of mandatory reporting laws, and about specific themes in relation to them. Often, directly opposing arguments can be found on the same theme. However, there appears to be more support overall for reporting laws regarding physical and sexual abuse; and more opposition to reporting laws regarding emotional abuse, neglect, and exposure to domestic violence.

**Table 3.2: Studies including theoretical analyses in favour of mandatory reporting laws**

Authors	Theoretical perspective(s)	Key themes/arguments
Kempe et al 1962; Birrell et al 1966; Paulsen 1966; Paulsen et al 1967	Children’s rights to safety; bioethics	A duty to report cases of suspected serious child physical abuse is required to bring previously unknown cases to the attention of welfare agencies. Medical practitioners are skilled professionals who can recognize child abuse, but generally do not know how to deal with serious child physical abuse, or choose to ignore it because of discomfort and non-recognition of the child’s right to safety; a duty to report it is required to overcome this gaze aversion

Finkelhor 1990, 2005; Mathews & Bross 2008; Mathews 2012; Mendes 1996; Meriwether 1986	Bioethics; pragmatism; consequentialism	Mandatory reporting laws are a beneficial approach which contributes to child protection but must be appropriately drafted, reporters must be properly trained, and child protection systems must be properly resourced to respond to reports
Mathews et al 2009; Paulsen 1967	Pragmatism	A legislative reporting duty protects the professional reporter, who in any event is complying with an ethical duty, in a way a policy duty or a voluntary duty cannot
Besharov 1990	Pragmatism; consequentialism	Mandatory reporting duties have reduced child fatalities
Greipp 1997; Katner et al 2012; Kim et al 2012; Mathews 2012; Walters 1995	Bioethics, deontology	Mandatory reporting is consistent with ethical professional duties
Bala et al 1986; Finlayson et al 1991; Yelas 1992	Children's rights, liberalism, feminism	Child abuse is both a matter requiring intervention to assist the child and a State/public concern which legitimizes a necessary level of intrusion in the private sphere
Mathews 2014b	Children's rights, liberalism, Mill, Locke, feminism, Rawls's revised social contract theory, Nussbaum's Capabilities Approach	Mandatory reporting of serious child abuse and neglect is consistent with multiple strands of political philosophy and normative ethics
Anderson et al 1993; Harper & Irvin 1985; Kalichman & Craig 1991; Levine & Doueck 1995; Watson & Levine 1989	Bioethics; pragmatism; consequentialism	Reporting does not necessarily affect existing therapeutic relationships; it can even assist in therapy and strengthen the alliance between patient and therapist

Authors	Theoretical perspective(s)	Key themes/arguments
Drake 1996; Drake & Jonson-Reid 2007; Hussey et al 2005; Kohl et al 2009	Bioethics; pragmatism; consequentialism	Little difference exists in service need between substantiated and unsubstantiated cases and reporting enables assistance to be provided to a large group of children and families in need of protection/assistance
Barth 2013; Finkelhor 1990, 2005; Mathews 2012	Bioethics; pragmatism; consequentialism	Legislative reporting duties do not cause intolerable overreporting; much 'overreporting' involves multiple reports about the same children, and reporting of some kinds of abuse by some groups of reporters
Drake & Jonson-Reid 2007; Finkelhor 1990, 2005; Dalziel et al 2007	Economics; consequentialism	Legislative reporting duty does not diminish the available resources for child protection
English et al 2002; Finkelhor 1990, 2005; Fryer et al 1990	Bioethics; pragmatism; consequentialism	Inappropriate reports do not cause intolerable or unduly traumatic investigations of the family and child
Rankin & Ornstein 2009	Bioethics; children's rights	Legislative reporting duties are a necessary response in situations of children's exposure to domestic violence to enable case identification, service provision, rehabilitation and prevention
Besharov 1985; Smith et al 1985; Mathews 2012; Melton & Davidson 1987	Bioethics; pragmatism; consequentialism	Mandatory reporting laws should be restricted to cases of serious harm and should not apply to all cases of harm
<b>Wald 2013</b>	<b>Bioethics; children's rights; relational ethics; pragmatism; consequentialism</b>	<b>Legislative reporting duties (and the child protection system) are suitable for physical abuse and sexual abuse to assist child protection; but not for emotional abuse and neglect, which are better and more efficiently addressed through other measures</b>

**Table 3.3: Studies including theoretical analyses opposing mandatory reporting laws**

Authors	Theoretical perspective/s	Key themes/arguments
Ainsworth 2002; Ainsworth & Hansen 2006; Besharov 2005; Fraser 1978; Hansen & Ainsworth 2013; Hutchison 1993; Lonne et al 2009; Lukens 2007; Melton 2005; Thompson-Cooper et al 1993; Van Voorhis et al 1998; Wald 2013	Pragmatism; consequentialism	Legislative reporting duties (especially/simple when not appropriately restricted to cases of sufficiently serious harm) cause overreporting, which causes strain on the under-resourced CPS system, which diminishes the resources available for child protection
Besharov 1993; Davies 2010; Dumbrill 2006; Hutchison 1993; Lukens 2007; Thompson-Cooper et al 1993; Wald 1975	Parental autonomy; parental privacy; bioethics	Inappropriate reports can lead to welfare agency investigations of the family and child, which can cause trauma to the family
Anderson et al 1993; Appelbaum 1999; Brown et al 2004; Geidermann 2012; Levine & Doueck 1995; Thompson-Cooper et al 1993	Bioethics	Reporting by a clinical therapist can undermine or jeopardise an existing therapeutic relationship
Berlin et al 1991	Pragmatism; consequentialism	Parental knowledge of a professional's reporting duty reduces the likelihood of parental help-seeking
Ainsworth 2002	Pragmatism; consequentialism	Mandatory reporting does not reduce the overall prevalence of child maltreatment
Lindsey 1994	Pragmatism; consequentialism	Mandatory reporting has not reduced fatalities
Pelton 1989	Consequentialism; economics; social class; social justice	Mandatory reporting is an unjustified and coercive social control measure which imposes middle class values on the poor

<b>Authors</b>	<b>Theoretical perspective/s</b>	<b>Key themes/arguments</b>
Smith et al 1985	Bioethics	The reporting duty can breach the professional's duty of confidentiality to the patient
Melton 2005; Worley & Melton 2014	Pragmatism; consequentialism	Mandatory reporting was a strategy designed to respond to a group of cases which was anticipated to be much smaller than actually exists
<b>Cross et al 2012; Humphreys 2008</b>	<b>Women's rights and autonomy; pragmatism; consequentialism</b>	<b>Apart from cases that are clearly seriously harmful for the child, legislative reporting of children exposed to domestic violence is not justified or efficient theoretically, conceptually or practically</b>

# **Appendix 1: Research Approach**

## APPENDIX 1: RESEARCH APPROACH

---

### Overview

The research project entitled *Child Abuse and Neglect: A Socio-legal study of mandatory reporting in Australia* was funded by the Commonwealth Department of Social Services, and administered through the Victorian Department of Human Services in 2013-2014. The project arose as a result of two coinciding events. First, the *Protecting Victoria's Vulnerable Children Inquiry* in 2012 had made a recommendation that the Victorian Government obtain the agreement of all jurisdictions to undertake a national evaluation of mandatory reporting schemes with a view to *identifying opportunities to harmonise the various statutory regimes* (Cummins, Scott, & Scales, 2012, recommendation 46, p 349). Second, an approach had been made by the research team<sup>60</sup> to the Victorian Government to conduct a very similar research project, which in some ways was broader than the funded project,<sup>61</sup> and in other ways narrower.

The research project and its central questions were designed through liaison and negotiation between the research team and the Victorian Department to meet the needs of the Victorian Department and the recommendation in the Inquiry. **The essence of the research project is to explore in every Australian State and Territory the reporting by different reporter groups of different types of suspected child abuse and neglect.** Accordingly, the research project is *not* aimed at exploring reports by mandated or non-mandated

---

<sup>60</sup> Initially, by Ben Mathews, Leah Bromfield and Kerryann Walsh. Graham Vimpani was subsequently added to the team. The team combine their diverse *disciplinary backgrounds* (Mathews: law; Bromfield: psychology; Walsh: education; Vimpani: medicine) and *jurisdictional locations* (Mathews and Walsh: Queensland; Bromfield: South Australia; Vimpani: New South Wales). The team are: Associate Professor Ben Mathews (QUT Faculty of Law, Australian Centre for Health Law Research), Associate Professor Leah Bromfield (University of South Australia, Australian Centre for Child Protection), Associate Professor Kerryann Walsh (QUT Faculty of Education, Children and Youth Research Centre), Professor Graham Vimpani (University of Newcastle).

<sup>61</sup> The second part of the initially proposed study, which complements the funded project, broadened the project as it would explore the influence of *contextual factors* (e.g. reporter training and knowledge, child's ethnicity, gender) on mandatory reporting, including failure to report, and unjustifiable reports, with a focus on four key reporter groups (police, nurses, doctors, and teachers). Key questions explored in this second part of the study, using qualitative and quantitative methods would be: (1) What contextual factors influence the failure to report child abuse and neglect, and the making of unjustifiable reports, and to what extent? (2) How effective are current mandatory reporter training models? (3) Are barriers to effective reporting modifiable through reporter training? The initially proposed study was narrower in only focusing on three selected jurisdictions rather than including all eight States and Territories.

reporters of family support issues or low-level child welfare issues which are normally termed ‘child concern reports’.

## **Stage 1: Legal doctrinal and historical analysis of legislative mandatory reporting duties in each Australian State and Territory**

Stage 1 of the project conducted a legal doctrinal and historical analysis of legislative mandatory reporting duties in each of Australia’s eight States and Territories, and changes in those duties, over a decade. This part of the project identified which persons were mandated reporters, for which types of child abuse and neglect, in each jurisdiction, at 1 January 2003, and every change in the legislative reporting duties over the decade 2003-2012. This analysis enabled the research team to identify the nature and precise timing of significant changes in the mandatory reporting duties, and to identify at every point in time over the decade within each jurisdiction which persons were mandated reporters, and for which maltreatment types. It also enabled a comparative analysis across jurisdictions of which reporter groups were and were not mandated reporters, and for which maltreatment types.

This legal doctrinal and historical analysis provides the Victorian Government with information about differences across jurisdictions in the mandatory reporter groups, and the types of abuse and neglect they are required to report. It therefore *identifies opportunities to harmonise the various statutory regimes* in mandated reporter groups and types of maltreatment which these groups are required to report. However, decisions on whether, how, and to what extent to harmonise the statutory regimes require policy deliberations and decisions by various government departments.

## **Stage 2: Numbers and outcomes of notifications of each type of child abuse and neglect: Descriptive analysis and data mining**

Stage 2 (unpublished) of the project explored numbers and outcomes of ‘notifications’ of each type of child abuse and neglect (physical abuse, sexual abuse, psychological or emotional abuse, and neglect) made by mandated reporter groups and other reporter groups, in each jurisdiction, for each year over the decade 2003-2012. The purpose of this aspect of the project was to use data mining and summary descriptive statistics to identify the reporting practice of different reporter groups for different types of child abuse and neglect, to identify significant trends in reporting within jurisdictions over time, and to compare reporting practices with legislative requirements and changes in legislative mandatory reporting laws over the decade.

### **Access to data**

This stage of the project relied on each jurisdiction providing unit record data regarding notifications of child abuse and neglect over the decade. Jurisdictions in Australia have differences in the process by which

they receive ‘reports’ of suspected abuse and neglect (these are termed ‘**child protection notifications**’ for other data recording purposes eg the annual Australian Institute of Health and Welfare Child Protection Australia report, and its ‘counting rule’ for child protection notifications), and of other matters concerning children’s welfare (these are termed ‘**child concern reports**’ for the AIHW data recording purposes). They also have differences in their classification and treatment of these initial intakes. Because of the parameters of our research project, our focus was on reports of suspected child abuse and neglect (classed as ‘notifications’); we did not seek to explore *all* reports of *any* matters concerning children (ie those concerning children’s welfare as well as those relating to suspected abuse or neglect). Further information in this regard is depicted in Appendix 1 Table 1 (*Comparative table of child protection system intake processes and our data collection approach*) and Appendix 1 Figure 1 (*Key points in the child protection system intake process*).

## **Data collection**

Requests to provide data were made to each State and Territory government department responsible for receiving intakes concerning suspected child abuse and neglect. Data were provided to the research team at various times over the period 21 October 2013 to 25 July 2014, often with further discussions and negotiations required to facilitate complete submission of data and to clarify other aspects of the data provided. Four jurisdictions provided data exactly as requested (Australian Capital Territory, Queensland, Victoria, Western Australia). One jurisdiction, Tasmania, provided data as requested but only for nine rather than 10 years (i.e. 2004-2012). Two jurisdictions (Northern Territory and South Australia) provided aggregate summary data for the decade rather than unit record data. One jurisdiction (New South Wales) provided summary aggregate data only for the years 2010-2012, and some other aggregate data for prior years, which enabled only partial exploration of the research questions for that jurisdiction.

## **Data analysis**

*Data mining*, also termed *knowledge discovery*, refers to the process of analysing large datasets to isolate significant or noteworthy patterns and trends. The process includes *cluster analysis* (identifying groups of data records), *anomaly detection* (identifying unusual patterns or outlier trends), *association rule learning* (identifying relationships between variables), and *summarisation* (generating a more concise representation of the dataset including creation of reports and summaries) (Han & Kamber 2012; Stephens et al 2006).

Key steps in the data mining process adopted in this project were:

- (a) *selection of data and obtaining data* (research project conceptualisation informing the nature of the request for data; requesting the relevant data in useable form from government child protection departments in each of the eight jurisdictions; receiving the data in excel spreadsheets

- containing unit record data, or for two jurisdictions, aggregate summary data, and for one jurisdiction, some aggregate tables);
- (b) *data pre-processing*, which includes data cleaning, including removing missing and irrelevant data (this included removing data where the coded maltreatment category was ‘not stated’ or ‘other’), and collation of the data;
- (c) *data mining*, which includes:
- *cluster analysis*: for example, identifying groups of records about reports by specific reporter groups, about specific types of abuse and neglect;
  - *anomaly detection*: for example, identifying shifts in numbers and or outcomes of reports of a specific type of abuse, or by a specific reporter group, in any given year or as a sustained trend over an extended period;
  - *association rule learning*: for example, identifying relationships between a particular reporter group and their reports of a specific type of abuse, and between the reports made by a particular report group and the outcomes of those reports; and
  - *summarisation*: generation of full data reports, as well as executive summaries and policy briefs.

## Interpretation of data

The patterns and trends identified in the data mining process then must be interpreted by situating them in the context of relevant legal and other contextual factors. Due to the scope of the project (for example, noting the limitation produced by the fourth qualitative stage not being funded), it was not possible for the research team to identify and evaluate the impact of *all* factors impacting reporting practice generally, separated by reporter group, or by type of abuse or neglect.

However, major **legal factors** were able to be considered, namely the presence and nature of mandatory reporting duties, and the timing of the introduction of new legislative mandatory reporting duties. As well, we were also able to consider major known **contextual factors** which would also likely influence trends in numbers and outcomes of reports. Some of these are factors identified in previous analyses of the approaches adopted by respective State and Territory systems such as agency intake methods, nomenclature, and the processing of intakes (Holzer & Bromfield, 2008). For example, the characterisation of an intake as a ‘**notification**’ is affected by factors including whether the caller or the agency defines the intake. In the ACT and Tasmania, intakes are *caller-defined*, producing higher numbers of ‘notifications’, and Victoria has a similar but more rigorous approach; in contrast, in other jurisdictions the intake is *agency-defined*: that is, the agency determines whether the intake is a ‘notification’ regarding suspected child abuse or neglect, or is a less serious ‘child concern’ report regarding a child’s overall welfare). Agency

decisions about whether to **investigate** a notification or not are influenced by multiple factors including: differences in the availability of alternative diversionary services, and different levels of resources available to support investigations. An agency finding that an investigated notification is '**substantiated**' is influenced by multiple factors including:

- differences in the availability of alternative diversionary services (where a notification is referred to such a service, this will not be counted as a substantiated notification);
- different thresholds for reaching a finding of 'substantiated';
- availability of evidence of harm in any given case even where there is sufficient evidence of abuse or neglect;
- availability of evidence of abuse or neglect in any given case even where there is sufficient evidence of harm;
- whether the jurisdiction focuses on evaluating substantiation of existing harm, or risk of harm occurring in the future.

Other important contextual factors affecting numbers of notifications and responses to them would include locally-situated events. These could include events and developments such as:

- the presence of child protection inquiries or reports;
- high levels of media attention on particular cases or departmental processes;
- introduction of a new industry-based reporting policy such as a standard operating procedure for police;
- changes to child protection agencies (such as an influx of funding or staff) and their approaches;
- heightened reporter education via awareness-building by professional education, media campaigns or other strategies; and heightened sensitivity of the general public to a particular form of child abuse or neglect created by policy, media or social discourse.

To gain a more nuanced appreciation of the kinds of contextual factors that may have influenced the data in this study, and to supplement their own knowledge of contextual factors, the research team invited and held meetings with senior staff in State and Territory departments as critical friends to elicit their views about what might underpin key findings from the data. Their accounts were informed by their knowledge of local contexts and agency developments. These were noted and carefully considered by the research team in their interpretations of the data.

## **Contributions to knowledge**

Despite these multiple complexities, the descriptive statistics and data mining facilitate understandings of important elements of the context, especially *within jurisdictions* annually and over the decade. This is important because it provides more nuanced insights into the reporting practices of different reporter

groups for different types of abuse and neglect, rather than simply aggregating all reports of all kinds of abuse and neglect by all reporter groups, and drawing undifferentiated conclusions about the nature and outcomes of ‘reporting of child abuse and neglect’.

This approach has been urged in research by the lead investigator, based on the notion of a *differentiation thesis* (Mathews, 2014; Mathews, 2012). It proceeds from the basis that heterogeneity exists across both reporter groups, and types of abuse and neglect. It proposes that because of the differential nature of various reporter groups, and the differentiation between types of child abuse and neglect, there are likely to be significant differences amongst various reporter groups’ reporting practices for different types of child abuse and neglect. Gaining a detailed understanding of specific components of different reporter groups’ reporting practices regarding different types of abuse and neglect provides more sophisticated insights into:

- the nature of reporting trends;
- where reporting appears to be more and less effective; and
- where efforts to improve practice may be best directed.

Systemic differences between jurisdictions limit the extent to which *cross-jurisdictional* comparisons can be made. However, some comparisons may be possible where sufficient similarities exist, and/or where clear and significant trends are identified in the data. This is especially so where, by all accounts, there appears to be only one significant differentiating variable, such as the presence or absence of a mandatory reporting duty.

### **Effectiveness of reporting practices**

This part of the project could also assist in informing government departments in their assessments of the *effectiveness* of reporting practices. While there are challenges in conceptualising how ‘effectiveness’ of reporting may be evaluated, it seems reasonable to proceed on the basis that identification of trends in *numbers* of reports and in *outcomes* of reports, placed in the context of legislative mandatory reporting duties and changes in them, could provide some useful information contributing to any assessment of the effectiveness of reporting practice.

Accordingly, the research project provides detailed data in each jurisdiction specific to the reporting practices of key reporter groups, about specific types of abuse and neglect, over time. In addition, to provide meaningful findings for individual State and Territory governments (but not for strict cross-jurisdictional comparison) about the proportional contribution to reporting made collectively by their jurisdiction’s major occupational reporter groups, we conducted some analyses by combining the reporting practice of the ‘major mandated reporter groups’ in the State/Territory. In doing this, we adopted a similar

approach for all jurisdictions, presenting the combined practice of four key groups who collectively make the vast majority of all reports by mandated reporters: police, teachers, doctors and nurses. These groups were chosen because generally they were: (1) clearly defined occupational/professional reporter groups; (2) groups who make a significant contribution to reporting; (3) groups designated as mandated reporters under the legislation; (4) designated as mandated reporters for the whole decade; and (5) data was individually available for analysis regarding these groups. For some jurisdictions (Qld, WA), one or more of the four groups had not always been mandated by law, but they were selected because they nevertheless made a large contribution to reporting practice. For four jurisdictions (ACT, NT, SA, Tas), one variation was necessary to this approach, including two additional groups (social workers and childcare workers) because they met the five conditions stated above.

**The substantiated report caveat.** A caveat must be noted about interpreting data on the outcomes of reports for this purpose, as it has been consistently concluded that ‘unsubstantiated’ notifications do not differ markedly from ‘substantiated’ notifications in service need (Drake, 1996; Hussey, et al., 2005; Kohl, Jonson-Reid, & Drake, 2009). However, where enabled by the data obtained, some tentative conclusions may be drawn concerning *measures of effectiveness* based on the following assessments per annum and over time, for different maltreatment types, of:

- the contribution of mandated reporter groups and other reporter groups to total numbers of notifications and total numbers of substantiated notifications;
- comparison of numbers and outcomes of notifications across jurisdictions where only one jurisdiction had mandatory reporting;
- exploration of changes in numbers and outcomes of notifications after introduction of the legislative mandatory reporting duty;
- number of notifications by mandated reporters which were screened out at intake;
- extent of the growth in the number of children involved in reports by mandated reporters;
- other notable trends in reporting practice.

This stage of the project therefore generates evidence in each jurisdiction about the reporting practice of different reporter groups regarding different types of abuse and neglect, which can inform the *identification of opportunities to harmonise the various statutory regimes*. However, decisions on whether, how, and to what extent to harmonise the statutory regimes require policy deliberations and decisions by various government departments.

### **Stage 3: Literature reviews**

**Stage 3** of the project conducted two systematized reviews (Grant et al 2009) with rapid evidence synthesis (Gannan, Ciliska, & Thomas, 2010; Khangura, Konnyu, Cushman, Grimshaw, & Moher, 2012). The first review concerned factors influencing mandatory reporting of child abuse and neglect. The second review concerned theoretical critiques of mandatory reporting laws. A selection of databases was generated and lists of search terms were developed. Inclusion and exclusion criteria were developed, informed by the focus of the reviews and the standard of evidence and scholarship required.

This stage of the project therefore contributes to the *identification of opportunities to harmonise the various statutory regimes*. More specifically, the findings in this stage of the project from the review of factors influencing reporting may also inform further work in developing strategies for policy and practice which can optimise the conditions for mandatory reporting; for example, in enhancing reporter training for specific professional groups and in specific domains. Findings in this stage of the project from the review of theoretical critiques may shed light on the nature, presence and strength of theoretical underpinnings for mandatory reporting law, both generally, and for specific maltreatment types. However, decisions on whether, how, and to what extent to harmonise the statutory regimes require policy deliberations and decisions by various government departments.

## **Appendix 1 Table 1 and Figure 1**

Appendix 1 Table 1 provides a comparative table of child protection system processes regarding 'reports' or 'intakes' and responses to them, and our data collection approach. Three jurisdictions have caller-defined approaches (ACT, Tasmania and Victoria) and the other five jurisdictions have agency-defined approaches.

Appendix 1 Figure 1 depicts key points in the child protection system intake process: receipt and processing of reports/intakes regarding child abuse and neglect, and child welfare.

**Appendix 1 Table 1: Comparative table of child protection system intake processes and our data collection approach**

Jurisdiction	Child protection system intake and response processes	Outline of data collection approach
<b>ACT</b>	<p>In the ACT, initial 'reports' or 'intakes' are <b>'caller-defined'</b> meaning that nearly all intakes will be initially classified as 'notifications'. This has the effect, relative to other jurisdictions which do not employ this approach, of inflating the number of 'notifications'.</p> <p>The agency then determines whether the 'notification' has sufficient information to require an investigation.</p>	<p>We requested only data on notifications of child abuse and neglect. Because of the approach taken in the ACT to defining 'notifications', we received this data, but it will reflect an inflated number of initial notifications.</p>
<b>TAS</b>	<p>In Tasmania, 'reports' or 'intakes' are <b>'caller-defined'</b> meaning that nearly all intakes will be initially classified as 'notifications'. This has the effect, relative to other jurisdictions which do not employ this approach, of inflating the number of 'notifications'.</p> <p>The agency then determines whether the 'notification' has sufficient information to require an investigation.</p>	<p>We requested only data on notifications of child abuse and neglect. Because of the approach taken in Tasmania to defining 'notifications', we received this data, but it will reflect an inflated number of initial notifications.</p> <p>We did not request data on reports made under Tasmania's differential response system (Gateways) as the study is focused on reports of child abuse and neglect of a higher level of seriousness.</p> <p>Data was provided for the years 2004-2012.</p>
<b>VIC</b>	<p>In Victoria, 'reports' or 'intakes' are <b>'caller-defined'</b> meaning that most intakes will be initially classified as 'notifications'. However, Victoria adopts a more stringent approach to this than in Tasmania and the ACT. Intakes are recorded as 'notifications' when the reporter <i>either</i> expresses significant concern for the wellbeing of a child, or believes that a child is in need of protection. This may have the effect, relative to other jurisdictions which do not employ this approach, of somewhat inflating the number of 'notifications'.</p> <p>The agency then determines whether the 'notification' has sufficient information to require an investigation.</p>	<p>We requested only data on notifications of child abuse and neglect. Because of the approach taken in Victoria to defining 'notifications', we received this data, but it will reflect an inflated number of initial notifications.</p> <p>We did not request data on reports made under Victoria's differential response system (ChildFIRST) as the study is focused on reports of child abuse and neglect of a higher level of seriousness.</p>

Jurisdiction	Child protection system intake and response processes	Outline of data collection approach
<b>NSW</b>	<p>In NSW, all initial ‘reports’ or ‘intakes’ are first screened by the agency to determine if they meet the threshold of ‘risk of significant harm’. These reports are the NSW ‘notifications’; those that do not meet the threshold are classed as ‘child concern reports’.</p> <p>Hence, ‘reports’ or ‘intakes’ are <b>‘agency-defined’</b>: the child protection agency determines at intake whether the intake is a child concern report or a child protection notification.</p> <p>The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</p>	<p>We requested only data on notifications of child abuse and neglect.</p> <p>We did not request data on reports made under New South Wales’s differential response system (child wellbeing units) as the study is focused on reports of child abuse and neglect of a higher level of seriousness.</p> <p>We were provided only with data on reports of significant harm for 2010-2012, and earlier summary tables showing partial data on reports of significant harm.</p>
<b>NT</b>	<p>In the Northern Territory, ‘reports’ or ‘intakes’ are <b>‘agency-defined’</b>: the child protection agency determines at intake whether the intake is a child concern report or a child protection notification.</p> <p>The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</p>	<p>We requested and obtained only data on ‘reports of child abuse and neglect’ and therefore obtained data on notifications.</p>
<b>QLD</b>	<p>In Queensland, all matters reported to Child Safety are classed as <b>‘intakes’</b>. An intake is then screened and can be classed as either being (1) a <b>child concern report</b> (if it is simply a general low-level concern about a child’s welfare re the home environment or the standard of care the child is receiving); or (2) a <b>child protection notification</b> (if it is assessed as meeting the threshold of being related to child abuse or neglect).</p> <p>Hence, intakes are <b>‘agency-defined’</b>: the child protection agency determines at intake whether the intake is a child concern report or a child protection notification.</p> <p>The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</p>	<p>We requested and obtained only data on ‘reports of child abuse and neglect’ and therefore obtained data on notifications.</p>
<b>SA</b>	<p>In South Australia, ‘reports’ or ‘intakes’ are <b>‘agency-defined’</b>: the child protection agency determines at intake whether the intake is a child concern report or a child protection notification.</p> <p>The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</p>	<p>We requested and obtained only data on ‘reports of child abuse and neglect’ and therefore obtained data on notifications.</p>

Jurisdiction	Child protection system intake and response processes	Outline of data collection approach
WA	<p><b>From 2003-2005</b>, all ‘reports’ or ‘intakes’ were initially classed by the agency as ‘child concern reports’ and were then screened by the agency. After screening, an intake was classed as either being (1) a <b>child concern report</b> (if it is simply a general low-level concern about a child’s welfare re the home environment or the standard of care the child is receiving); or (2) a <b>child maltreatment allegation</b> (akin to a ‘child protection notification’) if it is assessed as meeting the threshold of being related to child abuse or neglect.</p> <ul style="list-style-type: none"> <li>• In Western Australia in this period, virtually all intakes classed as child maltreatment allegations were investigated.</li> </ul> <p>From <b>1 March 2006 to 6 March 2010</b>, all intakes were classed initially as ‘concerns for a child’s wellbeing’ (akin to a ‘child concern report’). The agency then screened the intakes and classed them as either being (1) a <b>child concern report</b> (if it is simply a general low-level concern about a child’s welfare re the home environment or the standard of care the child is receiving); or (2) a <b>child protection notification</b> (if it is assessed as meeting the threshold of being related to child abuse or neglect).</p> <ul style="list-style-type: none"> <li>• The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</li> </ul> <p>From <b>6 March 2010</b>, all intakes were classed initially as ‘initial inquiries for child concern’ (akin to a ‘child concern report’). The agency then screened the intakes and classed them as either being (1) a <b>child concern report</b> (if it is simply a general low-level concern about a child’s welfare re the home environment or the standard of care the child is receiving); or (2) a <b>child protection notification</b> (if it is assessed as meeting the threshold of being related to child abuse or neglect).</p> <ul style="list-style-type: none"> <li>• The agency then determines whether the ‘notification’ has sufficient information to require an investigation.</li> </ul> <p>Hence, intakes are <b>‘agency-defined’</b>: the child protection agency determines at intake whether the intake is a child concern report or a child protection notification.</p>	<p>We requested and obtained only data on ‘reports of child abuse and neglect’ and therefore obtained data on notifications.</p> <p>Because of the change in the recording system, our analysis of the WA data is focused on reporting from 2006 onwards.</p>
